

Historic Architectural Review Commission Staff Report for Item 9

To: Acting Chairman Greg Oropeza and Historic Architectural Review

Commission Members

From: Enid Torregrosa-Silva, MSHP

Historic Preservation Planner

Meeting Date: August 23, 2022

Applicant: MTM Building and Roofing

Application Number: H2022-0038

Address: 1101 Simonton Street

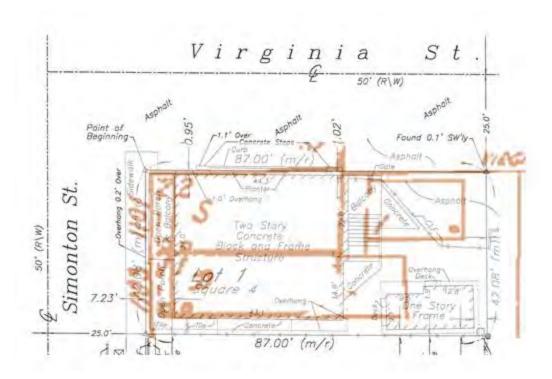

Description of Work:

New addition over non-historic portion of building.

Site Facts:

The site under review is a corner lot situated in the southeast intersection of Simonton and Virginia Streets. Although the principal two-story building is historic it is not listed as a contributing resource. Mario Sanchez depicted the structure in one of his carvings.

According to the Sanborn maps the corner building was built as a mix use structure with commercial use on the first floor. To the south side the existing one story attached structure is non-historic and was built in the 1970's as a replacement of a one-story structure that was demolished most probably after a fire. Photographs from the Property Appraisers green card and annotations are proof that the current one-story structure is not historic. The annotations include a note that the structure was built for storage. In the 1970's the main building was used as laundry on the first floor. The second floor of the building has always been used as residence. The building has undergone several changes, particularly on the rear. Front and street side walls have been altered with stucco and brick veneer.

Guidelines Cited on Review:

- Additions and alterations (pages 37a-37k), specifically guidelines 5, 6, 11, 12, 13, 19, and 25.
- New construction (pages 38a-38q), specifically guidelines 1, 2, 12, 22, 23, 24, and 25.

Staff Analysis:

The Certificate of Appropriateness under review proposed the construction of an attached addition to the southeast portion of the two-story building and over the rear portion of a one-story non-historic structure. The structure will be rectangular in footprint and will have a shed roof that will be below the existing historic building eaves.

Proposed site plan

The addition will have wood lap siding to match existing, impact windows and membrane roofing system. A new door will be facing the east or rear side of the addition. The plans also include the replacement of an existing non-historic wood staircase with a new one. The existing rear porch will remain.

Consistency with Cited Guidelines:

It is staff's opinion that the proposed design meets cited guidelines. The small addition will be towards the rear and over a non-historic structure. Although approximately 13'-6" lineal wall of the side of the second-story historic building will be demolished it is staff's opinion that there is no historic material left in the wall, which includes non-historic windows. Staff also finds the new design of the wood stair at the rear of the building in compliance with guidelines.
