

Historic Architectural Review Commission
Staff Report for Item 7

To: Chairman Bryan Green and Historic Architectural Review Commission Members

From: Enid Torregrosa, MSHP
Historic Preservation Planner

Meeting Date: July 25, 2017

Applicant: Gavin Scarbrough, Architect

Application Number: H17-03-0026

Address: #807 Elizabeth Street

Description of Work:

Renovations to eyebrow house including restoration of doors and windows. Renovations to non-historic rear addition including new aluminum doors and windows at rear façade. Replacement of non-historic siding with wood siding and hardieplank at rear addition. New rear porch with decking. New pool and rear fence.

Site Facts:

The main structure in the site is a contributing resource to the historic district. The rear yard abuts Galveston Lane. According to records, the eyebrow house was built circa 1889. By contrasting all Sanborn maps, the rear portion of the house was altered before 1948. In recent years, a wood deck was attached to the rear of the house. The front portion of the house still have historic windows. The site has dense foliage on the front and rear yards.

**US Secretary of the Interior's Standards and Guidelines for Rehabilitation
and Guidelines Cited in Review:**

- USSOIS and Guidelines (pages 16-23), specifically Standards 1, 9, and 10.
- Windows (pages 29-30), specifically guidelines 1, 2 and 6.
- Entrances, Porches, and Doors (pages 32-33), specifically guideline 12.
- Decks, Patios, Hot Tubs and Pools (pages 39-40), specifically guidelines 3 and 4.

- Outbuildings (pages 40-41), specifically guidelines 1, 3, 4, 9, 10 and 11.
- Fences (pages 41-42), specifically guidelines
- New Construction (pages 38a- 38q), specifically guidelines 1, 11, 12, 14, 18 and 22.

Staff Analysis

The Certificate of Appropriateness in review is for renovations to a historic eyebrow house, which includes restoration of existing historic windows and repairs and replacement of deteriorated siding to match existing and hardi board for the rear elevation. Repairs and or replacement of windows and front door wood shutters are included in the scope of work. The plan also includes the painting of the exterior of the house white. New metal v-crimp panels will replace the existing non-historic and deteriorated one. On the rear elevation, new fenestrations and door and window units are proposed. As explained, the rear elevation is altered and is non-historic.

The design also proposes a new rear covered porch. A hip roof with exposed rafter tails all in wood, is depicted in the plans. The proposed structure will be lower than the house and attached to a non-character defining elevation. A new lower rear wood deck will replace the existing one.

The plans also include the construction of a small pool with new deck at the rear of the yard as well as new wood fences. The existing off parking space will be retained at the front side yard.

Consistency with Guidelines

It is staff's opinion that the proposed design is consistent with cited SOIS and HARC guidelines. Staff finds the proposed renovations to the house to be appropriate and much needed. The proposed rear covered porch is lower in height than the main house and it will not overshadow any neighboring property. The proposed porch helps improving the actual unusual proportion of the existing rear façade.

Staff finds that the proposed fenestrations at the rear elevation of the house comply with cited guidelines; changes to the existing elevation had occurred over time. The proposed pool and decks on the rear as well as fences at the side and rear of the house are also consistent with the guidelines.
