

Historic Architectural Review Commission Staff Report for Item 11

То:	Chairman Haven Burkee and Historic Architectural Review Commission Members
From:	Daniela Salume, MFA Historic Architectural Preservationist
Meeting Date:	July 22, 2025
Applicant:	Brent Lyons and Clinton Curry
Application Number:	C2025-0066
Address:	1 Whitehead Street

Description of Work:

Demolition of existing historic concrete turtle tanks and wood deck at rear of aquarium.

Site Facts:

The building under review is a historic, contributing structure built in 1933. It is part of the Key West Aquarium complex. Constructed as a Mediterranean Revival-style aquarium, it is considered the city's first tourist attraction and the first open-air aquarium. In the 1960s, a roof was added to enclose the space. The building features a sculpted parapet in the front and a stepped parapet in the rear. Originally, it had an open front archway and wood casement windows. A ticket booth was later added in front of the archway, and Bahama shutters were installed.

Currently the building sits on the ground and is located in a AE-9 flood zone.

Ordinance Cited on Review:

- Section 102-217 (4), demolition for contributing and historic structures of the Land Development Regulations.
- Section 102-218 Criteria for Demolition of the Land Development Regulations.

Staff Analysis:

A Certificate of Appropriateness is currently under review for removal of deteriorating concrete turtle tanks (10 ft x 21 ft) and a wooden deck located at the rear of the historic Key West Aquarium. The tanks are in poor condition and physically connected to the seawall, raising concerns about the potential impact of demolition on the stability of the seawall and the structural integrity of adjacent historic resources.

Although the tanks were historically associated with the aquarium's operations, they were added after the original 1933 construction. Due to their advanced deterioration and the risk they pose to surrounding historic resources, their removal is appropriate and necessary.

Existing Site Plan. Clouded area proposed to be demolished.

Section of turtle tanks and wooden deck proposed to be demolished.

Section of turtle tanks and wooden deck proposed to be demolished.

Plan view of turtle tanks and wooden deck proposed to be demolished.

It is staff's opinion that the request for this demolition shall be based on the demolition criteria of Chapter 102 Section 218 (a) of the LDR's. The criteria for demolition of historic structures state the following:

(a) The historic architectural review commission shall issue a certificate of appropriateness for an application for demolition:

(1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration, or it does not meet any of the criteria of section 102-125(1) through (9).

The elements proposed for demolition are associated with the historic function of the site but are not original to the 1933 aquarium structure. The concrete tanks are in a state of advanced structural deterioration and are physically tied into the seawall, creating a risk to the stability of adjacent historic resources.

The following is the criteria of section 102-125:

1 Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction.

Staff opines that the historic turtle tanks and wooden deck have no distinctive characteristics of a type, period or method of construction.

2 Is not specifically associated with events that have made a significant contribution to local, state, or national history.

There is no record of events occurring at or involving the turtle tanks that contributed to local, state, or national history.

3 Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state, or nation, and is not associated with the life of a person significant in the past.

It is staff's understanding that the elements under review have no significant character and are not associated with the life of a significant person in the past.

4 Is not the site of a historic event with a significant effect upon society.

It is staff's understanding that the site is not associated with any significant event.

5 Does not exemplify the cultural, political, economic, social, or historic heritage of the city.

While the aquarium as a whole contributes to the city's historic heritage, the turtle tanks and the wooden deck are later additions.

6 Does not portray the environment in an era of history characterized by a distinctive architectural style.

Staff believes that the existing turtle tanks and wooden deck do not portray an era of history characterized by a distinctive architectural style.

7 If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed, or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif.

This is not the case.

8 Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood; and

The turtle tanks and wooden deck do not serve as a familiar or defining visual element of the site or surrounding neighborhood..

9 Has not yielded, and is not likely to yield, information important in history.

Staff believes that the elements under review are not likely to yield important information in history.

It is staff's opinion that the request for demolition may be considered, as the structures under review meet the criteria for demolition outlined in the guidelines. If approved, this will be the only required reading for demolition. Staff will review submitted construction plans for demolition and design to ensure consistency with submitted drawings.

Because the tanks are physically connected to the seawall and located near contributing historic structures, careful execution of the demolition is essential to avoid unintended damage.

Staff recommends approval of the demolition, subject to the following conditions:

- The contractor adhere to the Seawall Stabilization Contingency Plan during all demolition activities.
- A licensed structural engineer must be present on-site to monitor conditions throughout the demolition.
- The City of Key West must be notified immediately if any structural movement or signs of distress are observed.
- All demolition work must be carried out in a way that minimizes vibration and protects adjacent historic structures, including the aquarium building and walkways.

DETAILED PROJECT DESCRIPTION OF DEMOLITION

Detachment and removal of the failed marine life display tanks located outside of the main building seawall.

Built from concrete, these tanks will be removed by crane in broken segments.

CRITERIA FOR DEMOLITION OF CONTRIBUTING OR HISTORIC STRUCTURES:

Before any Certificate of Appropriateness may be issued for a demolition request, the Historic Architectural Review Commission must find that the following requirements are met (please review and comment on each criterion that applies):

(1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the following criteria:

(a) The existing condition of the building or structure is irrevocably compromised by extreme deterioration.

The concrete tanks have broken in several pieces, resulting in a un-repairable state. In addition, the tanks are

attached to the existing seawall supporting the aquarium building.

(2) Or explain how the building or structure meets the criteria below:

(a) Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction.

Nothing in this application is intended to alter the authority of the Building Official to condemn for demolition dangerous buildings, as provided in Section 102-218 of the Land Development Regulations and Chapter 14 of the Code of Ordinances.

(t	 Is not specifically 	y associated with events that have made a significant contribution to local, state, or national history.
· / ·		j;;;;;;;;;;;;;;;;;;

(c) Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state or nation, and is not associated with the life of a person significant in the past.

(d) Is not the site of a historic event with significant effect upon society.

(e) Does not exemplify the cultural, political, economic, social, or historic heritage of the city.

(f) Does not portray the environment in an era of history characterized by a distinctive architectural style.

(g) If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif.

(h) Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood.

Nothing in this application is intended to alter the authority of the Building Official to condemn for demolition dangerous buildings, as provided in Section 102-218 of the Land Development Regulations and Chapter 14 of the Code of Ordinances.

(i)	Has not yielded, and is not likely to yield, information important in history,

CRITERIA FOR DEMOLITION OF NON-CONTRIBUTING OR NON-HISTORIC STRUCTURES:

The following criteria will also be reviewed by the Historic Architectural Review Commission for proposed demolitions. The Commission shall not issue a Certificate of Appropriateness that would result in the following conditions (please review and comment on each criterion that applies):
(1) Removing buildings or structure that are important in defining the overall historic character of a district or neighborhood so that the character is diminished.

(2) Removing historic buildings or structures and thus destroying the historic relationship between buildings or structures and open space.

(3) Removing an historic building or structure in a complex; or removing a building façade; or removing a significant later addition that is important in defining the historic character of a site or the surrounding district or neighborhood.

(4) Removing buildings or structures that would otherwise qualify as contributing.

SURVEY

SPECIFIC PURPOSE SURVEY OF:

On the Island of Key West, known on William A. Whitehead's Map delineated in February A.D. 1829, as all of Lot 5 and part of Lot 4 in Square 3, and all of the property located at the end of Whitehead Street, and more particularly described as follows:

BEGINNING at the southeast corner of Square 3, thence run northeasterly along Front Street a distance of one hundred sixty-six (1660 feet; thence northwesterly a distance of three hundred (300) feet along Tift's Alley; thence southwesterly and parallel with Front Street a distance of one hundred fifty (150) feet; thence northwesterly a distance of fifty-three and seven tenths (53.7) feet; thence southwesterly and parallel with Front Street a distance of sixteen (16) feet; thence southeasterly and parallel with Tift's Alley a distance of three hundred fifty-three and seven tenths (353.7) feet back to the point of beginning, including all improvements and buildings thereon and all necessary and existing ingress and egress thereto, EXCEPTING therefrom:

a) that thirty (30) feet public right of way known as Wall Street;

the area and building located at the southeast corner of Square 3 on which the building is presently known as Key West Art Center is located; and the north one-half (1/2) of Warehouse Number Four, which is presently being occupied by the Key West Chamber of Commerce. b)

c)

ALS'O

On the island of Key West, known on William A. Whitehead's Map, delineated in February A.D. 1829 as that area beginning at the southeasterly corner of Wall Street and Whitehead Street; thence run northwesterly and parallel with Tift's Alley a distance of two hundred fifty-three and seven tenths (253.7) feet; thence southwesterly a distance of fifty (50) feet; thence southeasterly and parallel with Tift's Alley a distance of two hundred fifty-three and seven tenths (253.7) feet; thence northeasterly a distance of fifty (50) feet; thence southeasterly and parallel with Tift's Alley a distance of two hundred fifty-three and seven tenths (253.7) feet; thence northeasterly a distance of fifty (50) feet back to the point of beginning, including the Aquarium building located in Key West, Florida, and all fixtures, machinery, piping, electric wiring and equipment used in connection therewith, including the filtering apparatus, all "as is", together with the concession stands as same are now located outside of the Aquarium building.

SPECIFIC PURPOSE SURVEY FOR: HTA; City of Key West;

I HEREBY CERTIFY that this survey was made under my responsible charge and meets the Standard of Practice as set forth by the Florida Board of Professional Surveyors & Mappers in Chapter 5J–17, Florida Administrative Code, pursuant to Section 472.027, Florida Statutes.

PROPOSED DESIGN

June 30, 2025

Seawall Stabilization Contingency Plan

Turtle Tank Demolition, Key West Aquarium

Project Background:

The existing seawall not only retains the adjacent land but also supports the foundation of the Key West Aquarium building. Given the tank's physical connection to the seawall and its poor condition, there is a reasonable concern regarding the potential for seawall damage during or after the demolition process. Additionally, we recognize the risk that some degree of pre-existing deterioration of the seawall could become apparent once the tank structure is removed.

Stabilization and Contingency Approach:

Our primary approach for any unforeseen seawall compromise is to implement immediate shoring and stabilization using a driven sheet pile system installed waterside of the existing wall. This system will provide temporary lateral support while a long-term repair or replacement solution is developed, should it become necessary.

If seawall instability is observed during demolition, our stabilization plan includes the following steps:

1. Work Suspension:

All demolition work will stop immediately upon any observation of seawall movement, cracking, soil loss, or other signs of distress.

2. Site Safety Measures:

- Access to the area will be restricted.
- The site will be monitored for additional movement.
- Notifications will be made to the City of Key West and the project structural engineer of record.

3. Assessment:

A licensed professional engineer will conduct an immediate assessment of the seawall condition and provide recommendations for stabilization.

4. Shoring Implementation (Primary Stabilization Method):

- Installation of temporary sheet piling along the water side of the affected seawall section.
- Sheet piles will be driven to an appropriate depth to provide lateral support and control further soil loss.
- The length of the sheet pile wall will extend beyond the affected area to ensure structural continuity and minimize load concentrations.
- If required, tiebacks or internal bracing will be installed for additional support.

Corporate Headquarters 6389 Tower Lane · Sarasota, Florida 34240 · (941) 371-7617 CG-C1521613 · PC-C1256932 · CU-C1225087 · EC-13012237

5. Monitoring:

The seawall and adjacent ground will be monitored for additional movement during and after shoring installation.

6. Permanent Repair Planning:

Following temporary stabilization, a site-specific permanent repair plan will be designed, reviewed, and submitted to the City for approval prior to execution.

Prevention Measures During Demolition:

Throughout the tank removal, demolition methods will minimize vibration and impact to the existing seawall. Wherever possible, we will use saw-cutting and controlled dismantling techniques to reduce any risk of incidental damage.

We recognize the critical importance of maintaining the integrity of the seawall and the safety of the adjacent Aquarium property. This contingency plan provides a responsive and engineer-supervised path to immediately stabilize and protect the seawall should any damage or movement occur.

Please do not hesitate to contact us if any additional details are required.

Sincerely,

Kristofer Eccles, P.E. WES Industries, Inc.
