

Historic Architectural Review Commission Staff Report for Item 6

To: Chairman Haven Burkee and Historic Architectural Review
Commission Members

From: Enid Torregrosa-Silva, MSHP
Historic Preservation Planner

Meeting Date: October 26, 2022

Applicant: Matthew Stratton, Architect

Application Number: H2022-0040

Address: 522 Olivia Street

Description of Work:

Demolition of existing one-story structure and accessory structure.

Site Facts:

The site under review is located on the southeast corner of Olivia and Center Streets. The site comprises of a one-story non-contributing structure and a dilapidated accessory building, both historic due to their more than 50 years of age. Making a comparison between the 1962 Sanborn Map and the circa 1965 with current conditions a one-story frame building to the east side of the lot no longer exists. In the 1960's a one story cmu structure was built in the corner, and portions of that building are still standing today. The current main structure is a cmu building that had several additions through time, including a low-pitched gable roof. Historically this corner lot used to have a two-story frame structure with a porch and an exterior staircase existed between the corner lot and the one-story structure no longer in existence. The existing accessory structure facing Center Street is in disrepair. The house opposite to the site is an eyebrow.

On October 17, 2022, the Commission motioned to approve submitted plans for a new house and first reading for demolition of the existing structures in the site.

Ordinance Cited on Review:

- Section 102-217 (3), demolition for contributing and historic structures of the Land Development Regulations.

Staff Analysis:

The Certificate of Appropriateness proposes the demolition of a one -story cmu non-contributing structure with some historic walls and the demolition of a dilapidated accessory structure that used to be a garage. A first reading for demolition was approved on October 17, 2022.

Portions of the corner cmu building are still standing. The one-story structure with two sawtooths was demolished. Photograph circa 1965 from the Monroe County Library.

It is staff's opinion that the request for this demolition should be reviewed based by the demolition criteria of Chapter 102 Section 218 (a) of the LDR's. The criteria state the following.

(a) The historic architectural review commission shall issue a certificate of appropriateness for an application for demolition:

- (1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration, or it does not meet any of the criteria of section 102-125(1) through (9).*

It is staff's opinion that the existing frame accessory structure is in disrepair but that the main house historic structural walls are not compromised by extreme deterioration.

The following is the criteria of section 102-125 and should apply only to the main building:

- 1 *Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction;*

Staff opines that the historic structure in question has lost any distinctive characteristic, if there was once one, as additions and alterations have compromised the original structure.

- 2 *Is not specifically associated with events that have made a significant contribution to local, state, or national history;*

It is staff understanding that no significant events relevant to local, state or national history have ever happened in the site.

- 3 *Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state or nation, and is not associated with the life of a person significant in the past;*

The structure under review has no significant character, interest, or architectural value. By the contrary due to the appearance of the structure it looks foreign to the surrounding urban context.

- 4 *Is not the site of a historic event with a significant effect upon society;*

The site is not associated to any significant event.

- 5 *Does not exemplify the cultural, political, economic, social, or historic heritage of the city;*

The main building on the site does not exemplify any social, cultural, or historic heritage of the city.

- 6 *Does not portray the environment in an era of history characterized by a distinctive architectural style;*

It is staff's opinion that the principal structure in the site cannot be consider a fine example of a distinctive architectural style.

- 7 *If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif;*

This is not the case.

- 8 *Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood; and*

The structure under review does not exemplify a remaining architectural type in its neighborhood and does not possess any significant visual nor architectural features.

- 9 *Has not yielded, and is not likely to yield, information important in history.*

The structure under review do not yield important information in history.

In conclusion, it is staff's opinion that the request for the demolition of both structures on the site wall can be considered by the Commission as they meet the criteria for demolition stated under the Land Development Regulations. If approved this will be the last of two required readings.
