

Historic Architectural Review Commission Staff Report for Item 5

To: Acting Chairman Greg Oropeza and Historic Architectural Review Commission Members

From: Enid Torregrosa-Silva, MSHP
Historic Preservation Planner

Meeting Date: February 28, 2023

Applicant: Serge Mashtakov, Engineer

Application Number: H2023-0003

Address: 10 Lowes Lane

Description of Work

Demolition of carport. Removal of front porch enclosure and partial demolition of rear wall for new sliding doors.

Site Facts

The building under review is an altered contributing resource to the historic district. Built circa 1910, the one and a half-story frame house still possesses its original footprint. Alterations include the enclosure of the full front porch, and addition of a dormer on the east side of the roof and an attached carport on the west side of the house.

The house under review circa 1965.

Elements proposed to be demolished in red.

Front elevation.

West side and rear elevations.

Ordinance Cited on Review:

- Section 102-217 (2), demolition for non-contributing or non-historic structures of the Land Development Regulations.

Staff Analysis:

The Certificate of Appropriateness proposes the demolition of non-historic elements, including partial rear wall of the house, front porch enclosure and west side addition. It is staff's opinion that the proposed demolitions will be done for non-historic and non-contributing structures and elements. Staff opines that the proposed alterations to the house that will be replacing the proposed structures meet guidelines for additions and alterations.

Areas proposed to be demolished.

Since the structures under review are non-historic, the evaluation shall be based on section 102-217 (b) of the Land Development Regulations, which requires the following criteria for demolitions:

The historic architectural review commission shall not issue permits that would result in:

- (1) *Removing buildings or structures that are important in defining the overall historic character of a district or neighborhood so that the character is diminished;*

It is staff's opinion that the structures under review are not important character defining features to the historic site. The removal of enclosures to the front porch will bring back to the house an important character defining feature.

- (2) *Removing historic buildings or structures and thus destroying the historic relationship between buildings or structures and open space;*

The proposed structures to be demolished are not historic.

- (3) *Removing an historic building or structure in a complex; or removing a building facade; or removing a significant later addition that is important in defining the historic character of a site or the surrounding district or neighborhood.*

The non-historic structures under review cannot be considered important elements that define the historic character of the site and neighborhood. By the contrary the proposed new design will be harmonious to the house and surrounding properties.

- (4) *Removing buildings or structures that would otherwise qualify as contributing, as set forth in section 102-62(3).*

It is staff's opinion that the structures under review will not qualify to be contributing to the district in a near future.

Staff recommends to the Commission the consideration of this request for demolition as the proposed replacements to elements to be demolished will have no adverse effect to the historic fabric of the existing house. Bringing back the front porch, creating a more appropriate building form for the west addition and partial removal to the rear non historic wall will be an appropriate design solution to the historic house and surrounding properties. If the Commission finds the design to be appropriate this will be the only required reading for demolition.
