1. **Harbor Walk Signage** - At last month's meeting Mr. Ashby expressed concern that there was no signage directing ferry passengers to the Harbor Walk. Attached is a picture taken that day of a fairly large sign on the fire pump house located on Conch Harbor property directly across from where ferry passengers exit the ferry terminal building. This sign has been in place for many years. Additional signage, including way finding, is planned as part of the common area enhancement plan.
2. **Cale Parking Machines** – City Parking Manager has received a response from the company that relates the ability to re-program machines to charge a lower rate for a period of time.
