

1301 Whitehead Street Roof Deck & Accessory Building

August 1911

Early 1960s

Goal is to Renovate and Preserve Historical Elements

Before lifting

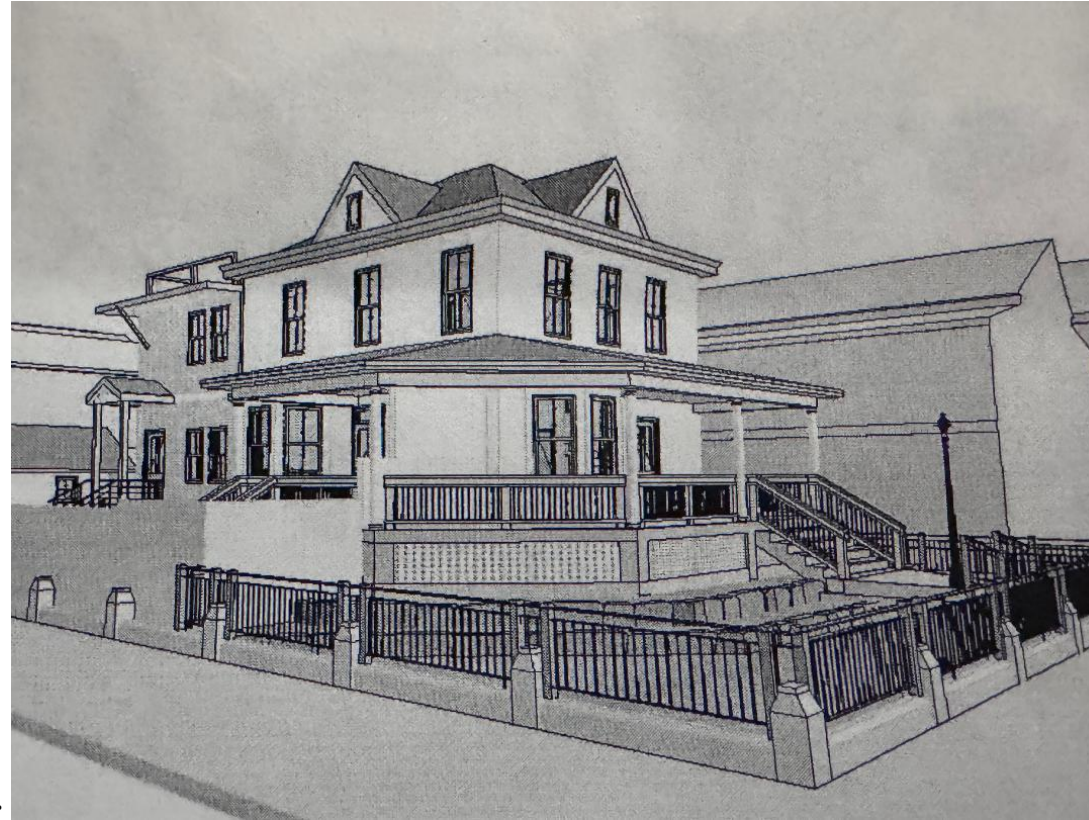

After Lift

1301 Whitehead

- Multiple HARC reviews (2016- 2025) with no identified historical issues with work done.

- Today's HARC Review:
 - Roof Deck Historical: Remains as is per its 50+ year history, update deck hatch, copper gutters, safety wire or wood 2x2 balusters
 - Accessory Building: move, elevate (HARC approved 2017) and use space under as a garage
 - Rear door gable
 - Use of metal Shingles for bay window, front porch, accessory bld. roof and rear door gable

Roof Top Deck & Roof

- Facts:
 - Roof top deck is historic.
 - Current roof-top deck in place, built in the late 1960/early 70s, Used for both cistern water maintenance and recreation (sunning, observation deck) Aerial Photo shows roof-top deck in place in 1975.
 - Renovation permit pulled for Flat Deck surface replacement in 1999, recreation use documented.
 - Currently on top of non-contributing new addition
 - 53 Percent of private homes (8 of 15) on block have roof top decks, Roof top deck at 1301 Whitehead is the only one that is historic! See Statement Mr. Rick Thompson, A+ Roofing
 - Construction typical of early 1970s & not particularly visually appealing
 - All three immediate neighbors support the flat roof being integrated into roofline and made more appealing
 - Key West Previous Building Director, Key West Fire Marshal Office, HARC Chairman & Mr. Robert Barns, my Professional Historical Architect and Engineer support the making it nicer and gutter integration, alas....
- Assumptions:
 - No variances needed for leaving it as is and making enhancements for safety, aesthetics and code.
 - Proposed changes do not impact the historical elements of the current flat roof
- Recommendation
 - Approve:
 - Stainless wire or balusters that is used throughout the home
 - hatchway remains on flat roof
 - Front Porch, Accessory roof, Bay window roof and door dormer using metal shingles.
 - Copper half moon gutters at north edge of flat deck & downspouts where currently installed.

Accessory Structure

- Facts:
 - Accessory structure too close to United Street, HARC approved moving (2017) requires elevation which provides opportunity to retain parking garage and still have a workshop/storage area.
 - All immediate neighbors concur with plans. Identical structure just construction at 403 South Street, completed at immediate neighbors at 408 & 406 United by integration into main building, all three homes on same block.
 - Clear HARC precedent established in immediate neighborhood.
 - Proposed construction meets all setbacks and lot coverages
 - No variances required.
- Assumptions:
 - No historical impact to home
 - Would enhance the visual elements of the home, structure is clearly subordinate to main structure/home
 - 1301 Whitehead home is about ½ the size of 406 United on same sized lot...focus is on historic landscaping and open area.
 - Removes current eyesore and improves neighborhood.
 - Provides suitable off-street parking
- Recommendation
 - Approve the proposed Accessory Structure
