

Historic Architectural Review Commission Staff Report for Item 6a

To: Chairman Bryan Green and Historic Architectural Review
Commission Members

From: Kelly Perkins, MHP
HARC Assistant Planner

Meeting Date: December 15, 2015

Applicant: William Shepler/Meridian Engineering

Application Number: H15-01-1540

Address: #818 Sawyers Lane

Description of Work:

Relocation and rehabilitation of eyebrow house and new rear addition. New pool and site improvements.

Site Facts:

The house located at 818 Sawyers Lane is listed as a contributing resource to the historic district. The eyebrow house first appears on the 1889 Sanborn maps. The building is unique in that the house is not oriented towards the street. The north elevation of the building, which is its side, is the primary elevation facing Sawyers Lane. The house is currently in very poor condition. The rear of the main roof has been altered, with the roof expanded to create a second floor. There is a one-story non-historic addition on the rear of the contributing structure.

The one-story, cbs building located at 822 Sawyers Lane first appears on the 1962 Sanborn map, making it historic. It is also similar to 818 Sawyers Lane in that it is oriented towards the north and not towards any road. It is an interior lot with only a walkway to Robert's Lane.

Part of this project is to redraw the lot lines, changing the lots so that they face Robert's Lane. They will received this approval from the Planning Department once the

Commission approves the relocation of the eyebrow house and the demolition of the structure at 822 Sawyers Lane.

Ordinance and Guidelines Cited in Review:

Sections 102-251 and 102-252 of the Land Development Regulations.

Secretary of the Interior's Standards and Guidelines for Rehabilitating Historic Buildings, specifically Building Site (pages 31-33) and District Neighborhood (pages 34-35).

Additions and Alterations/New Construction (pages 36 to 38a), specifically guidelines 1, 3, 4, 5, 7, and 8 for additions and alterations and guidelines 2, 3, 4, and 5 for new construction.

Staff Analysis

The Certificate of Appropriateness proposes the relocation of an eyebrow house from its original orientation to another part of two lots owned by the same owner. The relocation of the eyebrow house will change its orientation that it will now be facing Robert's Lane. The house will be elevated approximately 2.5 feet, with a new two and a half story addition constructed in the rear with a one-story connector.

The proposed eyebrow will be raised from 21 feet, 4 inches to 23 feet, 9.5 inches. Renovations to the house include new wood, true divided light windows, a new porch with wood railings, repaired or replaced posts on the front porch, a new front door, new wood lap siding, new foundations and lattice, and new stairs and railings.

A new two and a half story addition will be built behind the historic house with a one story connector. The new addition will have a height of 29 feet, 10 inches, approximately 6 feet taller than the elevated eyebrow house. The new addition will have a traditional design with contemporary elements, such as aluminum impact windows, balconies on three sides, and a v-crimp roof.

Site work includes a new fence, pool, and rear deck.

Consistency with the Guidelines and Ordinances

Relocation

The current Ordinance for relocation of historic buildings or structures in the historic districts focus more on the removal of a historic structure from its original lot rather than relocating the building in its the same parcel or context. Under Section 102-252 Requirements precedent to relocation states the following; ...“The historic architectural review commission shall not issue a certificate of appropriateness for relocating a historic building or structure unless the historic architectural review commission renders a finding that the applicant has submitted a relocation plan demonstrating that the proposed

relocation satisfies the following criteria”... The following criteria below should be considered for this project:

- (1) *“The built environment for the new site should be similar to the old one in terms of context, the age of the surrounding buildings, their height, materials, setback, and architectural details.”*

The building has been in that location, with that orientation, for over 100 years. The new orientation will differ in its setback, but most of the context will remain, as the structure is only moving to a different location on these two lots.

- (2) *“The historic relationship between buildings and streetscape and landscaped features must be maintained.”*

This proposed relocation will alter the contributing building’s relationship with the neighboring buildings and the streetscape. The urban context has changed greatly from when the eyebrow house was originally constructed.

- (4) *“The relocated building must be placed so that the orientation of its principal facade and front and side setbacks are compatible with surrounding buildings.”*

- (9) *“Improperly locating a building on its new site so that its orientation and front and side setbacks are incompatible with surrounding buildings is prohibited.”*

Currently, no buildings face Robert’s Lane. The structures surrounding the eyebrow house on Robert’s or Sawyers Lane are oriented in a north-south fashion.

Staff opines that the relocation of the existing eyebrow house will violate numbers 1, 2, 4, and 9 in the ordinance for relocation. While the historic urban context has greatly changed over the years, the new orientation of 818 and 822 Sawyers Lane will not be comparable to the surrounding buildings.

Renovations and Elevations to Main House

The applicant also proposed to raise the house 2.5 feet from its existing height. Our guidelines state that elevation can be considered if the applicant demonstrates that “such elevation does not interfere with the essential form and integrity of properties in the neighborhood.” This case is unusual as the relocation will change the neighboring buildings to use for context. The proposed Roberts Lane streetscape includes a one-story commercial building, the large structure at 822 Sawyers Lane, and a neighboring one-story structure that is not located on Robert’s Lane, but is an interior lot where the building is not oriented in the same direction (it orients towards the east, where the proposed Sawyers Lane properties will be oriented towards the west). Currently, 818 Sawyers Lane does not have much interaction with either of these structures from a ground floor level perspective. Therefore, the application to raise the building is compliant with the guidelines, as the proposed elevation will not affect the form and integrity of the neighboring properties.

The renovations proposed to the main house are also consistent with the guidelines. The house is currently in very poor condition, where one side of the building does not have siding, the posts are located on cinderblocks, and the house has chains tying the front portion together. The proposal will help stabilize, protect, and return the house to a more appropriate form.

Addition

In addition to the relocation, elevation, and renovation to the main house, the applicant is also proposing to add a new addition to the one and a half story structure. The one-story connector is appropriate for the eyebrow house, but the two and a half story addition is far too massive compared to the eyebrow house. The guidelines state that additions should be constructed with a scale, height, and mass that is appropriate to the *original* building and its neighbors. The proposed addition fails all three of these standards. It is staff's opinion that the proposed addition is too massive, too tall, and out of scale with the historic house and its neighbors.

Alteration to 822 Sawyers Lane (what will be 818 Sawyers Lane if the eyebrow house is relocated)

The proposed project also includes removing all of existing 822 Sawyers Lane, with the exception of the portion that is on 310 Margaret Street. That portion, which is almost 14 feet, will be braced on the rear of 818 Sawyers Lane. Staff believes that leaving a remnant of a building is inappropriate for the historic district. Not only will part of the building remain, but any character-defining features that exist will be removed, so that the remnant will have no context. The remnant will also lose its symmetry and balance. Therefore, the proposed alteration is inconsistent with guidelines.
