

MEMORANDUM FOR THE FILE

DATE: December 21, 2011

FROM: Karen DeMaria, Interim Urban Forestry Manager, City of Key West

RE: 1116 Seminary Street

A site inspection was done on December 20, 2011, and documented the following:

The tree is a Gumbo Limbo tree (*Bursea simaruba*).

1116 Seminary Street cont....page 2

Circumference: 56" = 17.83" dbh

Location: 50% (potential foundation issues with pool and there are issues with deck.)

Species: 100% (on the protected tree list)

Condition: 50% (Overall health of tree appears to be fair. Can see some areas of sap buildup and drainage from tree indicating that there may be a health issue. The tree canopy is one sided and the tree has a distinctive lean.)

NOTE: the tree does have white fly but this did not influence the condition value.

Total Average Value = 67%

Value x Diameter=replacement caliper (dbh) inches = $.67 \times 17.83$ " = **12" replacement**
