The purpose of the Estimated Score Sheet is to provide the applicant with the understanding that if a BPAS Allocation(s) is awarded the total amount of points represented on the Estimated Score Sheet and finalized through the official staff ranking process is required to be permanently maintained throughout the lifecycle of the project. Because the total amount of points is not linked to one specific criterion, the applicant has flexibility in the construction phase if certain point system criteria, for which the application is ranked, need to be substituted.

If the Prerequisites and/or the total points are not achieved, a Certificate of Occupancy will not be issued for the project.

3	Instructions		
4	Effective January 1, 2018 (Required January 1, 2019)		
5	Revised 3-27-18		
6			
7	Please read the "Standard & Policies" document for complete compliance requirements and operating principles.		
8	FOR NEW HOMES		
9	Each home must comply with the three prerequisites in order to be eligible for certification. Select items to obtain the minimum number of points listed for each category (category minimums). (The sum of the minimums totals 80 points.) Accumulate at least an additional 20 points of your choice to obtain the required 100 TOTAL* to qualify for the program.		
10	* If any category minimums cannot be achieved, point deficiencies may be added to the total minimum required score of 100, creating an "adjusted project minimum required points" (the points YOUR project must achieve for certification). (Example: Applicant elects to achieve only 10 points from a category with a minimum of 15. Project may still qualify if: total points equal or exceed 100 + [15-10] = 105.) Note that category maximums cannot be exceeded at any time. Some items require submittals that are colored red. Suggested submittals for other items are colored black.		
11	FOR EXISTING HOMES (REMODELS)		
12	Existing homes are exempt from the three prerequisites and the category minimums that are required for new construction. Please refer to the "Standards & Policies" document Section 2 for the Standards definition of an existing home. <u>Use Tabs 15 (Existing Home Application)</u> . Homes meeting the following requirements will receive a Green Remodel Designation . <ul style="list-style-type: none"> - Existing homes must accumulate a total of 100 points to achieve certification - Each existing home/remodel MUST achieve the required 13 REMODEL points (found in the General category) - The remaining 87 points required for certification may be earned using any combination of credits. - Category maximums can not be exceeded at any time. - The minimum HERS Index to qualify for the FGBC Green Remodel Designation is 80. Some items require submittals that are colored red. Suggested submittals for other items are colored in black.		
13	FOR MULTI-FAMILY PROJECTS		
14	For Multi-family projects. Use this checklist and the application form found on Tab 18. Green Home Certification is awarded to each individual unit that accumulates the appropriate number of points toward certification. Each unit is treated as a "home." <ul style="list-style-type: none"> - Please refer to the Reference Guide for additional details regarding how to score common spaces for multi-family projects - Please refer to the Standards & Policies document, Section 2-k. for additional information on streamlined submittal options. 		
15	IMPORTANT GUIDELINES:		
16	1. The FGBC Home Standard Version in effect when the home is permitted is the checklist that must be used to certify the home. However, you may opt to use a newer version if available and applicable. Any application submitted using a previous version of the standard must provide a copy of the building permit.		
17	2. Checklists and supporting documentation must be submitted by an Active FGBC Certifying Agent (CA).		
18	3. If this Excel file is altered in any way, the application will not be accepted. Altered files will be returned unprocessed to the submitter.		
19	4. During the review process, the project evaluator may request additional information and/or copies of "suggested submittals" indicated in the Reference Guide to verify that the project has achieved the credit point.		
20	FGBC CERTIFICATION LEVELS		
21	The FGBC Green Home Certification program uses a tiered rating system. Certification is awarded at different levels according to points achieved over the minimum point threshold.
