Standards for Considering Variances

Before any variance may be granted, the Planning Board and/or Board of Adjustment must find all of the following requirements are met: Please print your responses.

1. Existence of special conditions or circumstances. That special conditions and circumstances exist which are peculiar to the land, structure or building involved and which are not applicable to other land, structures, or buildings in the same zoning district.

Special circumstances exist. The existing house was constructed in 1933 with later modifications and has a peculiar shape and site placement and orientation with large side yards and is not applicable to other land or buildings in the same zoning district.

2. Conditions not created by applicant. That the special conditions and circumstances do not result from the action or negligence of the applicant.

The house was constructed in 1933 with various modifications since. Current owners purchased the property in 2024 and the conditions are not created by the applicant.

3. Special privileges not conferred. That granting the variance(s) requested will not confer upon the applicant any special privileges denied by the land development regulations to other lands, buildings, or structures in the same zoning district.

Special privileges not conferred. Granting the variances requested will not confer upon the applicant any special privileges denied by the LDR to other lands or buildings in the same zoning district.

4. Hardship conditions exist. That literal interpretation of the provisions of the land development regulations would deprive the applicant of rights commonly enjoyed by other properties in this same zoning district under the terms of this ordinance and would work unnecessary and undue hardship on the applicant.

Hardship conditions exist. Existing covered patio can be easily enclosed and converted into habitable space while other options of addition will become much more significant and require costly efforts while creating other variances.

5. Only minimum variance(s) granted. That the variance(s) granted is/are the minimum variance(s) that will make possible the reasonable use of the land, building or structure.

Only minimum variances are requested that will make the reasonable use of the land.

6. Not injurious to the public welfare. That granting of the variance(s) will be in harmony with the general intent and purpose of the land development regulations and that such variances will not be injurious to the area involved or otherwise detrimental to the public interest or welfare.

No injury to the public welfare is created.

7. Existing nonconforming uses of other property shall not be considered as the basis for approval. That no other nonconforming use of neighboring lands, structures, or buildings in the same district, and that no other permitted use of lands, structures or buildings in other districts shall be considered grounds for the issuance of a variance.

Existing nonconforming uses of other properties are not considered as the basis of this approval.

The Planning Board and/or Board of Adjustment shall make factual findings regarding the following:

- That the standards established in Section 90-395 have been met by the applicant for a variance.
- That the applicant has demonstrated a "good neighbor policy" by contacting or attempting to contact all noticed property owners who have objected to the variance application, and by addressing the objections expressed by these neighbors. Please describe how you have addressed the "good neighbor policy."
