This includes having no current or pending contractual obligations with the City of Key West that could reasonably be perceived to impair objectivity, independence, or the ability to act solely in the public interest.

Proposers are required to thoroughly review and understand the requirements set forth in Chapter 80, which is included below for reference.

The Consultant understands that this RFP does not constitute an offer or a contract with the City. A contract shall not be deemed to exist and is not binding until proposals are reviewed and accepted by appointed staff, the best proposal has been identified, negotiations with the firm/individual have been authorized by the appropriate level of authority within the City, and an agreement has been executed by both parties and approved by the appropriate level of authority within the City.

The City, at its sole discretion, reserves the right to inspect any/all of the Consultant's facilities to determine their capability to meet the requirements for the contract. The City reserves the right to reject all proposals, to waive non-material, technical variances, or infirmities in the proposal, to abandon the project or to solicit and re-advertise for other proposals. The City may in its discretion waive any informalities and irregularities contained in a proposal or in the manner of its submittal and award a contract thereafter.

The City's Selection Committee will evaluate proposals and will select the Consultant which meets the best interests of the City. The City shall be the sole judge of its own best interests, the proposals, and the resulting negotiated agreement. The City's decisions will be final. The purpose of the Evaluation Process is to evaluate the proposals submitted in response to this Request for Proposal and to establish the most advantageous firm/individual, further identified as the No. 1 or highest ranked firm/individual. Each proposal will be evaluated by each Selection Committee member using the procedures outlined herein.

PHASE I — EVALUATION

In a publicly noticed meeting, a Selection Committee, appointed by the City Manager or designee, will meet to evaluate all responsive submittals received in accordance with the requirements set forth in the solicitation. The City may request additional information of a clarifying nature if deemed necessary for this evaluation. Additional information may be requested via written submissions or oral presentations to the Selection Committee to allow each firm/individual an opportunity to provide the Selection Committee with additional insight regarding their proposal and that of the qualifications of the firm/individual.

Each Selection Committee member shall evaluate and award points in accordance with the Scoring Criteria specified for each of the Categories listed below. The points awarded for each Category will be totaled, ranked, and tabulated to determine the top ranked firm/individual to provide the City Commission. Should the number of Proposers exceed three (3), the Selection Committee will provide the City Commission with a ranking of the “shortlisted” firms/individuals.

PHASE II — SELECTION

The Selection Committee will evaluate all responsive proposals in accordance with the criteria outlined in this Request for Proposals (RFP). Once evaluations are complete, the Committee will submit their tabulated scores and a formal ranking of firms or individuals to the City Commission for consideration.

The City Commission will review the Selection Committee’s recommendations and may choose to accept the rankings as submitted. Alternatively, the City Commission may request additional information, such as formal presentations or interviews with one or more proposers. The Commission also reserves the right to amend the rankings based on these interactions or to reject all proposals entirely.

The final selection and award of any contract will be made by the City Commission at its sole discretion. Proposers should be advised that the City will not be responsible for any costs associated with the preparation of proposals, or for any expenses incurred related to interviews or presentations, should they be requested.

Subject to approval by the City Commission, a contract may be awarded to one or more consultants deemed to be the most responsible and responsive, based on the evaluation criteria.

Any award will be contingent upon the successful negotiation and execution of a contract in a form and substance approved by the City Attorney.

The City of Key West reserves the right to reject proposals submitted by firms currently involved in litigation with the City, or by firms with a demonstrated history of prior lawsuits filed against the City.

Proposers should also be aware that if the top-ranked proposers are within one (1) point of each other in total scoring as determined by the Selection Committee, those top-ranked proposers will be required to conduct a presentation and/or participate in an interview with the City Commission. In such cases, the final award decision will be made by the City Commission based on the outcome of those presentations or interviews.

END OF SECTION 2

SECTION 3

SCOPE OF SERVICES

3.1 BACKGROUND

Key West is an island city measuring approximately 4 miles in length and 1.5 miles in width. Located at the southernmost point of U.S. Highway 1, it is situated 153 miles southwest of Miami, Florida, and 93 miles northwest of Havana, Cuba. Key West serves as the county seat of Monroe County and encompasses the entire island, along with a portion of neighboring Stock Island to the northeast. The city's economy is primarily driven by tourism and commercial/charter boat fishing. A significant portion of the workforce is employed in the service industry, along with positions in government agencies and schools. Additionally, the U.S. Navy and Coast Guard maintain a presence in Key West.

The City's estimated permanent population in 2023 was 25,000. In addition to its residents, Key West is a world-renowned tourist destination and a favored location for second homes. On any given day, the total population in Key West—including permanent residents, seasonal residents, the maritime population, overnight tourists, day-trippers, cruise ship visitors, commuters, and shoppers—is estimated to exceed 50,000. This number can surge significantly during major events such as Fantasy Fest or New Year's Eve.

The City operates under a commission-manager form of government, with six district Commissioners and one Mayor elected at large. The City Commission appoints members to various volunteer boards and commissions, which are responsible for carrying out duties outlined by State law, the City Charter, and local ordinances. These boards and commissions include the Planning Board, the Historic Preservation Committee, and the Tree Commission. Additionally, the City Commission appoints Special Advisory Committees to provide community input on specific issues and projects as needed. Current advisory boards include the Key West Bight Management District Board, Parks & Recreation Advisory Board, Bahama Village Redevelopment Advisory Committee, Arts in Public Places Advisory Board, Contractors Examining Board, and the Environmental Sustainability Board.

3.2 SCOPE OF SERVICES

The City of Key West places a high priority on protecting and enhancing its water quality, recognizing that a healthy marine ecosystem supports the local economy while contributing to environmental integrity and quality of life, and, pursuant to Ordinance No. 22-07, § 1 (April 5, 2022), seeks to engage a certified, independent, and qualified water quality monitoring expert or governmental entity to develop a comprehensive program—utilizing targeted testing, proven methodologies, and compliance with local, state, and federal regulations, including monitoring of violations identified in Chapter 80-2—that will produce actionable data to guide the creation of policies, programs, and practices aimed at improving and preserving water quality.

The Consultant acknowledges that the scope of work provided in this RFP represents the general requirements and objectives for the project but does not constitute an exhaustive list of all tasks, services, or deliverables that may be required. The Consultant is responsible for conducting a thorough review of the project's needs and will provide all necessary services, expertise, and support to fulfill the project's goals, even if not explicitly mentioned in the scope.

Any additional work, tasks, or services required to complete the project in full compliance with the objectives, industry standards, and applicable regulations shall be deemed the responsibility of the Consultant and will be provided at no additional cost, unless otherwise agreed upon in writing by both parties.

A. Geographic Areas of Concern (GOC): The Consultant will be responsible for conducting water quality testing across several key areas within the Key West waterways, including waterway identified in Chapter 80-1, but not limited to:

- **Key West Harbor & Outer Harbor**
 - Waters surrounding the Key West waterfront and marinas.
 - Includes popular recreational areas such as beaches and docks.
- **Florida Keys National Marine Sanctuary (FKNMS)**
 - Waters within the sanctuary boundaries, with particular focus on areas prone to high human activity and potential chemical runoff.
- **Stock Island Channel**
 - Waters adjacent to Stock Island, including potential runoff areas from residential and industrial sources.
- **Shoreline Areas**
 - Including coastal wetlands and mangrove habitats around Key West to test for pollutants that may affect sensitive ecosystems.
- **Swimming Beaches**
 - Including but not limited to: Smathers Beach, Rest Beach, Higgs Beach, Fort Zachary Taylor beach, South Beach, and Dog beach. Focus on testing for bacteria and other health related pollutants, especially in areas highly frequented by residents and visitors.

Task 1) Review current relevant data across all GOCs and Identify Opportunities

In order to advise on a comprehensive water quality program, all relevant data shall be summarized in layman's terms to help the citizens of Key West understand what pollutants are of highest concern in each GOC. Recommendations on water quality design to capture the extent of those pollutants will be presented to the City Commission for feedback and prioritization.

Task 2 Identify Actions that may Mitigate Pollutants

With feedback from Task 1, create a list of actions which may mitigate the identified pollutants.

The list will include definition of the scope of those actions, their estimated costs and postulated effect on the pollutant(s). Recommendations will be presented to the City Commission for feedback and prioritization.

Task 3 Design Water Quality Monitoring Programs

Using the feedback obtained from Tasks 1 and 2, the Consultant shall develop a comprehensive Water Quality Monitoring Program designed to measure both the baseline levels of prioritized pollutants and any changes resulting from the proposed mitigation actions. The Program shall include detailed line-item costs for each sampling scenario, along with clearly stated goals for every monitoring activity. Final recommendations will be submitted to the City Commission for review and selection.

The Water Quality Monitoring Program must ensure that the pollutants identified in Chapter 80 of the City of Key West Code of Ordinances are included as testable parameters. The Water Quality Monitoring Program is encouraged to incorporate turbidity testing consistent with Florida's surface water quality standards (e.g., Nephelometric Turbidity Units [NTU] relative to natural background conditions) to enhance the assessment of water quality conditions. Where turbidity testing is included, sampling sites should be representative of each Geographic Area of Concern (GOC) and conducted in conjunction with other core water quality parameter measurements to provide context for potential pollutant sources and environmental impacts.

A) Beach Monitoring: The City has identified bacteria as a pollutant of concern at the Swimming Beaches GOC. Currently, the Florida Department of Health (FDOH) monitors four beaches within the City of Key West: Smathers Beach, Fort Zachary Taylor State Park, Higgs Beach, and South Beach. Monitoring is conducted every other week and tests for generic *Enterococcus* species. This testing does not distinguish whether the bacteria originate from human activity or other animal sources. At certain times of the year, specific beaches receive "Poor" ratings more frequently than others.

In the short term, the City intends to increase the frequency of testing, expand the number of testing locations, and enhance public education on current water conditions and recent trends. In the long term, the City plans to develop a more comprehensive beach water quality monitoring program aimed at identifying the sources of pollutants and implementing targeted strategies to mitigate them at the source.

B) Pollutants: The City of Key West, per City Ordinance Sec. 80-2, deems it unlawful for any cruise ship holding more than five hundred (500) passengers and such cruise ship owner(s), to deposit, place, or discharge any pollutant into the waterways of the City of Key West. Thus, the City requires a water quality monitoring program that monitors cruise ship pollutant discharges to ensure compliance with this prohibition and protect the integrity of its marine environment. Pollutant, per City Ordinance Sec. 80-1, is defined as; ballast, dunnage, untreated sewage, garbage, liquid or solid matter, oil, gasoline, residuum of gas, calcium, carbide, trade waste, tar or refuse,

or any other floating matter or scum on the surface of the water, obstruction on the bottom of the waterways, or odors or gases of putrefaction as such discharge is defined as a pollutant by state or federal law.

Task 4: Increase Availability of Recent Beach Reports

The City wishes to double the current FDOH beach water quality sampling at all 4 beaches from every testing other week to testing once per week. The sampling must mirror exactly the current sampling regimen followed by FDOH to ensure that all sampling conducted is comparable. (Consultant should collaborate with FDOH)

Task 5: Increase Community Knowledge of Data/ Beach Report Implications

Summarize trends in data geographically and seasonally to guide beach use. Advise on educational messages regarding these trends and FDOH beach Water Quality Categories to help swimmers understand their swimming risks.

Task 6: Assist with Design of New Beach Water Quality Monitoring Plan

Collaborate with the City's Water Quality Improvement Plan members and other relevant technical experts to design a more detailed water quality monitoring plan.
