

Historic Architectural Review Commission Staff Report for Item 15

To: Chairman Haven Burkee and Historic Architectural Review
Commission Members

From: Daniela Salume, MFA
Historic Architectural Preservationist

Meeting Date: May 27, 2025

Applicant: Richard J. McChesney

Application Number: C2025-0041

Address: 620 Dey Street

Description of Work:

After the fact - Demolition of historic accessory structure in rear of property and removal of existing fence.

Site Facts:

The building under review is a historic and contributing structure to the historic district, built in 1890. The floor plan has an octagonal shape on the front of the building. The site includes the main two-story frame structure, a one-story frame structure at the rear which has been demolished and was over setbacks, and a pool with surrounding brick decking. Currently the house sits on piers and is located within an AE-6 flood zone.

Photo of property under review. Monroe County Library.

Photo of property under review. Real Property Record Card.

Photo of property under review 4/19/74. Monroe County Library.

Photo of property under review. Previous shed structure already demolished.

Photo of property under review. Under construction of new accessory structure.

Photo of property under review.

1962 Sanborn Map and current survey.

Ordinance Cited on Review:

- Section 102-217 (4), demolition for contributing and historic structures of the Land Development Regulations.
- Section 102-218 - Criteria for Demolition of the Land Development Regulations.

Staff Analysis:

The Certificate of Appropriateness includes after-the-fact demolition of a historic accessory structure located at the rear of the property, which was removed due to the presence of black mold. The application also proposes the removal of an existing concrete block knee wall with wood fencing above, totaling approximately 100 linear feet but no mention of the proposed design is included on the plans. In addition, the existing wooden fence on the east side of the main structure is proposed for demolition and will be replaced with a new 6-foot wood fence and gate, spanning approximately 13 linear feet.

Existing fence on east side to be demolished.

Photo of black mold found on accessory structure.

Elevation of shed (already demolished) with main structure.

It is staff's opinion that the request for this demolition shall be based on the demolition criteria of Chapter 102 Section 218 (a) of the LDR's. The criteria for demolition of historic structures state the following:

(a) The historic architectural review commission shall issue a certificate of appropriateness for an application for demolition:

- (1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration, or it does not meet any of the criteria of section 102-125(1) through (9).*

Elements proposed for demolition are historic, however, the structure had toxic black mold as seen on the photos provided.

The following is the criteria of section 102-125:

- 1 Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a*

significant and distinguishable building entity whose components may lack individual distinction.

Staff opines that the historic shed structure has no distinctive characteristics of a type, period or method of construction.

- 2 *Is not specifically associated with events that have made a significant contribution to local, state, or national history.*

It is staff understanding that no significant events have ever happened on the site relevant to local, state, or national history.

- 3 *Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state, or nation, and is not associated with the life of a person significant in the past.*

It is staff's understanding that the elements under review have no significant character and are not associated with the life of a significant person in the past.

- 4 *Is not the site of a historic event with a significant effect upon society.*

It is staff's understanding that the site is not associated with any significant event.

- 5 *Does not exemplify the cultural, political, economic, social, or historic heritage of the city.*

It is staff's understanding that the elements under review do not exemplify the cultural, political, economic, social or historic heritage of the city.

- 6 *Does not portray the environment in an era of history characterized by a distinctive architectural style.*

Staff believes that the existing building does not portray an era of history characterized by a distinctive architectural style.

- 7 *If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed, or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif.*

This is not the case.

- 8 *Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood; and*

The elements under review do not have a unique location or physical characteristics which represent an established and familiar visual feature of its neighborhood or of the city.

- 9 *Has not yielded, and is not likely to yield, information important in history.*

Staff believes that the elements under review are not likely to yield important information in history.

It is staff's opinion that the request for after-the-fact demolition may be considered, as the structures under review meet the criteria for demolition outlined in the guidelines. Specifically, the accessory structure was reported to contain toxic black mold, and photographs submitted by the applicant support the claim of hazardous interior conditions. However, staff emphasizes that demolition of a historic accessory structure, regardless of condition, should not have occurred without prior permits or approval. That said, the Commission can consider the application based on the facts presented and the condition of the structure at the time of removal. If approved, this will be the only required reading for demolition. Staff will review submitted construction plans for demolition and design to ensure consistency with submitted drawings.

---------------------------------------	--

DETAILED PROJECT DESCRIPTION OF DEMOLITION

This application is for the demolition of two structures on the property.

1. Demo of rear one story accessory structure. Subject outbuilding was a wood structure and found to have toxic black mold.
2. The second is an existing wall/fence that is being proposed for demolition.

CRITERIA FOR DEMOLITION OF CONTRIBUTING OR HISTORIC STRUCTURES:

Before any Certificate of Appropriateness may be issued for a demolition request, the Historic Architectural Review Commission must find that the following requirements are met (please review and comment on each criterion that applies):

- (1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the following criteria:

- (a) The existing condition of the building or structure is irrevocably compromised by extreme deterioration.

The accessory structure was ridden with black mold.

- (2) Or explain how the building or structure meets the criteria below:

- (a) Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction.

Although considered historic by age, the accessory structure is not original to the house and had no distinctive character defining

The fence does not meet HARC guidelines

Nothing in this application is intended to alter the authority of the Building Official to condemn for demolition dangerous buildings, as provided in Section 102-218 of the Land Development Regulations and Chapter 14 of the Code of Ordinances.

(b) Is not specifically associated with events that have made a significant contribution to local, state, or national history.
Neither the accessory structure nor the fence are associated with a significant event nor contribution.
(c) Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state or nation, and is not associated with the life of a person significant in the past.
Neither structure has significant character or value
(d) Is not the site of a historic event with significant effect upon society.
This location is not the site of historic event
(e) Does not exemplify the cultural, political, economic, social, or historic heritage of the city.
Does not apply to either structure
(f) Does not portray the environment in an era of history characterized by a distinctive architectural style.
Does not apply to either structure
(g) If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif.
Does not apply to either structure
(h) Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood.
Does not apply to either structure

Nothing in this application is intended to alter the authority of the Building Official to condemn for demolition dangerous buildings, as provided in Section 102-218 of the Land Development Regulations and Chapter 14 of the Code of Ordinances.

(i) Has not yielded, and is not likely to yield, information important in history,
Correct, neither structure is likely to yield important historical information

CRITERIA FOR DEMOLITION OF NON-CONTRIBUTING OR NON-HISTORIC STRUCTURES:
The following criteria will also be reviewed by the Historic Architectural Review Commission for proposed demolitions. The Commission shall not issue a Certificate of Appropriateness that would result in the following conditions (please review and comment on each criterion that applies):
(1) Removing buildings or structure that are important in defining the overall historic character of a district or neighborhood so that the character is diminished.
The accessory structure did not contribute in defining the over historic character of the neighborhood and therefore its replacement will not diminish the historic importance of the district.
The fence is new construction and therefor this does not apply.
(2) Removing historic buildings or structures and thus destroying the historic relationship between buildings or structures and open space.
Although historic by age, the accessory structure is not original to the primary home. As far as the relationship between the primary residence and the accessory structure, the new building replaces it within the same footprint.
The fence is not historic.
(3) Removing an historic building or structure in a complex; or removing a building façade; or removing a significant later addition that is important in defining the historic character of a site or the surrounding district or neighborhood.
This does not apply to either structure.
(4) Removing buildings or structures that would otherwise qualify as contributing.
Neither structure would qualify as contributing to the historic district.
