

**Historic Architectural Review Commission
Staff Report for Item 12**

To: Chairman Bryan Green and Historic Architectural Review Commission Members

From: Enid Torregrosa, MSHP
Historic Preservation Planner

Meeting Date: August 22, 2017

Applicant: Rob Delaune, Architect

Application Number: H17-01-0036

Address: #306 Peacon Lane

Description of Work

Installation of brick pavers in front yard.

Proposed bricks in the city's right-of-way are not part of this application.

Site Facts

The building in review is a one-story house listed as a contributing resource. The frame vernacular house, built circa 1906, preserves its original "L" shape front wrap porch that extends to the south side of the house. The house exhibits many architectural features that are character-defining elements such as carved columns and railings, exposed rafter tails, and gingerbread details in the front porch. Pavers at some point covered the right-of-way but they are no longer in place.

In July 20, 2017, the Planning Board approved variances for impervious surface and open space ratio for this proposal.

Guidelines Cited on Review

- Secretary of the Interior's Standards for Rehabilitation (pages 16-23), specifically Standards 1, and 2. Secretary of the Interior's Guidelines for Rehabilitation-Building site (pages 31-33) specific:

Not Recommended- “Placing parking facilities directly adjacent to historic buildings where automobiles may cause damage to the buildings or landscape features or be intrusive to the building site.”

Recommended- “Designing new onsite parking, loading docks, or ramps when the required by the new use so that they are as unobtrusive as possible and assure the preservation of character-defining features of the site.”

- Decks, Patios, Hot Tubs & Pools (pages 39-40), specifically first and last sentence of first paragraph, and guideline 1.
- Parking Areas, Landscaping, & Open Space Environment (page 43), specifically first paragraph, guidelines 1, 2, 4, 5, 6, and 7.

Staff Analysis

The Certificate of Appropriateness in review is for the installation of approximately 220 square feet of brick pavers in the front yard, as the owner wants to park her vehicle parallel to her house. Peacon Lane has seventeen properties, some of them have front yard covered with concrete or pavers, and still, other properties have at least 50% or more of green space in their front yard.

Consistency with Guidelines

It is staff’s opinion that the proposed cover of the front yard with brick pavers is inconsistent with many of the cited guidelines as well as the SOIS and Guidelines for Rehabilitation. Staff is aware of the issues concerning parking spaces in the historic district, but the guidelines are clear as to the protection of the character of the district, which includes, among others, the sense of place through the experience of its streetscapes and the relationship of historic buildings to the street realm. Paving an entire front yard detracts from the historical tradition of front spaces of historic houses been used for trees and green areas. Parking for single family residences is traditionally done on the side yard and not in front of the building. It is clear, through pictorial evidence, that the front yard of the house was covered with vegetation; the bricked area was the right-of-way. The guidelines state *“plantings should cover at least fifty percent of the front yard”*.
