Mission

COBAN Technologies is committed to manufacturing and developing in-car video of the highest caliber specifically for public safety and law-enforcement agencies. Our unique design of in-car video systems, interview room systems, ALPR, Digital Property Manager (DPM) systems, Automatic Vehicle Locator systems, and back office Digital Video Management Solution (DVMS) provides law enforcement with a complete digital solution while maximizing return on investment of evidence management. We continue to research and develop new ways to aid law enforcement agencies capture, transfer, manage and store evidence through superior technologies and services.

History

For over 10 years COBAN's primary focus has been on providing efficient, configurable, end-to-end scalable solutions that fulfill the video capture, transfer, storage, and management needs of law enforcement agencies. Our commitment to the highest standards of integrity contributes to the overall satisfaction of our customers. This commitment inspires us in the continual pursuit of technological and operational excellence. Employing the most innovative digital in-car video technology, COBAN ensures the delivery and performance of products with the latest communication, database, and storage technologies to execute complete and scalable solutions to our customers.

Located in Houston, Texas COBAN headquarters houses software development, technical support, engineers and research/development. COBAN has several satellite facilities that houses Quality Assurance/Quality Control Engineers, expert Sales Representatives and Field Service Engineers all across the United States. COBAN Mobile Response Teams are ready to meet the high expectations and unique demands of all our customers regardless of size or location.

COBAN continues to innovate and augment its offerings with the development of ALPR (Automatic License Plate Recognition), AVL (Automatic Vehicle Locator), DPM (Digital Property Management), Body Cameras, and Interview Room Systems. By centralizing these technologies, COBAN provides law enforcement agencies with one vendor and a single point of contact for a complete, high-quality solution. Currently, COBAN is on the Generation 4 line of products. This is a testament to our constant stream of developmental innovation.

Thousands of our systems have been deployed by hundreds of police departments across the United States, ranging from small departments with a few vehicles, to large, multi-precinct cities such as City of Los Angeles and City of Chicago. COBAN takes great pride in developing and retaining solid, long-term relationships with our clients. At COBAN our philosophy has always been to view customers as partners. We encourage our clients to collaborate with us to help us constantly perfect our in-car video solutions.
