**Description of Work:**

Demolition of exterior rear wall, roof, and partial demolition of west wall on main house-  
**Second Reading.**

**Site Facts:**

The building in question is not in the surveys. According to the Property Appraiser's records, the one-story cbs house is more than 50 years, as it was built in 1954. The 1962 Sanborn map depicts in the lot a one-story concrete block dwelling. By looking at the 1962 Sanborn map, the ca. 1965 photo and the Property Appraiser's records it is staff's opinion that the house was expanded and altered towards its west side. The ranch house has flat roofs, an exterior chimney, and pronounced horizontal eaves. Across the site, there is an open lot. The house located towards the east side is a new two-story frame structure and the house located towards the west side is a one-story cbs house. Although the house is on an "x" flooding zone, the area is prone to heavy floods.

The city recognizes a second unit through a Beneficial Use Allocation granted in 2014. The city also vacated an alleyway, located towards the east side of the lot.

**Ordinance Cited on Review:**

- Section 102-217 (3), demolition for contributing and historic structures of the Land Development Regulations for the architectural elements in the main house.

## Staff Analysis

This report is for the second reading for request demolition of historic elements within the house. On June 26, 2018, the Commission approved proposed new plans and the first reading for demolition. The Certificate of Appropriateness proposes the demolition of the existing roof, exterior rear wall and partial demolition of the west wall. Staff visited this site more than two years ago, as there was an application that proposed the demolition of the entire structure. Since then no building permits or COA applications have been filed for exterior repairs. Today the house looks more deteriorated, but there is still no evidence of severe deterioration or a collapsible structure.

It is staff's opinion that the request for the elements of the main house proposed to be demolition should be reviewed based on the demolition criteria of Chapter 102 Section 218 of the LDR's. The criteria state the following;

*(a) The historic architectural review commission shall issue a certificate of appropriateness for an application for demolition:*

- (1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the criteria of section 102-125(1) through (9).*
- (2) For a contributing historic or noncontributing building or structure, a complete construction plan for the site is approved by the historic architectural review commission.*

*(b) The historic architectural review commission shall not issue permits that would result in:*

- (1) Removing buildings or structures that are important in defining the overall historic character of a district or neighborhood so that the character is diminished;*

The existing house depicts an important architectural period of mid-century modern architecture. The reconstruction of the roof that will match the existing one is necessary for protecting the house of flood damage. The proposed partial demolition of the side wall and demolition of the rear wall will not jeopardize nor will diminish the character of the mid-century home nor its surroundings.

- (2) Removing historic buildings or structures and thus destroying the historic relationship between buildings or structures and open space;*

The ample front yard will be kept and, although there will be a side addition, the side yard will be larger than minimum required by

zoning regulations. The site is a double lot and the extension will give a much needed lot to volume ratio, which is one of many important characteristics in the Casa Marina area.

- (3) *Removing an historic building or structure in a complex; or removing a building facade; or removing a significant later addition that is important in defining the historic character of a site or the surrounding district or neighborhood.*

This will not be the case for the existing cbs ranch house.

- (4) *Removing buildings or structures that would otherwise qualify as contributing, as set forth in [section 102-62\(3\)](#).*

It is staff's opinion that the existing structure does qualify as a contributing structure to the Casa Marina area, but the design promotes the preservation of the building, with the exception of the roof rear wall and partial side wall.

Staff opines that the elements to be demolished do not meet the following criteria:

(1) The one-story mid-century ranch house embodies distinctive characteristics of its time, period of construction and aesthetics for its style. Although the house shows some minor deterioration, it still possesses its historic architectural attributes. The proposed elements to be demolished will not alter nor jeopardize the historic character and architectural quality of the house.

(2) Staff is not aware that the house is specifically associated with events that have made a significant contribution to local, state, or national history.

(3) The house has significant character, interest, and value as part of the Casa Marina development. The house represents a period of construction however; the house is not associated with the life of a person significant in the past. The demolition of the architectural elements will not diminish the architectural value of the house.

(4) Staff is not aware of any historic event with a significant effect upon society.

(5) The house exemplifies the historic heritage of the city. Casa Marina was developed as a contemporary community of its time where distinctive yard patterns as well as mid-century simple architecture are character-defining features of the historic neighborhood. The removal of the roof and its build back, the removal of the rear wall and the partial removal of the side wall will not have any effect of historic patterns found in the area.

(6) The historic house portrays distinctive architectural style of its time and the proposed design will promote and preserve such.

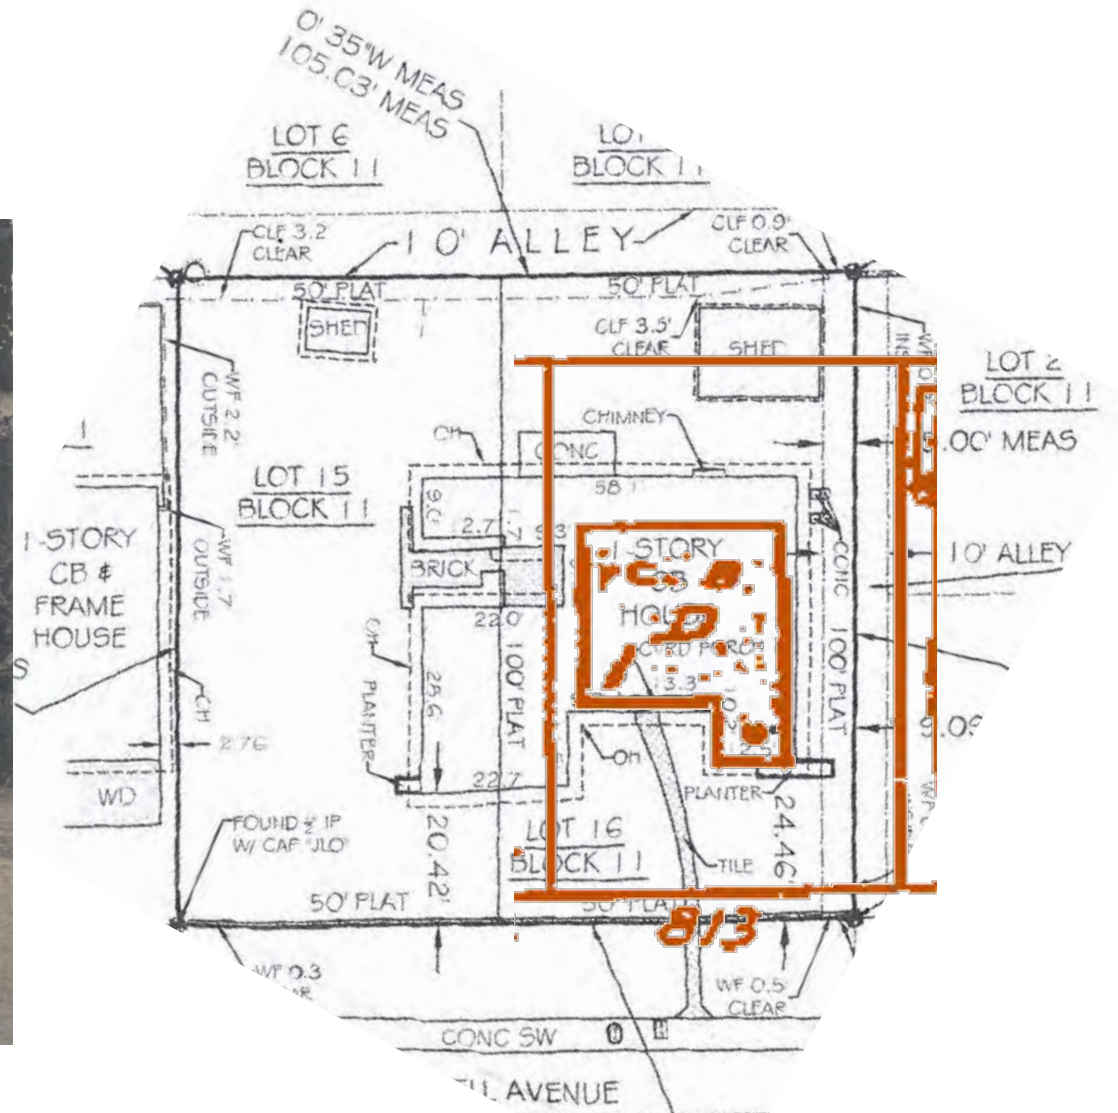

(7) The house is not related to a square, park, or other distinctive area.

(8) The house does have a unique location and singular physical characteristic, which represents an established and familiar visual feature of its neighborhood. The proposed design will preserve the visual features of the mid-century house.

(9) The house yields, and is likely to yield, information important in history, it is a historic house and is a physical record of its time, and the proposed design will not jeopardize that record. The new additions will read as such and not as part of the historic fabric of the building.

In conclusion, it is staff's opinion that the Commission can consider the requested demolitions as they comply with the criteria for demolition stated under the Land Development Regulations. If approved, this will be the last required reading for the demolition of the roof, rear wall and partial demolition of the side wall of the house.
