

Staff Report

Historic Architectural Review Commission

Staff Report Item 9-a

Meeting Date: November 27, 2012

Applicant: Meridian Engineering

Application Number: H12-01-1851

Address: #525 Simonton Street

Description of Work: New addition to existing cottage

Guidelines Cited in Review: Additions, Alterations and New Construction (pages 36-38a), specific guidelines 1, 4 and height, mass, scale, proportion and site for new construction.

Staff Analysis

The existing two story main house is listed as a contributing structure. The proposed plan is for a one story addition to a single story structure located on the south side of the lot. A review of the 1948 and 1962 Sanborn maps evidences a one story frame structure used as a garage similar in footprint and location as the front portion of the building in question. Although the one story structure is setback from the street the surrounding buildings on the site and back are one and one and a half story structures. Large trees can also be seen of the site. The site is has license to operate 3 transient units.

The proposed plans depict the addition to be conforming to current setbacks although the actual building is a non-conforming structure. The zoning district where the building is located is HNC-1 and the restrictions are as follow;

Front yard- 5 feet
Side yard- 5 feet
Rear yard- 15 feet
Maximum height- 35 feet

The plans proposes an attached addition to the north side of the cottage made of wood with a gable roof covered with metal shingles and novelty siding. The proposed addition will be one story. For FEMA purposes the structure is located on an x flooding zone.

Consistency with Guidelines

1. The proposed addition will be small and will not be visible from the street. The addition will be done to a non-contributing structure.
2. The structures on the back and side are one and one and a half stories.
3. The proposed addition will be sensible in scale, mass and textures to the main house in the site, which is a contributing resource.

It is staff's opinion that the proposed design is consistent with the guidelines. The proposed addition is on the back of the lot and will be in character with the surrounding adjacent properties. The proposed design will be harmonious to the existing one story structure.
