

Staff Report for Item 4

To: Chairman Bryan Green and Historic Architectural Review
Commission Members

From: Kelly Perkins
HARC Assistant Planner

Meeting Date: July 26, 2016

Applicant: Meridian Engineering

Application Number: H16-03-0042

Address: #1421 Catherine Street

Description of Work:

Replace existing carport.

Site Facts:

The one-story, wood frame structure is listed as a contributing resource in the survey, and it was constructed c.1920. The carport in question is not historic, as it does not appear in any Sanborn maps or in any historic photographs.

This item came to last month's HARC meeting, but was postponed in order to redesign the project to push the carport over towards the side property line and further towards the rear to comply with the HARC Guidelines regarding carports.

Guidelines Cited in Review:

Additions and Alterations/New Construction (pages 36-38a), specifically guidelines for new construction.

Outbuildings (Pages 40-41), specifically guidelines 1 through 5.

Staff Analysis

This Certificate of Appropriateness proposes the construction of a new open carport, which will

be 13 feet, 10 inches – five inches taller than the previous proposal. The carport will have a front gable roof with v-crimp roofing material and hardiboard lap siding. Rather than attached to the primary structure, the proposed carport will be its own freestanding building.

Consistency with the Guidelines

The Commission instructed the applicant to redesign the carport, moving the proposed location towards the side of the property and pushing the carport towards the rear. The revised design does move the carport over towards the property line and pushes the carport back 6 feet, but increases the height of the carport by 5 inches.

While an improvement, the design still proposes a carport that will be highly visible from the right-of-way and will compete with the historic structure, as the proposed design aligns the carport with the front of the contributing structure. There is more than enough space to push the carport more towards the rear. The guidelines are clear that “the construction of new accessory buildings such as...carports which are highly visible from the public right-of-way are not appropriate in the historic district.” The existing carport is not historic, nor is it historically appropriate. Therefore, staff finds that this project is inconsistent with the guidelines regarding outbuildings.
