Sketch location of tree (aerial view) including cross/corner street. Please identify tree(s) on the property regarding this application with colored tape or ribbon.

The Buttonwood tree is exhibiting significant signs of termite infestation, including multiple visible termite trails. Additionally, the tree has outgrown its designated space, which may pose further structural concerns.

The Mahogany tree is also outgrowing its area, and its root system is beginning to impact nearby structures. Notably, the roots are encroaching toward the foundation of both the primary residence and the neighboring property, which could lead to foundational damage if left unaddressed.

Tree Representation Authorization

Attendance at the Tree Commission meeting on the date when your request will be discussed is necessary in order to expedite the resolution of your application. This Tree Representation Authorization form must accompany the application if the property owner is unable to attend or will have someone else pick up the Tree Permit once issued.

Please Clearly Print All Information unless indicated otherwise.
