## Staff Report Item 10a

---

<b>Meeting Date:</b>	July 15, 2014
<b>Applicant:</b>	William P. Horn, Architect
<b>Application Number:</b>	H14-01-1097
<b>Address:</b>	#903 Eaton Street
<b>Description of Work:</b>	New one and a half story and two story building, pool and site work.
<b>Building Facts:</b>	The main house in the site is not listed in the surveys. A similar footprint of what exists today is depicted in the 1962 Sanborn map.
<b>Guidelines Cited in Review:</b>	New Construction (pages 38-38a), specific mass, scale, proportion and site.  Deck and pools (pages 39-40), specific guidelines 1, 3 and 5.  Fences and walls (pages 41-42)

### Staff Analysis

The Certificate of Appropriateness proposes a new frame house to be built with actual required setbacks and building coverage. The new design proposes a one and a half story structure at the front of the site and a two story structure on the back, all attached. The design is based on traditional forms found in Old Town while introducing materials, proportions and a floor plan with a contemporary flair. The floor plan is a "C" shape, with an open area on the center, creating an exterior swimming pool and deck. Although the front portion of the two adjacent houses are one story the design proposes a well balance transition of mass and heights.

The plans depict hardi board to be used as siding as well as aluminum railings, windows and doors. The main door will be wood impact and the infill between piers will be horizontal wood lattice. The roof will have metal v-crimp panels and the windows will have aluminum shutters. The applicant also included a proposed color scheme of a light teal for the walls with blue shutters and white trims. All windows and doors will have white frames and muntins; the front

door will be left natural color. A four feet picket fence with gates is proposed on the front.

### **Consistency with Guidelines**

1. The proposed new house will be sensible with the scale and massing than is found in the majority of neighboring structures. The proportions of the new structure will be similar found in traditional one and a half and two stories houses in Old Town.
2. Although the design is contemporary the applicant has made an interpretation of traditional forms and architectural elements that will be sensible to the historic urban fabric. The proposed structure will meet actual setbacks and will blend with existing historic architecture.
3. The proposed building materials are similar in textures as traditional ones.
4. The proposed swimming pool and deck will not be visible from the street.
5. The site is perceived as an empty lot since the existing house is approximately 75 feet setback from the sidewalk. The proposed new design will fill the urban façade much needed in that portion of Eaton Street.

It is staff's opinion that the proposed design is consistent with the guidelines. Contemporary designs are encouraged for infield as long as the proposal blends with the adjacent urban context. It is staff's opinion that the proposed design meets all guidelines for new construction, specifically mass, scale, proportions and design/materials compatibility. The proposed design is sensible to the urban context and will be harmonious to surrounding buildings.

**Re: Demolition Request- Certificate of no contributing value  
903 Eaton Street  
Key West, Florida 33040**

**Dear Enid,**

I am asking to have the existing one story CBS building at the rear of this site demolished. The building is not contributing but does show up on the 1962 San Born map. It has no historically significant features or history, has numerous non-historic additions and alterations and is a flat roofed box on the ground. It is two and a half feet below the flood elevation. It is located at the rear of the property so offers nothing to the streetscape.

The owners want to build a new residence, meeting all code requirements and HARC guidelines.

As per Sec. 102-125 the building does not meet the following 9 criteria:

1. Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction; the building does not have any distinctive characteristics of any kind or historic significance.
2. Is not specifically associated with events that have made a significant contribution to local, state, or national history; the building is not associated with any history, locally or otherwise.
3. Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state or nation, and is not associated with the life of a person significant in the past; the building has no character, interest or value in relation to anything.
4. Is not the site of a historic event with a significant effect upon society; the site did not have any historic events.

5. Does not exemplify the cultural, political, economic, social, or historic heritage of the city; the building is a plain vanilla box with no features so does not contribute to any type of heritage.
6. Does not portray the environment in an era of history characterized by a distinctive architectural style; the building has no stylistic features.
7. If part of or related to a square, park, or other distinctive area, nevertheless should not be developed or preserved according to a plan based on the area's historic, cultural, natural or architectural motif; the property is not related to or is a part of a square or common area.
8. Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood; the site is not a unique location and the building does not have any visual features related to the neighborhood and is the worst of the remaining architectural types.
9. Has not yielded, and is not likely to yield, information important to history; the site and the building has and never will yield any information important to history.

Sincerely

**WILLIAM P. HORN ARCHITECT, P.A.**
