Maria,

We are electrical contractors coming down to replace a faulty diesel base tank. This tank is located on the bottom of an existing life safety/emergency generator. The project is for Home Depot store #6313 located at 2811 N Roosevelt Blvd. We are currently scheduled to replace this tank on the evening of sept.12. The work window is set up for 9:00 pm - 1:00 am. We are requesting permission to make minimal noise during this time. The decibel level of the crane we will be using is 80db at 75'. All other noise related portions of this work will be conducted during standard working hours of 9:00 am - 7:00 pm.

Thanks for taking the time to help with this small technical issue and please let me know if you require any other information.

Matt Kalush

What needs to be done for this to go in front of Commission for September 6th? Or can we approve on staff level? Let me know what else I need to do. Thanks
