Mayor and Commissioners

I'm all for increasing the number of transportation licenses to help better serve our community and our visitors. That being said, our effort cannot just stop there.

We have to adopt the next generation of public transportation solutions. That means re-writing our transportation ordinance to include the current wave and future developments in ride share technologies. Our City Attorney should be directed to work in concert with the County Attorney in crafting this law. It would be a mistake to allow Tallahassee to develop this for us. We need our own unique solution and the time is now.

Ride share technology is the future. It is currently being used in hundreds of communities worldwide. We just adopt current best practices and step into the now rather than linger in the past.

Our residents deserve this, our visitors expect this and if we keep kicking this can down the road we will be making a monumental mistake.

**Sincerely,
Richard Tallmadge**
