

Utilities Department

February 12,2024

Utilities received a complaint regarding the pending conditional use permit for 801 Eaton St. This business has one 1 yd garbage dumpster that is serviced 7 times a week and one 1 yd recycling dumpster that is serviced 3 times a week. The site was visited and attached are the photos from that visit. The DRC notes (attached pdf) indicated that gates were to be installed to shield the dumpsters from public view (see pre gate installation attachment obtained via google earth). The gates have been installed however the dumpsters are now left on the City right of way (in the street/no parking designated area).

Another solid waste concern observed were public use garbage and recycling receptacles were on the sidewalk (City right of way) of the Williams St side of the property. The receptacles are not City provided or maintained.

Please add these comments to the record regarding solid waste handling at the location.
