

Historic Architectural Review Commission Staff Report for Item 7

To: Chairman Bryan Green and Historic Architectural Review
Commission Members

From: Enid Torregrosa-Silva, MSHP
Historic Preservation Planner

Meeting Date: June 28, 2022

Applicant: A2O Architecture

Application Number: H2022-0027

Address: 316 Southard Street

Description of Work:

Demolition of rear non-historic additions and carport.

Site Facts:

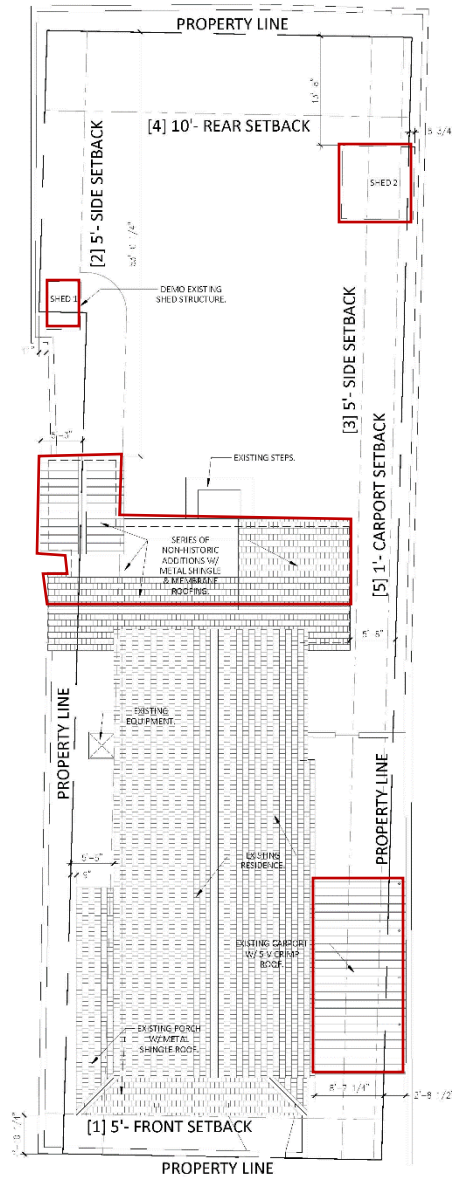

The property under review contains a one-story wood frame structure listed as a contributing resource to the historic district. The frame vernacular house was built circa 1926 and a structure for a car has been depicted in all Sanborn Maps. Some changes to the house include rear additions, reconfiguration of front elevation and newer roof for the carport. The house has an “L” shape porch with broken tiles deck. The house still possesses the historic turned columns, balusters, and gingerbread on the front porch. Contractor obtained building permits for interior work and for new foundations to be built at same height as existing.

Ordinance Cited on Review:

- Section 102-217 (2), demolition for non-contributing or non-historic structures of the Land Development Regulations.

Staff Analysis:

The Certificate of Appropriateness under review is for the demolition of a rear one-story addition. The applicant also wishes to demolish the existing carport. Plans under review include a design that replaces the rear addition and carport with more appropriate structures.

Proposed structures for demolition

The Historic Architectural Review Commission shall not issue a certificate of appropriateness that would result in:

- (1) *Removing buildings or structures that are important in defining the overall historic character of a district or neighborhood so that the character is diminished.*

It is staff's opinion that the non-historic rear additions and carport are not architectural elements that define the overall historic character of the house or its neighborhood.

- (2) *Removing historic buildings or structures and thus destroying the historic relationship between buildings or structures and open space.*

The structures under review are not historic and their demolition will not destroy any urban relationship acquired through time. Moreover, the removal and relocation of the carport will liberate the main façade of such an intrusive volume.

- (3) *Removing an historic building or structure in a complex; or removing a building facade; or removing a significant later addition that is important in defining the historic character of a site or the surrounding district or neighborhood.*

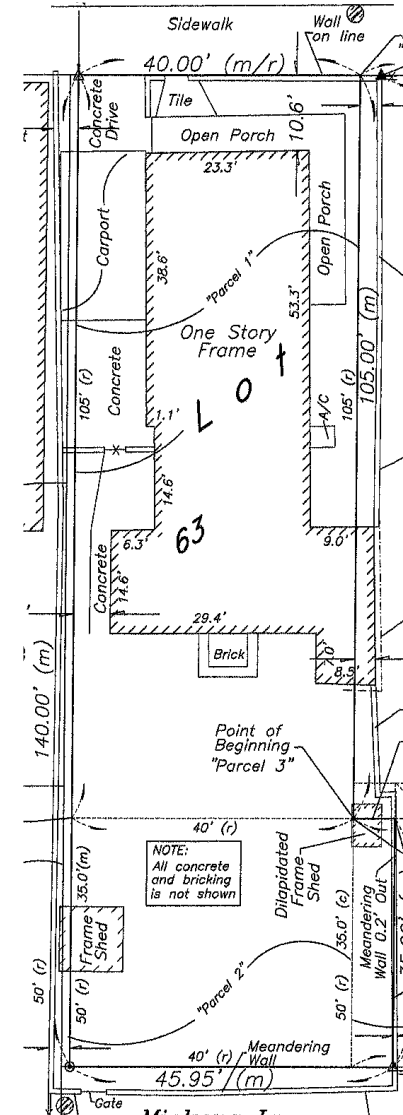

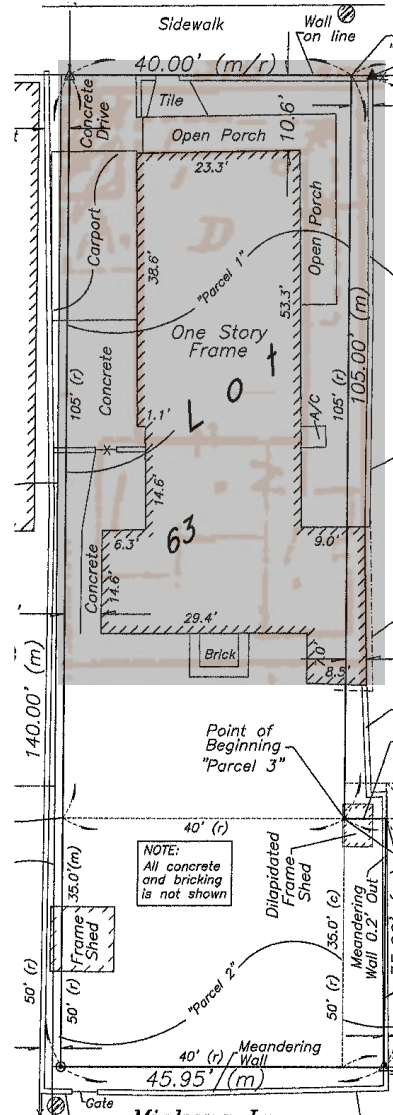

It is staff's opinion that the non-historic rear additions and carport under review do not define the historic character of the site or surrounding neighborhood.

- (4) *Removing buildings or structures that would otherwise qualify as contributing, as set forth in section 102-62(3).*

Although the main structure under review is a historic and contributing building the elements proposed to be demolish are not historic and are not character defining features. It is staff's opinion that the elements under review will not qualify to be contributing to the historic house in a near future.

Staff finds that the requested demolition of non-historic additions and carport can be considered by the Commission as it conforms with the current ordinance for demolition set under the LDR's. If approved, this will be the only required reading.
