Staff Report for Item 12

To: Chairman Bryan Green and Historic Architectural Review
Commission Members

From: Enid Torregrosa, MSHP
Historic Preservation Planner

Meeting Date: November 16, 2016

Applicant: Michael B. Ingram, Architect

Application Number: H16-03-0081

Address: #421-423 Simonton Street

Description of Work

Reconstruction of two front porches and front facades. Renovations to houses. Second story addition at rear of 421 Simonton. Site improvements including two pools and front fence.

Site Facts

The buildings in review are altered contributing structures to the Key West historic district. According to the Sanborn maps, both buildings were built between 1899 and 1911. In the late 1950's the two frame vernacular houses were irreparably altered, by the destruction of their two-story front porches and the construction of a two-story cbs structure in front of the buildings. Since the inappropriate alteration, portions of the buildings have commercial use and the rear of the buildings are used as dwelling units. The structures had also suffered modifications on their back, and sides, with the construction of several one and two-story additions as well as a side deck and stairs that were built between both structures.

At this point staff opines that the one-story sawtooth attached immediately to the rear of 421 Simonton Street was altered on its southeast corner. By observing the actual metal shingle roof that exhibits both, the sawtooth, and the rear addition, they both were built/ altered in the same period of time and after 1962.

Guidelines Cited on Review

- Secretary of the Interior's Standards for Rehabilitation (pages 16-23), specifically Standards 1, 2, 6, 9 and 10.
- Windows (pages 29-30), specifically guidelines 2 and 3.
- Shutters (pages 30-31), specifically guidelines 2 and 3.
- Entrances and porches (pages 32-33), specifically guidelines 5 and 7.
- Additions and alterations (pages 37a-37k), specifically guidelines 2, 5, 6, 7, 8, 14, 17, 19, 24, 32 and 33.
- Decks, pools (pages 39-40), specifically guidelines 3 and 4.

Staff Analysis

The Certificate of Appropriateness in review is for the rehabilitation of two historic frame vernacular structures that are extremely altered on their front and rear elevations. The proposed design includes the reconstruction of the front facades and front porches based on pictorial evidence. The front porches will have turned wood columns and balusters and it is the intent to recreate the gingerbread work that the twin houses used to have historically. The two-story new porches will have three bay and entrances to both houses will be on its original location. The plan also includes the repair and or replacement of deteriorated wood siding, repairs or replacement of louvered wood shutters and restoration of historic windows. Some historic windows found under the houses will be restored and re-use on exposed elevations.

Since there will be actual square footage that will be lost by the removal of the inappropriate front addition, the program requires a small addition over portion of the rear sawtooth located on 421 Simonton Street. Two existing window fenestrations at the rear of the house are boarded-up. The addition will be setback approximately 4' from the existing side wall; therefore, the profile of the one-story sawtooth will be kept on the north elevation. The new addition will have a front gable roof and its ridge will be approximately 2'-8" lower than the main house ridge. The footprint of the addition will be approximately 150 square feet. The proposed addition will have wood siding, three aluminum impact windows, and metal shingles as roofing finish.

The plan also includes a two feet tall front wall that will have an iron fence over it, not exceeding four feet tall. The iron fence will be black in color. The plan also proposes two pools at the rear of the lot and all mechanical equipment will be located at the back of the structures and lot. The front yard will have green areas.

Consistency with Guidelines

The proposed renovations and addition for the historic houses are consistent with all cited guidelines and with the Secretary of the Interior Standards and Guidelines for

Rehabilitation. The removal of the incompatible concrete front structure that destroyed historic fabric and the reconstruction of the front porches and main façades will bring back the splendor of the historic houses. The streetscape and urban block façade will also benefit of these proposed changes. The proposed rehabilitation of historic windows also complies with specific guidelines for such elements. Although the design proposes the removal of some historic fabric at the rear of one of the houses, staff opines that the overall proposed rehabilitation and what the historic houses and the streetscape will gain back makes the addition worth to be consider;

1. The proposed addition will keep portion of the profile of the sawtooth, leaving the form of the rear of the house as evidence of how that portion of the house used to be.
2. The proposed addition will be on the rear of the building, attached on a secondary elevation, and not visible from the street.
3. The proposed addition will not overshadow the main historic building or any surrounding structures.
4. The scale, mass, and proportions of the proposed addition will be compatible and harmonious with the historic fabric of the house and its adjacent surrounding buildings.
5. The size and height of the proposed addition will be lower than the main house and will read as a subordinated feature.
6. The proposed addition will be recessed from the side wall plane, and it will read as an addition and not part of the original fabric.

The proposed rear second floor attached addition design is sensitive to both, the historic house and site, as well as to the surrounding urban context. This addition will be attached only to the back of the existing historic house. The proposed rear addition does not mimic any specific building nor it outsizes any structure within the surrounding area.

The proposed pools, front fence and wall and site improvements are in keeping with cited guidelines. Bringing back the front facades and porches of these two houses is one of the main goals and principles of what historic preservation is all about; removing incompatible front additions and the rebuild of the urban façade based on pictorial evidence. In conclusion, staff opines that the proposed design complies with all cited guidelines and Secretary of the Interior's Standards and will not have an adverse impact to the actual historic fabric.

APPLICATION NUMBER H- H- 16 03 0001

This document applies only to those properties located within the City of Key West Historic Zoning Districts, properties outside the historic zoning districts which are listed as contributing in the Historic Architectural Survey and or properties listed in the National Register of Historic Places.

Applications must meet or exceed the requirements outlined by the Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitation and the Key West's Historic Architectural Guidelines. Once submitted, the application shall be reviewed by staff for completeness and scheduled for presentation to the Historic Architectural Review Commission for the next available meeting, unless the demolition request is for a *bona fide* Code Compliance case, in which case staff may review and approve the demolition request. **The applicant must be present at this meeting. Any person that makes changes to an approved Certificate of Appropriateness must submit a new application with such modifications.**

The filing of this application does not ensure approval as submitted. Applications that do not possess the required submittals or documentation will be considered incomplete and will not be reviewed for approval.

CRITERIA FOR DEMOLITIONS

Before any Certificate of Appropriateness may be issued for a demolition request, the Historic Architectural Review Commission must find that the following requirements are met (please review and comment on each criterion that applies):

- (1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the following criteria:
