

**TREE COMMISSION TREE REMOVAL REPORT
CITY of KEY WEST**

PROPERTY: 800 Ameila St.

APPLICATION NUMBER: T2025-0227

REQUEST: The applicant is requesting removal of the Royal Poinciana tree.

TREE ASSESSMENT and PHOTOS:

This branch broke off recently and is hanging on the pergola. The owner is rightfully concerned. We found no evidence of structural defects. The branch could have encountered a gust of wind and or been too long to handle recent leaf growth which tends to be heaviest near its terminal section. This branch is not particularly large in relation to the tree's canopy and trunk diameter.

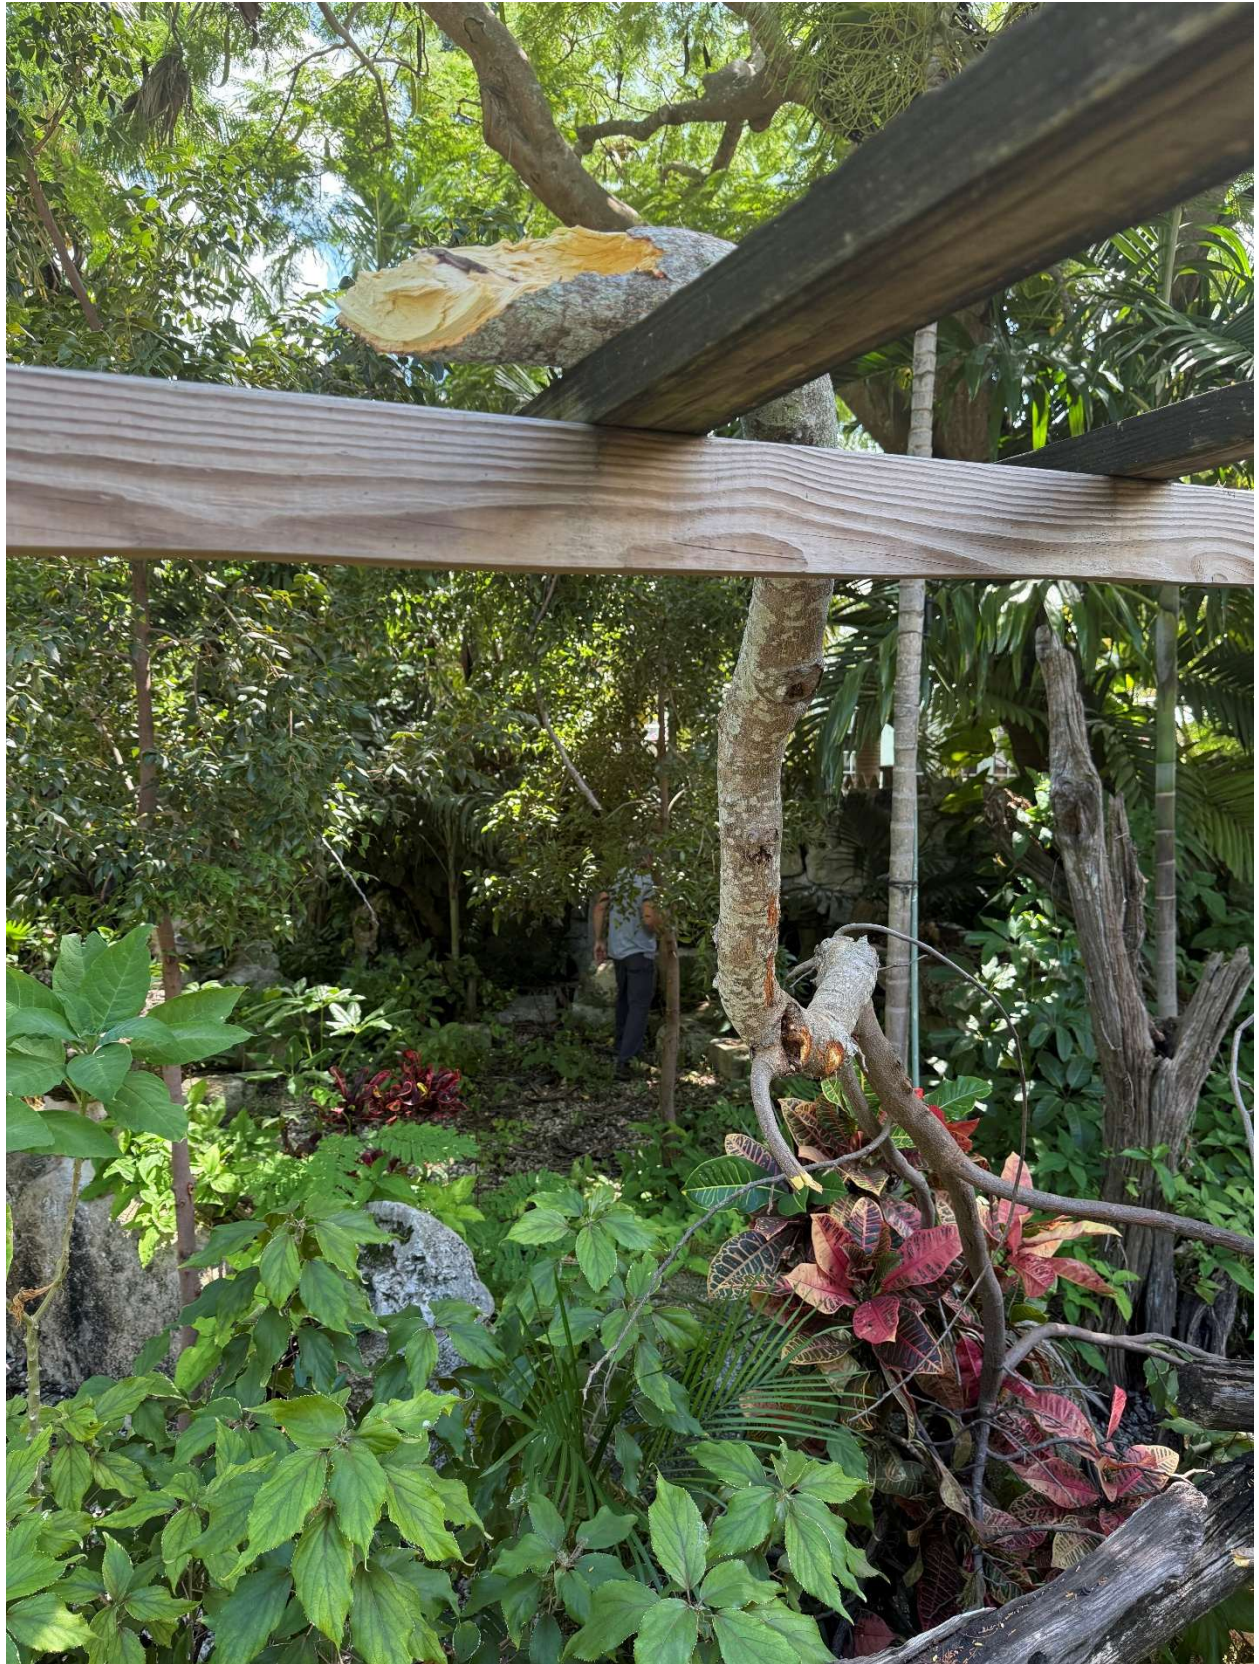

This Poinciana appears to have been well maintained.

The tree has several crotches or bifurcations. All appear to be strong.

Diameter: 26"

Location: 80%

Species: 100%

Condition: 100%

Value: 93%

Recommended Mitigation: 24 Caliper Inches

NOTES: We appreciate the applicants' concern for this very large tree. We are always happy to evaluate and help validate concerns or in this case alleviate someone's concern about tree viability. It goes without saying that all evaluations are time sensitive meaning that we can't predict the future viability of the tree.
