

## MEMORANDUM

DATE: December 16, 2011

RE: 201 William St (Waterfront Market Building)

FROM: Karen DeMaria, Interim Urban Forestry Manager, City of Key West

The redevelopment of the Waterfront Market Building located at 201 William St was discussed at the December 16, 2011 DRC meeting. A site inspection revealed two planters in front of the original main entrance. One planter had a live juvenile thatch palm and the other had a dead thatch palm. Along the William Street portion of the building there is a row of juvenile palms that are not on the Key West protected tree list. The applicant at the DRC meeting was told that the live thatch palm would need to be protected and or saved.
