As a close neighbor to this property (owner of 1119 Watson St.), I really appreciate at how hard Eric and Joel have worked to greatly improve their property, referenced above. And by improving their property, they are improving the neighborhood and preserving much of the original character of this commercial area. Key West has a very historical and uniquely developed architecture. I feel that the proposed structures support that architecture and even re-purpose materials from original buildings.

I hope you can approve the next step in this property's development.
Thank you,
Linda Corra
