

Commendation for Jay Gewin

On January 22, 2009, the Key West City Commission established the Sustainability Advisory Board to promote the sustainability of the community as a whole considering public and private factors and their effects on ecological, economic and community systems.

The Sustainability Advisory Board would like to recognize and commend Utility Manager **Jay Gewin** for his dedicated and outstanding service to the City for the past 15 years.

Through **Jay's** efforts, Key West has won numerous awards for the water quality of our Wastewater Treatment System, increased energy efficiency at the plant by installing better aerators and variable speed drives, and championing alternative energy by planning for solar installations.

Jay also put considerable effort into bringing our Solid Waste program into the 21st century, by working diligently and comprehensively for the passage of a **Solid Waste Master Plan** and a new Solid Waste contract.

With this Commendation, we thank **Jay Gewin** for his dedication and service to the many residents of Key West working diligently to make Key West a truly Sustainable Community.

WITNESS our hand and seal of the City of Key West, Florida, this 12th day of June 2014.

Michael Larson, Sustainability Advisory Board
Chair
