A separate and independent building sewer shall be provided for every building; except that where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, courtyard, or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer.

The owner of any house, building or property used for human occupancy, employment, recreation, or other purposes situated within the city and abutting on any street, alley, or right-of-way in which there is located or may be located a city public sanitary or combined sewer is required at his expense to install suitable toilet facilities therein and to connect such facilities directly with the proper public sewer in accordance with this article, as provided in section 74-100(b).

To wit: Per Count 1, existing sewer lateral at subject property is connected to neighbor's lateral connecting to the City's Sanitary system and is not directly connected as required by code.
