

**Historic Architectural Review Commission
Staff Report for Item 3**

To: Chairman Bryan Green and Historic Architectural Review
Commission Members

From: Enid Torregrosa-Silva MSHP
Historic Preservation Planner

Meeting Date: May 28, 2019

Applicant: Allied General Contractors- Carlos Rojas, Architect

Application Number: 2019-0657

Address: #1216 Packer Street

Description of Work:

Demolition of above ground cistern. Second Reading

Site Facts:

1216 Packer Street is listed as a contributing resource in the survey. The building, as well as a rear cistern, first appears on the 1912 Sanborn map. The 1962 Sanborn map indicates that cistern might have been demolished as it was scratched out. It is evident that the existing cistern in the rear yard is historic and is in the same place as the old cistern on the Sanborn maps. Staff believes this is an error on the 1962 Sanborn map.

Ordinance Cited on Review:

Section 102-217 (3), demolition for contributing and historic structures of the Land Development Regulations for the concrete cistern.

Staff Analysis

This report is for the second reading review of the proposed demolition of an above ground historic cistern.. The Sanborn maps from 1912 through 1962, depict a cistern on the rear yard of the property. Even though the 1962 Sanborn map has the cistern etched out, staff believes this is the

same structure, due to the age of the concrete. Therefore, staff will consider this structure to be a historic resource.

It is staff's opinion that the request for the proposed demolition of the above-ground cistern should be reviewed based by the demolition criteria of Chapter 102 Section 218 of the LDR's. The criteria state the following;

(a) The historic architectural review commission shall issue a certificate of appropriateness for an application for demolition:

(1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the criteria of section 102-125(1) through (9).

The structure in question is not irrevocably compromised by extreme deterioration. There are some cracks throughout the structure.

The following is the criteria of section 102-125:

1. Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction;

Staff opines that the structure has no distinctive characteristics of a type or method of construction. The structure was built for a utilitarian purpose and does not possess any architectural features.

2. Is not specifically associated with events that have made a significant contribution to local, state, or national history;

It is staff understanding that no significant events have ever happened in the site that has contributed to local, state, or national history.

3. Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state or nation, and is not associated with the life of a person significant in the past;

The structure in question has no significant value as part of a development, heritage, or cultural record of the city.

4. Is not the site of a historic event with a significant effect upon society;

The site is not associated to any significant event.

5. Does not exemplify the cultural, political, economic, social, or historic heritage of the city;

The structure in question is not an example of any social, cultural, or historic heritage of the city.

6. *Does not portray the environment in an era of history characterized by a distinctive architectural style;*

The structure in question is not an example of a distinctive architectural style.

7. *If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif;*

The structure in question is not part of a park, square or distinctive area in the city.

8. *Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood; and*

The structure in question does not exemplify a remaining architectural type in its neighborhood and does not possess any significant visual features. There are other historic aboveground cisterns that would be considered better remaining examples.

9. *Has not yielded, and is not likely to yield, information important in history.*

The structure in question may yield some information in history, but is not the best example of its kind.

In conclusion, it is staff's opinion that the Commission can consider the request for demolition proposed in the plans as it meet the terms of the criteria for demolition stated under the Land Development Regulations.

If the Commission approves the demolition of the above-grade cistern, this will be the last of the two required readings.
