

## MEMORANDUM

---

Date: February 9, 2026

To: Sustainability Advisory Board Members

Via: Alison Higgins  
Resiliency Manager

From: Ryan Stachurski  
Multimodal Transportation/ADA Coordinator  
Ray Atkinson  
Acting Planner I/Sustainable Transportation Coordinator

Subject: **File ID 26-5035 Supporting City of Key West Comprehensive Safety Action Plan**

---

### **Introduction**

The City of Key West Transportation Coordination Team (TCT) recommends Sustainability Advisory Board Members support the City of Key West Comprehensive Safety Action Plan.

### **Background**

The City of Key West received (80/20%) grant funding from the Federal Highway Administration to create a safety action plan in support of its “Vision Zero” goal to eliminate roadway fatalities and serious injuries by 2035. A safety action plan provides a roadmap for reducing injuries and provides the City with additional opportunities to receive federal grant funding for the implementation of proven safety countermeasures.

University of Florida Transportation Institute investigators worked with representatives of local police, EMS, and transportation; Monroe County schools and transportation; Florida Department of Transportation; and community advocates to evaluate proven safety countermeasures and prioritize policies and projects for the City.

### **Procurement**

There is no cost to support the Safety Action Plan, but implementing projects will likely require cost share.

### **Recommendation**

The City of Key West Transportation Coordination Team recommends Sustainability Advisory Board Members support the City of Key West Comprehensive Safety Action Plan.
