

I will be out of town and not attending the DRC meeting. Below are my comments:

#2 Development Plan-3401 Duck Avenue: I have seen the tree map and done a few quick walks around the property. Trees that are regulated and being removed or transplanted must be flagged and numbered. Once all main site questions have been answered as per DRC and Planning and the trees have been tagged, I will do a detailed review of the site map complete with site visits and a review of the proposed landscape plan to determine if the file can move forward to a Tree Commission review.

#3 Vacation of City Property-Seminole, Waddell, Reynolds, Alberta: No Comment.

#4 Transient License Transfer-1901 S. Roosevelt to 507 Amelia St: No Comment.

#5 Development Plan Mod-5220 College Road: I could not tell from the file what this request is about but if this relates to the Art in Public Places requirement I would like to state that the SPCA and the City of Key West both have had to comply with the Art in Public Places condition of the development plans related to their project.

Sincerely,

Karen
