## EXECUTIVE SUMMARY

**TO:** Bob Vitas, City Manager  
E. David Fernandez, Asst. City Manager – Operations

**FROM:** Jay Gewin, Utilities Manager

**DATE:** February 10, 2014

**RE:** **Acceptance and Execution of Contract No. 14HM-2V-11-54-02-xxx with the Florida Division of Emergency Management for \$2,454,440 (25% match) Phase II FEMA Funding for the East Front Street Drainage Project. Authorizing Necessary Budget Amendments or Transfers to Accept the Funding.**

### ACTION STATEMENT:

This resolution will accept and authorize the execution of a grant agreement with the Florida Division of Emergency Management (FDEM) to accept a \$2,454,440 Phase II FEMA grant that requires a 25% match (\$2,454,440 FEMA / \$818,146 City of Key West) for the construction of the East Front Street Drainage Project (Contract number 14HM-2V-11-54-02-xxx). Additionally, \$40,408 in administrative costs reimbursable to the City for eligible expenses (no City share required) is available in Phase II, increasing the Federal funding amount to \$2,494,848. This resolution will also authorize necessary budget amendments or transfers to accept the funding.

The last three digits of the contract number will be assigned by FDEM once the contract is executed.

### BACKGROUND:

Phase I FEMA funding was approved with Resolution 11-123 on May 3, 2011, which provided funding for the design of stormwater gravity wells for the East Front Street Drainage Project. There were four modifications to the Phase I grant agreement. Modifications 1 thru 3 extended the period of performance and Modification 4 increased the Phase I Federal funding amount. Phase I

MEMORANDUM

deliverables were submitted in time to meet the January 15, 2013 deadline and was funded at \$173,858 Federal / \$57,953 City share for a total Phase I amount of \$191,031. The City incurred administrative costs of which up to \$5,636 are reimbursable (no City share required).

With the approval of Task Order 12-02 (Resolution 12-036, January 18, 2012), Perez Engineering and Development, Inc. designed stormwater gravity wells for the East Front Street Drainage Project. A change order to Task Order 12-02 was approved for additional Engineering Services to modify the design to include the replacement of an existing outfall and replacement of Duval Street inlets (Resolution 12-200, June 19, 2012). This design was reviewed and approved by FEMA resulting in the obligation of Phase II funding for the construction of the approved project. The East Front Street Drainage Project design includes five (5) stormwater wells at these locations:

- Angela Street between Simonton Street and Duval Street
- Simonton Street Eaton Street and Fleming Street
- Fleming Street at Bahama Street
- Eaton Street at Bahama Street
- Whitehead Street between Greene Street and Caroline Street

The design also includes the replacement of the 12" Front Street outfall that is in poor condition that runs underneath the Aquarium Building with a new upsized 24" outfall terminating at Mallory Square, replacement of 31 small inlet tops on Duval Street with larger ones designed to capture more of the water flow, and triple chamber treatment boxes at each well to pretreat stormwater.

#### **PURPOSE AND JUSTIFICATION:**

With Phase I design complete, FEMA has approved Phase II funding for construction. The East Front Street Drainage Project will protect surrounding properties and infrastructure from future localized flooding and pretreat stormwater run-off. It will significantly increase our ability to recover from torrential rains.

A public meeting was held on February 10<sup>th</sup> at Old City Hall to discuss the project with local residents and businesses. Our community is generally understanding of the need to improve the drainage of the East Front St. stormwater basin, and desires the construction to be completed in a timely manner with as much work as possible taking place off the traditional "tourist season". The City is committed to continuing our dialogue with our residents and businesses, and will meet again as construction nears for each segment of the project. We have also created an e-mail list so that we can keep everyone updated on the progress of the project.

The City of Key West's Stormwater fund is heavily grant-dependent. The fund has been very aggressive and successful at pursuing state and federal grants over time, and many of our improvements would not be possible without grant assistance.

**OPTIONS / ADVANTAGES / DISADVANTAGES:**

1. The City Commission can accept and authorize the execution of the Phase II contract. This will allow the East Front Street Drainage Project to move forward. Without the grant funding, the proposed project cannot be accomplished with available resources unless other projects are set aside and funds are transferred from other City accounts.
2. The City Commission can reject the Phase II contract. With this option, no grant funding will be available for this project. The East Front Street Drainage project will not be constructed and the surrounding properties and infrastructure will not be protected from future localized flooding. In addition, stormwater run-off in the area will not be pretreated.

**FINANCIAL IMPACT:**

Funds will be deposited into the Stormwater fund revenue account 402-0000-331-51-01 / ST1201. Project costs are budgeted in expense account 402-3802-538-65-00 / ST1201.

Funding for this project was based on the City's construction estimate for this project. The percentage breakdown is as follows:

FEMA/FDEM Share (75%)-	\$2,454,440
<u>City Stormwater Utility Match (25%)-</u>	<u>\$ 818,146</u>
TOTAL -	\$3,272,584

The City also budgeted an additional \$200,000 to this figure to cover any unanticipated costs relating to the project. These unanticipated costs are eligible for potential reimbursement at a 75% rate should FDEM agree that they are directly related to the construction of the project as per plan and FEMA funding is available.

**RECOMMENDATION:**

Staff recommends that the City Commission select option 1, accepting the Phase II contract with the Florida Division of Emergency Management for the East Front Street Drainage Project.

**Budget and Scope of Work**

**Statement of Purpose**

The purpose of this scope of work is to implement the Phase II the City of Key West East Front Street Drainage Project funded through the Hazard Mitigation Grant Program (DR-1539-047-R), as approved by the Division and the Federal Emergency Management Agency (FEMA). The project will protect the surrounding properties and infrastructure from future localized flooding. The City of Key West agrees to administer and complete the project per sealed engineered designs and construction plans as submitted by the recipient and subsequently approved by the Division and FEMA. The recipient will complete the work in accordance with all applicable federal, state and local laws, regulations, and codes.

**Project Overview**

As a Hazard Mitigation Grant Program, the Recipient, City of Key West, will construct a drainage system to alleviate flooding in the area of East Front Street in the City of Key West. The work will include the construction of five (5) stormwater gravity injection wells, a new 24-inch outfall and also treatment boxes, catch basins with inlets, approximately 2,300 linear feet of storm pipe and incidental work to provide a complete and serviceable drainage project.

**Tasks**

**Task 1**

The recipient shall procure the services of a qualified and licensed Florida contractor and execute a contract with the selected bidder to complete the scope of work as approved by the Division and FEMA. The recipient shall select the qualified, licensed Florida contractor in accordance with the recipient's procurement policy as well as all federal and state laws and regulations. All procurement activities will contain sufficient source documentation and be in accordance with all applicable regulations.

The recipient shall be responsible for furnishing or contracting all labor, materials, equipment, tools, transportation and supervision and for performing all work per sealed engineering designs and construction plans presented to the Division by the recipient and subsequently approved by the Division and FEMA.

The recipient and contractor shall be responsible for maintaining a safe and secure worksite for the duration of the work. The contractor shall maintain all work staging areas in a neat and presentable condition.

The recipient shall ensure that no contractors or subcontractors are debarred or suspended from participating in federally funded projects.

The selected contractor shall have a current and valid occupational license/business tax receipt issued for the type of services being performed.

**Task 2**

The recipient shall monitor and manage the installation of improved drainage infrastructure in the area of East Front Street Drainage system in accordance with sealed engineering designs and construction plans presented to the Division by the recipient and subsequently approved by the Division and FEMA. The recipient shall ensure that all applicable state, local and federal laws and regulations are followed and documented, as appropriate.

The project will improve the East Front Street drainage system in Key West, Florida to reduce flooding and pre-treat stormwater run-off. The project consists of the general construction and furnishing of all materials, equipment and labor for the construction of five (5) stormwater gravity injection wells, abandonment of an existing outfall, and a new 24-inch outfall; including but not limited to; triple chamber treatment boxes, storm sewer pipe, catch basins with inlets, concrete/asphalt pavement removal & replacement, earthwork, dewatering, silt removal boxes for approved dewatering discharges, utility adjustments, utility conflict boxes, environmental protection, site restoration, sidewalk improvements, site cleanup, and all necessary appurtenances and record drawings, surveys, well testing, and incidental work to provide a complete and serviceable project.

Each well system is expected to contain a multi-chamber sediment and petroleum removal system, 4 catch basins, one 90-foot deep cased well and re-grading of the intersection to collect all water flow and ensure compliance with the Federal Americans with Disabilities Act (ADA) (as it relates to the construction of curb inlets). An additional component to the project is the injection of hydraulic grout around the existing piping system below 3-foot elevation to ensure a water tight system.

Construction activities will be completed by a qualified and licensed Florida contractor. All construction activities will be monitored by a qualified engineer. The recipient must complete the project in accordance with all required permits.

Upon completion of the work, the recipient will schedule and participate in a final inspection of the project by the local building official or local approving official, if applicable. Any deficiencies found during this final inspection will be corrected by the recipient prior to recipient's submittal of the final inspection request to the Division.

### Task 3

During the course of this agreement the recipient is required to submit requests for reimbursement. Adequate and complete source documentation is required to be submitted to support all costs (federal share and local share) related to the project. In some cases, all project activities may not be fully complete prior to requesting reimbursement of costs incurred in completion of this scope of work; however, a partial reimbursement may be requested.

The recipient is required to submit an Affidavit signed by the recipient's project personnel with each reimbursement request attesting to the completion of the work, disbursements or payments were made in accordance with all agreement and regulatory conditions, and that reimbursement is due and has not been previously requested.

The recipient must maintain accurate time records. The recipient must ensure invoices are accurate and any contracted services were rendered within the terms and timelines of this agreement. All supporting documentation must agree with the requested billing period. All costs submitted for reimbursement must contain adequate source documentation which may include but not be limited to: cancelled checks, bank statements, electronic funds transfers, paid bills and invoices, payrolls, time and attendance records, contract and subcontract award documents.

The Division will review all submitted requests for reimbursement for basic accuracy of information. Further, the Division will ensure that no unauthorized work was completed prior to the approved project start date by verifying vendor and contractor invoices. The Division will verify that reported costs were incurred in the performance of eligible work, that the approved work was completed, and that the mitigation measures are in compliance with the approved scope of work prior to processing any requests for reimbursement.

Review and approval of any third party in-kind services, if applicable, will be conducted by the Division in coordination with the recipient. Quarterly reports must be submitted by the recipient and received by the Division at the times provided in this agreement prior to the processing of any reimbursement.

**Construction Expense:** The recipient will pre-audit bills, invoices, and/or charges submitted by the contractors and subcontractors and pay the contractors and subcontractors for approved bills, invoices, and/or charges. Recipient will ensure that all contractor/subcontractor bills, invoices, and/or charges are legitimate and clearly identify the activities being performed and associated costs.

**Administrative Expenses:** The recipient shall pre-audit source documentation such as payroll records, project time sheets, attendance logs, etc. Documentation shall be detailed information describing tasks performed, hours devoted to each task, and the hourly rate charged for each hour including enough information to calculate the hourly rates based on payroll records. Employee benefits must be clearly shown.

### **Deliverables**

#### **Deliverable 1**

The recipient will provide documentation demonstrating the results of the procurement process. This will include a rationale for the method of procurement and selection of contract type, contractor selection and/or rejection and bid tabulation and listing, and the basis of contract price.

The recipient will provide an executed "Debarment, Suspension, Ineligibility, Voluntary Exclusion Form" for each contractor and/or subcontractor performing services under this agreement.

Executed contracts with contractors and/or subcontractors will be provided by the recipient.

The recipient will provide copies of professional licenses for contractors selected to perform services. The recipient shall provide a copy of a current and valid occupational license or business tax receipt issued for the type of services to be performed by selected contractor.

2. Proof of payment from the recipient to the contractor, subcontractor, and/or vendor for invoiced services.

3. Clear identification of amount of costs being requested for reimbursement as well as costs being applied against the local match amount.

The recipient's final request for reimbursement should include final construction project cost. Supporting documentation must show that all contractors and subcontractors have been paid.

#### Financial Consequences

If the City of Key West, fails to comply with any term of the award, the Division may take one or more of the following actions, as appropriate in the circumstances:

3. Wholly or partly suspend or terminate the current award for the recipient's program;
4. Withhold further awards for the program; or
5. Take other remedies that may be legally available.

#### Additional Performance Requirements and Project Conditions

1. If the City of Key West is not the current title holder of any affected properties, the city must provide documentation confirming property acquisition and easement rights were obtained voluntarily. If condemnation or eminent domain is used to obtain easement rights, FEMA will not pay for any associated costs or payments to the property owner. Furthermore, FEMA will not consider it an eligible contribution to the non-Federal cost share requirement and will not financially participate in that component of a project if land or easements are obtained involuntarily.
2. The Recipient must follow all applicable state, local and federal laws regulations and requirements, and obtain (before starting project work) and comply with all required permits and approvals. Failure to obtain all appropriate federal, state, and local environmental permits and clearances may jeopardize federal funding. If project work is delayed for a year or more after the date of the categorical exclusion (CATEX), then coordination with and project review by regulatory agencies must be redone.
3. Any change, addition or supplement to the approved Scope of Work that alters the project (including other work not funded by FEMA, but done substantially at the same time), regardless of the budget implications, will require re-submission of the application to FEMA through the Florida Division of Emergency Management (FDEM) for National Environmental Policy Act (NEPA) re-evaluation before starting project work.
4. If project activities involve the disturbance on street/roads comprised of historic paving material, i.e., brick, stone or stone curbs, additional information must be provided to the FDEM , FEMA, and the Florida Division of Historical Resources regarding the affected area(s) and anticipated scope of work to be undertaken prior to commencing with the project. Work may not proceed until the FDEM has completed consultation with the State Historic Preservation Office (SHPO), FEMA, and other interested consulting parties.
5. If ground disturbing activities occur during construction, Recipient will monitor ground disturbance and if any potential archeological resources are discovered, will immediately cease construction in that area and notify the FDEM and FEMA.
6. If human remains or intact archaeological deposits are uncovered, work in the vicinity of the

discovery will stop immediately and all reasonable measures to avoid or minimize harm to the finds will be taken. The Recipient will ensure that archaeological discoveries are secured in place, that access to the sensitive area is restricted, and that all reasonable measures are taken to avoid further disturbance of the discoveries. The Recipient's contractor will provide immediate notice of such discoveries to the Recipient. The Recipient will notify the Florida Division of Historical Resources, the FDEM and FEMA through the FDEM within 24 hours of the discovery. Work in the vicinity of the discovery may not resume until the FDEM has completed consultation with FEMA, SHPO, Tribes, and other consulting parties as necessary. In the event that unmarked human remains are encountered during permitted activities, all work shall stop immediately and the proper authorities notified in accordance with *Florida Statutes, Section 872.05*.

7. At closeout, verification of compliance shall be provided for the South Florida Water Management District (SFWMD) permits # 44-00535-W dated 05/06/2013 expiring 05/06/2015 and # 44-0536-P dated 05/21/2013 expiring 05/21/2018.
8. Recipient must obtain floodplain permit from the local floodplain administrator before work begins. Verification of compliance will be required at project closeout (i.e.: letter stating the project is in compliance with local ordinances, etc.)
9. Verification of compliance with the US Army Corps of Engineers (USACE) Nationwide Permit shall be provided at closeout.
10. Recipient must coordinate with local floodplain administrator to assure compliance with local regulations. Documentation of this coordination or permitting shall be provided at closeout.
11. Best management practices will be used during project work to minimize soil erosion, sediment migration and turbidity. A National Pollutant Discharge Elimination System (NPDES) stormwater permit must be obtained (if area of disturbance will be greater than one acre). The Recipient will need to prepare and implement a Storm Water Pollution Prevention Plan (SWPPP). A copy of the Notice of Intent (NOI) submitted to use the State of Florida Generic Permit for stormwater discharge from construction activities; response letter from Florida Department of Environmental Protection (FDEP) if provided; and a copy of the Notice of Termination (NOT) must be submitted at project closeout.
12. For projects involving groundwater dewatering activities at the construction site, provide documentation of coverage under the Florida Department of Environmental Protection (FDEP) "Generic Permit for the Discharge of Produced Ground Water from any Non-contaminated Site Activity."
13. Construction vehicles and equipment used for this project shall be maintained in good working order to minimize pollutant emissions.

The Recipient further acknowledges that FEMA may require the Recipient to take all reasonable measures to avoid or minimize harm to such property until FEMA concludes consultation with the SHPO.
