**To:** Acting Chairman Greg Oropeza and Historic Architectural Review Commission Members

**From:** Enid Torregrosa Silva, MSHP  
Historic Preservation Planner

**Meeting Date:** January 23, 2023

**Applicant:** Bender & Associates Architects

**Application Number:** H2023-0054

**Address:** 621 Catholic Lane

### **Description of Work:**

Renovation to existing house and new additions at rear. New accessory structure, pool, and site improvements.

### **Site Facts:**

The site under review contains a principal structure with a shed attached to its northeast wall. The principal structure on the site is listed as a contributing resource to the historic district. The one and a half-story house was built circa 1889. Many additions have been done to the side gabled house including a full wide shed addition at the rear gable. Rear additions, wider than the original house were done as well as a rear covered porch. Exterior stairs were added on the north elevation for access to the attic space and roof deck. The historic configuration of the house at its rear, with a porch facing south, has been lost. This building was the house of Author Evan H. Rhodes, a noted Key West based author born in New York. One of his novels, The Prince of central Park, was adapted into a Broadway musical and a feature length film.

*Building under review circa 1965.*

*Front elevation.*

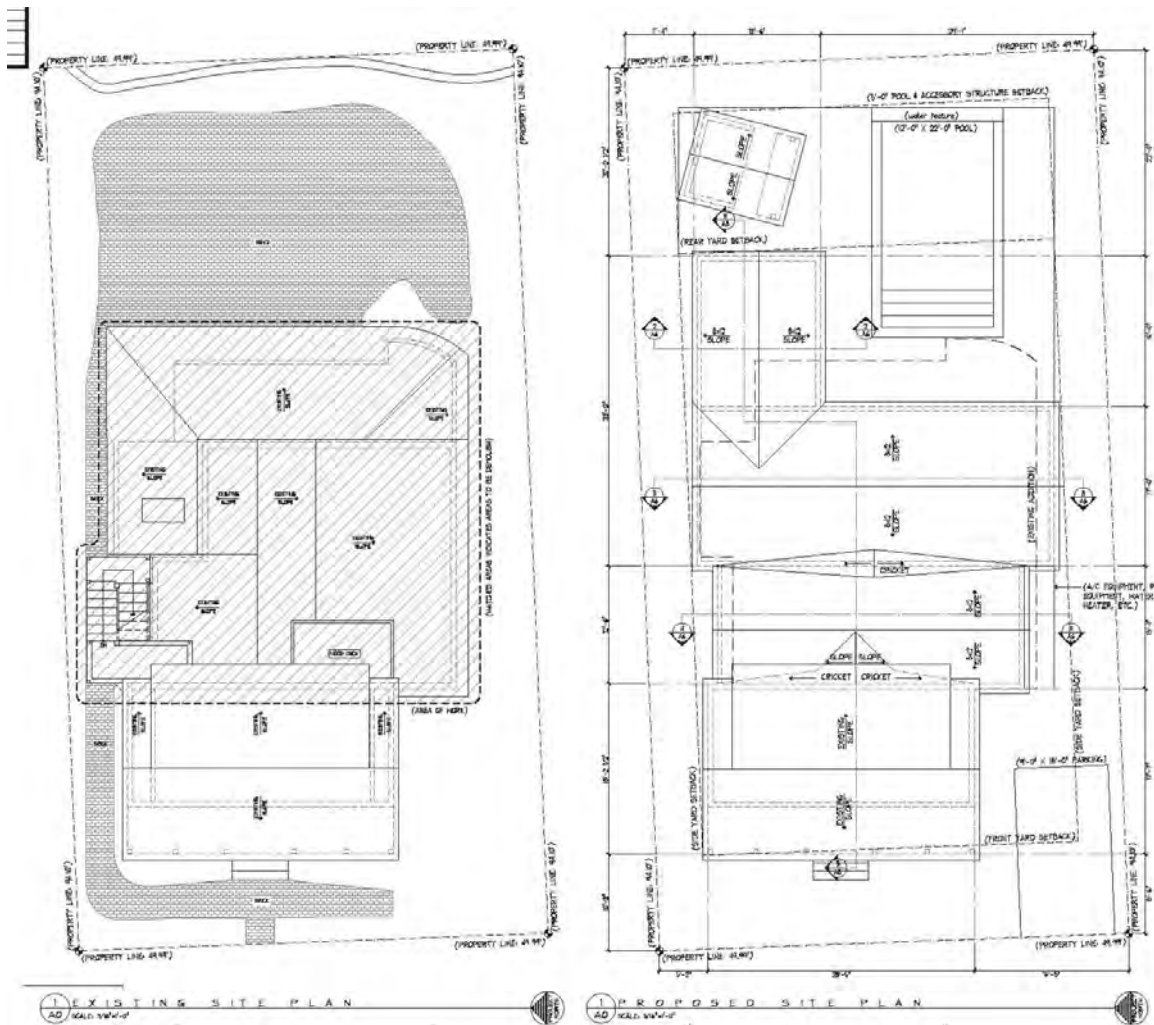

*1962 Sanborn Map and Current Survey*

### **Guidelines Cited on Review**

- Guidelines for windows (pages 29a-l), specifically guideline 6.
- Guidelines for Additions (pages 37a-37k), specifically guidelines 1, 5, 6, 11, 12, 13, 14, 19, 22, 24, 26, and 30.
- New construction (pages 38a-38q), specifically guidelines 1, 2, 5, 11, 12, 14, 18, 22, 23, 24, and 25.
- Decks, patios, hot tubs, spas, pools, and related equipment (page 39a), specifically guideline 1 for new proposed deck.
- Outbuildings (pages 40-41), specifically guidelines 1, 3, and 9.

### **Staff Analysis**

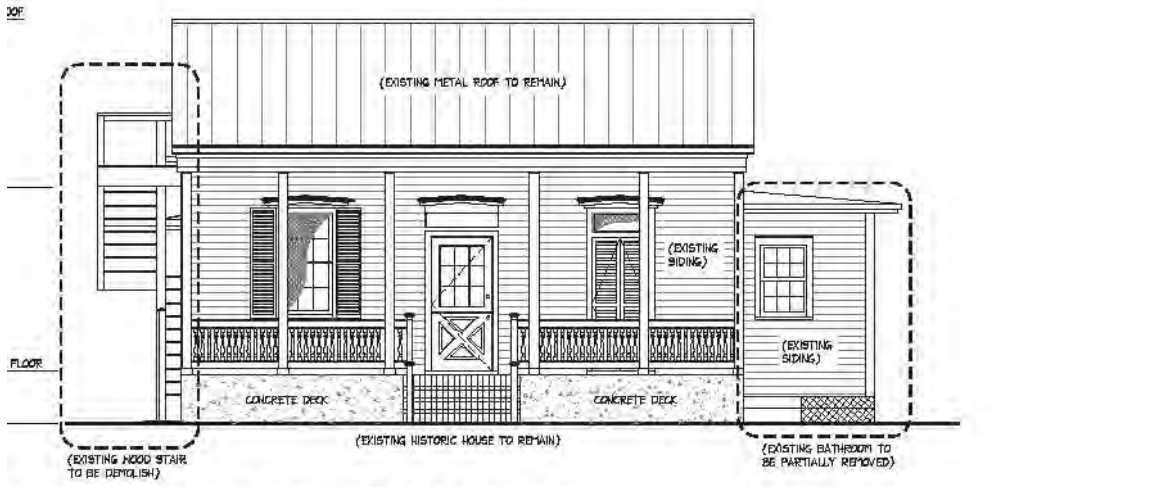

A Certificate of Appropriateness is under review for renovations to an existing historic house and a new one-story addition that will replace the existing altered rear portion of the house. Renovations to the house include restoration of wood windows, wood lap siding replacement where needed to match existing.

*Existing and Proposed Site Plans.*

A new rear addition is proposed to replace existing additions and alterations done over different periods of time. None of these alterations are historic. The new addition will be an “L” shape in footprint and will be covered with a side gable roof intersected with a gable end roof on its rear. All windows and doors will be new aluminum impact units. The new addition exterior walls will have horizontal hardi board siding and the roof will be finished with 5 v-crimp panels.

EXISTING WEST ELEVATION  
E: 1/4"=1'-0"

PROPOSED WEST ELEVATION  
E: 1/4"=1'-0"

*Existing and Proposed Lane View.*

In addition, a new one-story detached accessory structure is proposed in the southeast portion of the site. The structure will have a side gable roof finished with 5 v-crimp metal panels and will extend approximately 14' from grade to roof's ridge. Exterior walls will be finished with hardi siding and windows and doors will be impact aluminum units. The plan includes a pool and deck behind the principal building.

### **Consistency with Guidelines Cited Guidelines**

It is the staff's opinion that the proposed design conforms with cited guidelines. The proposed addition will be attached to the rear side of the house and will not alter character defining features of the contributing house. The current building has a rear addition that is wider than the historic house on its south side. The scale, mass and proportions of the new addition and accessory structure are in keeping with similar land use structures within the area and will not overshadow the principal or surrounding structures. The proposed deck and pool will be behind the principal building and will not be visible from the lane. The new design will bring a harmonious and sensible building forms to the rear portion of the historic house.

### DETAILED PROJECT DESCRIPTION OF DEMOLITION

Demolition of existing addition (kitchen area), back covered porch and covered shed.

### CRITERIA FOR DEMOLITION OF CONTRIBUTING OR HISTORIC STRUCTURES:

**Before any Certificate of Appropriateness may be issued for a demolition request, the Historic Architectural Review Commission must find that the following requirements are met (please review and comment on each criterion that applies):**

(1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the following criteria:

(a) The existing condition of the building or structure is irrevocably compromised by extreme deterioration.

N/A

(2) Or explain how the building or structure meets the criteria below:

(a) Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction.

N/A

Nothing in this application is intended to alter the authority of the Building Official to condemn for demolition dangerous buildings, as provided in Section 102-218 of the Land Development Regulations and Chapter 14 of the Code of Ordinances.

(b) Is not specifically associated with events that have made a significant contribution to local, state, or national history.
N/A
(c) Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state or nation, and is not associated with the life of a person significant in the past.
N/A
(d) Is not the site of a historic event with significant effect upon society.
N/A
(e) Does not exemplify the cultural, political, economic, social, or historic heritage of the city.
N/A
(f) Does not portray the environment in an era of history characterized by a distinctive architectural style.
N/A
(g) If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif.
N/A
(h) Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city and does not exemplify the best remaining architectural type in a neighborhood.
N/A

Nothing in this application is intended to alter the authority of the Building Official to condemn for demolition dangerous buildings, as provided in Section 102-218 of the Land Development Regulations and Chapter 14 of the Code of Ordinances.

(i) Has not yielded, and is not likely to yield, information important in history.
N/A

**CRITERIA FOR DEMOLITION OF NON-CONTRIBUTING OR NON-HISTORIC STRUCTURES:**

The following criteria will also be reviewed by the Historic Architectural Review Commission for proposed demolitions. The Commission shall not issue a Certificate of Appropriateness that would result in the following conditions (please review and comment on each criterion that applies):

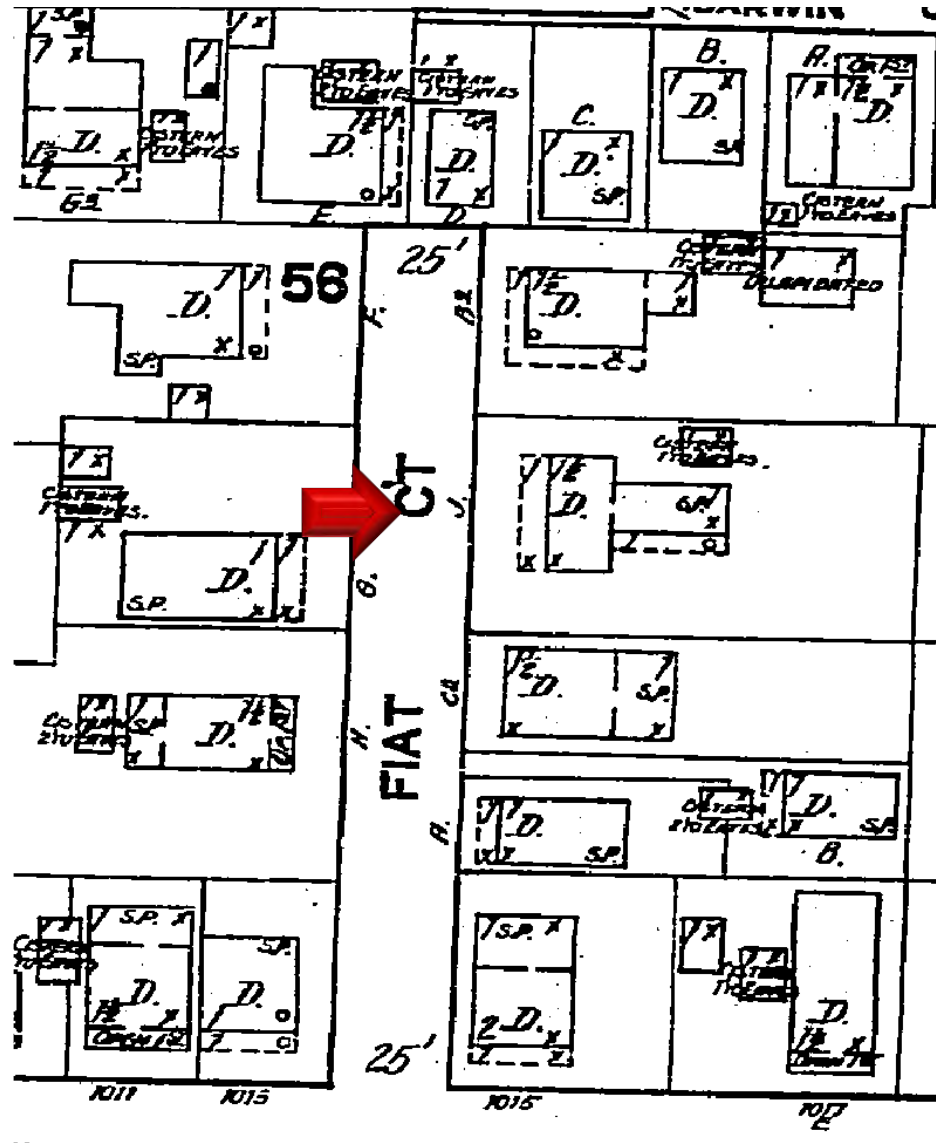

(1) Removing buildings or structure that are important in defining the overall historic character of a district or neighborhood so that the character is diminished.
N/A
(2) Removing historic buildings or structures and thus destroying the historic relationship between buildings or structures and open space.
N/A
(3) Removing an historic building or structure in a complex; or removing a building façade; or removing a significant later addition that is important in defining the historic character of a site or the surrounding district or neighborhood.
N/A
(4) Removing buildings or structures that would otherwise qualify as contributing.
N/A

- This project is designed in accordance with A.S.C.E. 7-10 to resist wind loads of 180 mph (3 second gusts) and in accordance with ASCE 24-14 Flood Resistant Design and Construction.
- Prior to submitting a bid, verify all existing conditions and dimensions on the jobsite, and also after award, but prior to the start of construction.
- Contours and/or existing grades shown are approximate. Verify with field conditions. Final grading shall provide gradual slopes and grades. Slope all grades away from the building. Planting areas shall be graded with soil suitable for planting. Rock and debris will not be allowed.
- Where discrepancies between drawings, specifications, and code requirements occur, adhere to the most stringent requirement.
- Dimensions shall take precedence over scale.
- All new utilities shall be underground.
- Drawings and specifications are complementary. Refer to all sheets of drawings and applicable sections of the specifications for interfaces of work with related trades.
- After completion of construction remove all debris and construction equipment. Restore site to original condition.
- Notify owner of any possible artifacts uncovered during site grading and throughout the course of construction.
- Furnish a receptacle on site to contain construction debris and maintain the site in an orderly manner to ensure public safety and prevent blowing debris.
- Comply with all requirements for selective demolition as specified, shown on the Demolition Plan, or called for in the selective Demolition Notes.
