

RECYCLE PLAN FOR ST. PATRICK'S DAY SPECIAL EVENT
MARCH 17, 2011

This year, as every year in the recent past, Finnegans will hire Mike Basham from TRASHED in The Keys, as our Recycling Coordinator for our Irish Heritage St. Patrick's Day celebration.

We will use recyclable plates, bowls, cups and cutlery made from sugar, corn, ecoplastic or co2 neutral plastic depending on the product. These items are purchased from TRASHED in The Keys.

Mike Basham provides recycling bins for these items as well as separate bins for glass, paper and aluminum which he labels appropriately. He brings his own RECYCLE cart which has a large recycle sign displayed on top as well as large visible signs on each bin. Mike and Jean Dillon make frequent rounds of the crowd to make known where all items should be discarded. .
Signs and recycle bins are placed at point of purchase location for food and beer as well as near the tables where the guest are eating and drinking.

Mike empties the containers during the event into the larger container for those items that Waste Management removes and into his own truck for those items that he removes and recycles as part of his contract with us. Liner bags are used as necessary in the smaller containers for easy, frequent removal and emptying.

We have a bottle crusher for the glass beer bottles which product is disposed of along with the cardboard pursuant to the ongoing contract that we have with Waste Management.

We will also have a 6 yard front load dumpster delivered the morning of the event which is arranged the week before. Our physical plant manager, Chip Burnett makes the arrangements with Waste Management for the dumpster.

We have provided photos in past years of the operation and those photos show what is referenced above.

Respectfully submitted,

Jean Star Dillon
