Subject: 522 Simonton - Carport delay request

Enid,

We have engaged a local architect to assist us with the carport. While working with him yesterday, we developed a number of potential changes to the design and location that might make the carport more palatable to you and the board.

We'd like to explore these design options with you before going back to the board. Given the way the scheduling works and where we are in the cycle, we'd like to postpone our board appearance for at least two, and more probably, three months to afford us time for a couple of meetings with you as well as (potentially) revising the plan.

Thank you for your understanding.

Sincerely,

Glenn
