RE: Virginia Street Landscape  
Windsor Lane to Varela Street Right-of-Way Abutters Planting

Dear Doug:

As per the schematic landscape plan dated February 7, 2012 the estimate of probable cost I have prepared for the purchase, delivery, scheduling of installation and installation and of 16 trees for Virginia Street abutters by an outside vendor is \$10,780. Coordination with the abutters on plant material selection, location of plant material and scheduling will be by City staff. Labor for watering and maintenance would be provided by the abutters as well as the costs to mitigate any impacts to the abutter's property or existing plant material on the property as a result of the new tree installation. Please let me know if you require any additional information.

Sincerely,

Elizabeth Newland
