To whom it may concern:

American Empire Builders is scheduled to complete the Kingfish Pier Replacement - City Marina @ Garrison Bight in early October 2020. Tony Gonzalez, along with his crew, has demonstrated a high level of professional knowledge and integrity along with client service for this project which has met or exceeded our expectations.

The project includes removal of the existing floating concrete pier and replace with a new floating aluminum dock, approximately 400 feet in length, with twenty-four 30ft long finger piers (for up to 48 slips). The new facility is located between Palm Avenue Causeway and N. Roosevelt Blvd at City Marina at Garrison Bight and includes potable water, fire protection, electrical and sanitary sewer systems. Work is currently on time and within budget.

It is a pleasure working with American Empire Builders on this pier replacement project. The company has shown the staffing, qualifications, and dedication we demand when partnering on construction contracts. American Empire Builders has been professional, reliable, and responsive and we would highly recommend that they be considered for any project they may undertake.

Please feel free to contact me if I can provide any additional information regarding the performance of American Empire Builders.

Dear Ms. Reyes,

I am pleased to provide an absolutely stellar reference for American Empire Builders.

AEB was a subcontractor on the FDOT LAP funded – Pedestrian Bridge over Marvin Adams Cut in Key Largo and the prime contractor on the FDOT LAP funded – Pigeon Key Ramp Rehabilitation Project- adjacent to the 7 mile bridge in the middle keys.

Both projects were delivered on time and under budget.

Both projects were extremely challenging with environmental USACE, FDEP, SFWMD, FKNMS and state historical preservation office SHPO requirements and required meticulous attention to detail since they were funded by the Federal Highway Administration.

I have attached photos for reference and if you have any other questions or concerns please contact me.

Sincerely

Debra

**Subject: Recommendation**

Dear Mr. Gonzalez,

Please accept this letter of recommendation for your work in constructing the Pedestrian Bridge over Marvin Adams Waterway in Key Largo Florida.

The bridge consisting of a 120 foot long single span utilizing FIB 45 precast beams and approximately 230 CY of cast in place concrete was constructed as part of the shared use path in Monroe County.

AEB provided the entirety of the bridge scope for the project. The project was constructed in adherence with FDOT LAP Specifications with no deficiencies noted. AEB coordinated the work of setting the beams with the DNHI project personnel, FDOT, US Coast Guard, Keys Electric Authority and Monroe County Engineering to minimize impacts to all concerned parties with minimal disruptions.

Pom Chakkaphak of Parsons Brinckerhoff provided Consulting Engineer Inspection services on the project and was highly complementary of the work provided by DNHI and AEB. While the project presented unique challenges both in terms of access and construction methods the combined project team was successful in overcoming those challenges and presenting cost saving solutions to Monroe County to achieve the completed project. AEB offered valuable input towards overcoming the challenges on the project while minimizing additional cost impacts.

DNHI considers AEB to a valuable partner in pursuing these types of projects and we look forward to more successful projects in the future.

**Re: American Empire Builders  
Letter of Recommendation**

To Whom It May Concern:

We are writing to highly recommend American Empire Builders as a Bridge Contractor. We worked with them at the T6320 Stock Island Project (FIN # 429140-1-52-01), which was completed on 06/14/16, as well as the T6388 Krome Ave Project (FIN # 249614-7-52-01), which was completed on 03/10/18.

The T6320 Stock Island Project was an extremely challenging Project and American Empire Builders was instrumental throughout the whole duration of the Project. They provided accurate pre-construction estimates and they complied with the scheduled they provided to us before the Project start date. We had a hard deadline for full incentive and without American Empire Builders' assistance we would not have made it on time. They completed the job on time and on budget, on their \$1.4M Contract.

The T6388 Krome Ave Project was even more challenging with the complete construction of 2 new bridges, on a Bonus Project with a very tight schedule. Even additional work was required to be performed and everything was completed on time and on budget, on their \$1.0M Contract.

American Empire Builders' staff is professional, organized and very pleasant to work with and has excellent relationships with all the representatives on the owner's side.

We are confident that American Empire Builders will be an excellent member of any Project Team and you will be very satisfied with their work.

If you have any questions or would like additional information, please feel free to contact us at 305-592-3480.

Sincerely,

Jose Semprun, P.E.  
Director of Operations

Afloat on Biscayne Bay, crane operator Wayne Boyd maneuvers his 25-story-tall steel arm with the precision of a surgeon, plucking a concrete beam from its snug nest on a seagoing barge.

Then Boyd swings the burden out over the water toward its new home on the top of the bridge's pillars, or pier caps. The beam is met by the waiting hands of supervisor **Tony Gonzalez** and his crew, who balance on the tall pillar above the bay.

Millimeter by millimeter, the crew eases the massive beam — 85 tons and 145 feet from end to end — until it rests horizontally between two pillars. Fourteen months have passed, of drilling into the bottom of Biscayne Bay,
