## Historic Architectural Review Commission Staff Report for Item 8

To: Chairman Haven Burkee and Historic Architectural Review  
Commission Members

From: Enid Torregrosa-Silva, MSHP  
Historic Preservation Planner

Meeting Date: June 25, 2024

Applicant: Seth Neil, Architect

Application Number: H2024-0026

Address: 724 Olivia Street

### **Description of Work:**

Renovations and addition to existing house. Raise the house 7" for crawl space. ~~New accessory structure at rear.~~ New pool, pool deck, and side improvements.

### **Site Facts:**

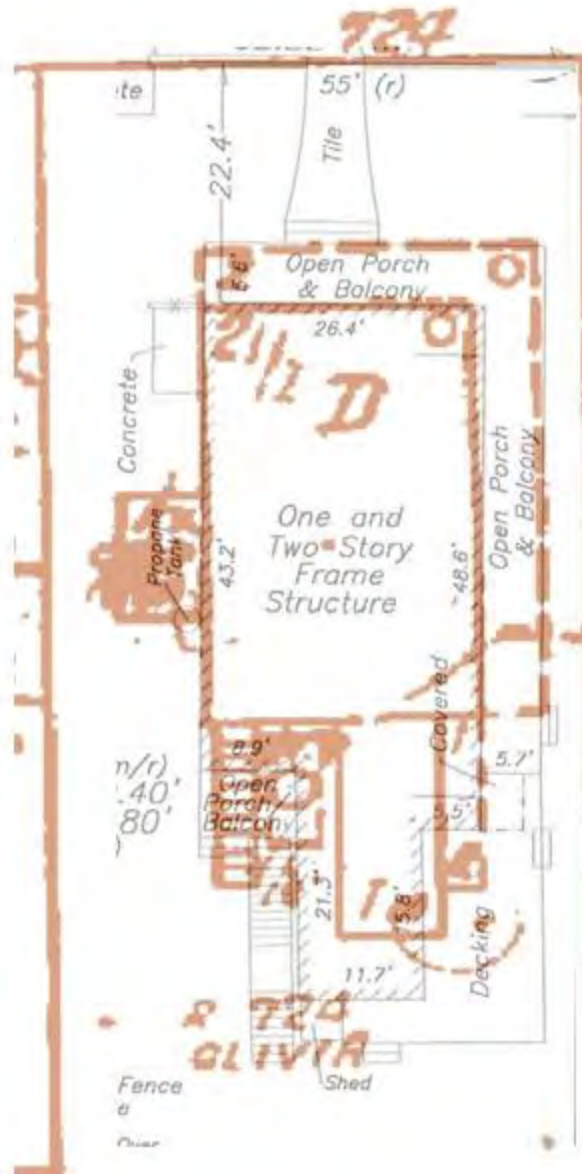

The site under review contains a principal structure and one accessory structures. The principal structure on the site is listed as a contributing resource to the historic district. The two and a half-story house was built circa 1906. The house still preserves its historic footprint, but the rear portion of the building has been altered. Although the house used to have historically an exterior staircase the current wooden element is not historic, and its configuration is different from the historic one. The rear one-story attached structure has different proportions and location than the original one, which, according to the Sanborn maps, used to have an open porch on its east side.

*Building under review circa 1965.*

*Front elevation.*

*1962 Sanborn Map and Current Survey.*

**Guidelines Cited on Review:**

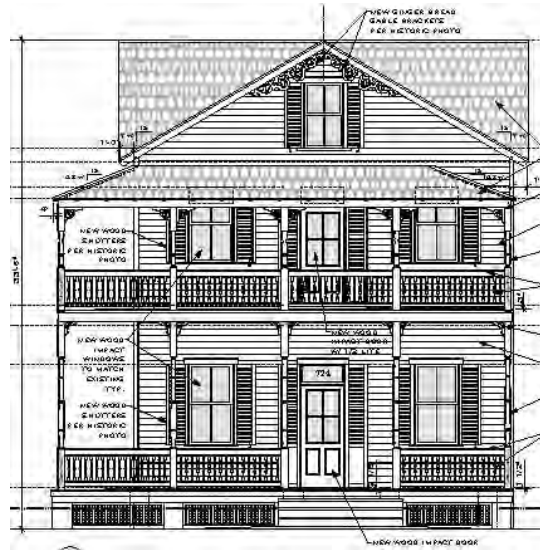

- Guidelines for windows (pages 29a-l), specifically guidelines 3 and 5.
- Guidelines for shutters (pages 30a-e), specifically guideline 3.
- Guidelines for entrances (pages 32-33), specifically guidelines 3, 4 and 5.
- Guidelines for Additions (pages 37a-37k), specifically guidelines 1, 2, 5, 6, 11, 12, 13, 14, 19, 21, 22, 24, and 30.
- New construction (pages 38a-38q), specifically guidelines 1, 2, 5, 10, first paragraph of page 38-l-building scale, form and massing, 11, 12, second paragraph of page 38-l -

building height, width and proportion, first sentence of guideline 13, 14, 18, 22, 23, 24, and 25.

- Decks, patios, hot tubs, spas, pools, and related equipment (page 39a), specifically guideline 1 for new proposed deck.

### **Staff Analysis:**

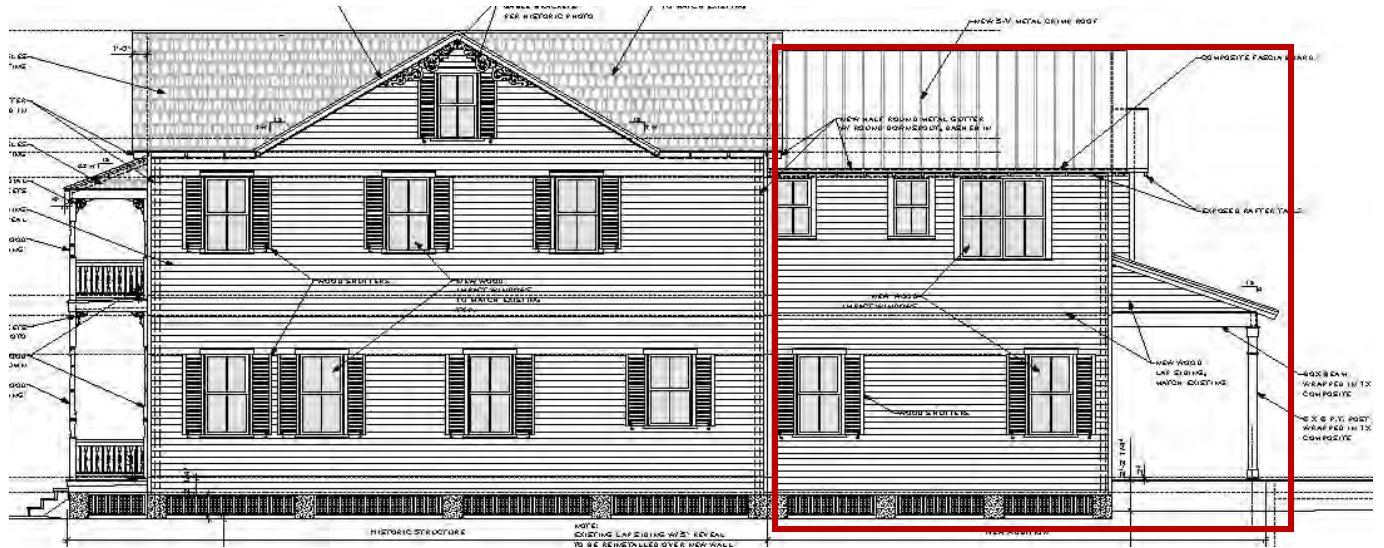

A Certificate of Appropriateness is under review for renovations to an existing historic house and for a new two-story addition that will be attached on the rear elevation of the historic house. Renovations to the house include restoration of the existing front porch with new wood turned columns and railings, restoration of existing gingerbread and replication of non-existing gingerbread by using historical photos. The plans include replacement of windows with 2 over 2 wood impact units, new wood doors and new wood louvered shutters. The plans **include a note for the existing wood lap siding to be removed and reinstalled over new wall sheathing**. New metal shingles will be used as finish material over the front porch and main house.

*Front Elevation.*

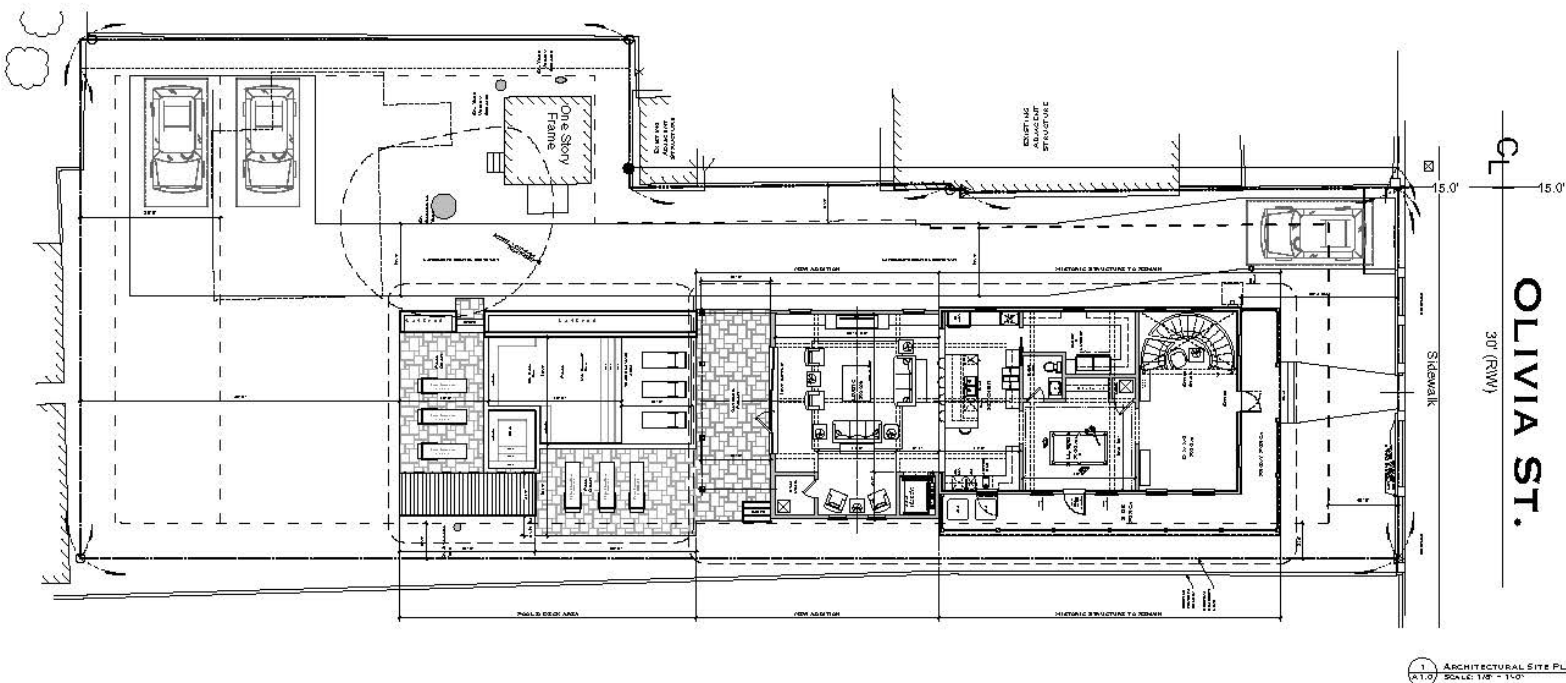

The design also includes new foundations that will raise the house seven more inches as the current house does not have enough crawl space for ventilation. The increase in height will create one additional step in the entry stair. Wood lattice will be installed between the piers.

A new two-story addition is proposed at the rear of the house. The addition will be rectangular in footprint and will contain a bump-out on its east side to accommodate an elevator. That structure will have a shed roof. The addition will be lower in height than the principal structure and will have a front gable roof covered with 5 V-crimp panels. Wood impact windows and shutters are proposed in the new addition and aluminum slides are depicted in the rear elevation. The plan proposes a rear one-story open covered porch.

West elevation depicting the rear two-story addition.

In addition the design includes a new pool and deck. The pool will be located behind the house and out of sight of Olivia Street. A gravel driveway is proposed on the east side of the property.

Proposed Site Plan.

The applicant is aware that the front fence sits over city's right-of-way. No work is proposed on that fence.

### **Consistency with Guidelines Cited Guidelines**

It is the staff's opinion that the proposed meets all cited guidelines. The proposed addition will be on a secondary elevation and its mass, scale, volume and proportions all are harmonious to the historic building. The renovations to the front porch and to the historic house are much needed. The proposed raise of the house does not respond to FEMA requirements, as the house is compliant, but for the need to create necessary crawl space to ventilate the house and remove structural elements from humidity. The proposed deck and pool will be behind the principal building and will not be visible from the street.
