## Historic Architectural Review Commission Staff Report for Item 14

To: Chairman Haven Burkee and Historic Architectural Review  
Commission Members

From: Enid Torregrosa-Silva, MSHP  
Historic Preservation Planner

Meeting Date: November 29, 2022

Applicant: Robert Delaune, Architect

Application Number: H2022-0049

Address: 910 United Street

### **Description of Work:**

New accessory structure and pool. Site improvements.

### **Site Facts:**

The principal building in the site is listed as a contributing resource to the district. The one and a half-story frame vernacular house was built circa 1910. The double lot sits on the southeast corner of Elizabeth and Olivia Streets. The south portion of the lot has never been developed except for the current carport build in the 1990's. Dense vegetation shields the carport and south elevation of the house from street view.

*Aerial 1972.*

*Aerial 1994 showing carport.*

*Aerial photograph of the site under review.*

### **Guidelines Cited on Review:**

- New Construction (pages 38a-q), specifically guidelines 1, 2, 3, 6, 11, 12, 13, 18, 22, and 23.
- Decks, patios, hot tubs, spas, pools, and related equipment (pages 39a), specifically first paragraph and guidelines 2 and 3.
- Outbuildings (page 40), specifically guidelines 1, 3, 4, and 9.
- Fences (pages 41-42), specifically guidelines 1, 3, 4, 6, 9, and 10.

### **Staff Analysis:**

The Certificate of Appropriateness under review proposes a new accessory structure that will be located on the vacant portion of the lot. The one-story frame structure will be rectangular in footprint and will be setback from Elizabeth Street approximately 18'. The new structure will have a shed roof and its height will align with the existing front porches of the main house and house towards the south. The structure's front elevation will consist of four 6" by 6" posts that will create three bays and will be covered with wood louvers between them. The south side of the structure may also have wooden louvers. The shed roof will be covered with metal 5 v-crimp panels.

The plan also includes an in-ground concrete pool 18' by 12' that will be located behind the pool cabana. A new brick parking driveway is proposed at the front of the new accessory structure. A six-foot-high wood picket fence is proposed between the southern corner of the new accessory structure and the existing south perimeter fence.

### **Consistency with Cited Guidelines:**

It is staff's opinion that the proposed new accessory structure, pool, and site improvements all meet cited regulations. The scale, size and building form of the proposed accessory structure is harmonious and compliments the principal historic house. The location of the accessory structure will give an urban façade to Elizabeth Street while hiding the proposed pool from public view. The architect made all efforts to protect the large mango tree and root system found in the site. Although this is a corner lot and the main house has no room behind it for a pool, staff finds this design an appropriate solution that complies with HARC new regulations for pools.
