FRANCIS
ENERGY

Francis Energy is a national electric vehicle charging company that exists to eliminate range anxiety for all EV drivers. We developed the first and only comprehensive, 50-mile statewide network of DCFC ("fast chargers") in Oklahoma and now installing in the southeast US with Florida leading in demand.

There is approximately \$7.5 billion earmarked for EV charging units in the new bipartisan infrastructure bill that you may be eligible for. We can help make sure you get a share of those funds.

This is an excellent opportunity to capitalize on several benefits:

- Attract new visitors
- Increase revenue from ancillary income
- Achieve your sustainability goals
- Future-proof your region

When you partner with Francis Energy to install EV chargers at your locations, we take care of everything for you.

- We design and develop site plans and project layouts for you.
- We aggressively seek out and apply for public money to finance the projects.
- When a site is awarded funding, we procure, engineer and install the chargers for you with **local** contractors.
- We work directly with the local utility to connect the chargers to the grid and take care of the electric bill.
- After installation, we operate and maintain the chargers for you on our network.

~~Change~~ Charge
the world with us.

Demand for EV charging stations is about to **skyrocket**

50%

GM, Ford & Chrysler aspire to have 50% of new vehicle sales by 2030 be electric

130

By 2026, 130 EV models from 43 brands will be available in America

50

There is a Federal directive to locate EV charging stations every 50 miles

EV charging
stations will attract
people so they can
enjoy their **stay**

Ensure charging is there
as an alternative in the
event of a **storm**

The time to get federal funding is **now**

- **Billions in funding** allocated to Florida for EV charging stations
- Federal funding **covers 80%** of the cost, we cover the rest.
- **Shovel-ready projects are needed** as funding becomes available. Evacuation routes given priority

Francis Energy— a partner with proven success

The only company with proven success building and maintaining an **“every 50 miles”** network

Industry experts—founded in 2015

Track record of securing project funding —**\$50M+ and growing**

We manage **everything** for you— today and into the future

Needs assessment

- Funding opportunities
- Site review

Driver support

- 24-hour
- US-based
- 95% uptime guaranteed

Turnkey installation

- Utilities
- Permitting and engineering
- Construction

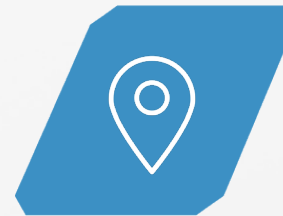

Analytics dashboard

- Sustainability KPIs
- Customer traffic and dwell times
- Revenue stream

Operation & maintenance

- Reliable servicing
- Rapid response

Searchability

- App/online location finding
- Francis EV Charging app in App Store

Best-in-class **quality**

- ▀ DCFC charging stations for rapid EV charging in **30 minutes**
- ▀ **Streamlined charging station installation** with precast charger foundations
- ▀ **Simple to use** and uptime is guaranteed

Plug in with Francis Energy

1
