Major Development Plan**

Solid Waste

Please provide a site plan showing dimensions for the solid waste storage areas. Minimum dimension for dumpster enclosure is 20 feet wide with 12-foot-wide opening installed with two six-foot wide gates.

Enclosure and orientation of the gates to the roadway must be aligned to allow the licensed hauler truck access to the dumpsters. Location and orientation of the solid waste storage enclosures will need to be confirmed through Waste Management. Adjustment and/or relocation may be necessary.
