

## Abstract (Attachment 4)

**Applicants Name:** Key West Police Department

**Project Title**            **Enhance and upgrade KYPD Electronic traffic citation system/process.**

### **Project Goals:**

1. Equip our Patrol Division and Traffic Unit personnel with current e-ticket printers to increase their efficiency while conducting traffic enforcement activities.
2. Significantly reduce the amount of time required to reproduce/print electronic citations and drivers report of a traffic crash.
3. Significantly upgrade the printing/duplication quality utilizing full-function/color and thermal monochrome commercial grade printing technology.

### **Description of Strategies Used:**

This grant will fund the purchase of new Electronic Citation/Report printers to reproduce/print copies of electronic traffic citations and reports in a high-quality full page format. This capability will enhance our ability to meet the increasing demand for traffic safety/speed enforcement while reducing the time and cost required of our personnel to reproduce citations and reports using outdated printer technology. The current 4' thermal printers in use are obsolete and not compatible with the printing format preferred by the department

### **Project Identifiers:**

1. Community Policing
2. Equipment
3. Law Enforcement Programs
