

**Re: Sole Source for Neuroprotective CPR Workforce Training Inclusive of the Required Implementation Supplies**

The purpose of this letter is to provide you with the information you requested about the availability of Neuroprotective CPR Workforce Training from AdvancedCPR Solutions (ACS).

The method of delivering ElevatedCPR®, or Neuroprotective CPR (NCPR) as it is sometimes referred to in the scientific literature, and the use of the EleGARD Patient Positioning System with circulatory adjuncts and with suction cup equipped chest compression devices were developed and broadly patented by AdvancedCPR Solutions with thirty (32) issued and allowed patents covering both the method and / or the devices needed to properly carry out NCPR.

ACS concurrently developed proprietary clinical education, training and advisory programs on the science and implementation of NCPR that have been delivered to over 8000 clinical educators and providers in the US.

Neuroprotective Head Up CPR requires a paradigm shift in your agency's approach to sudden cardiac arrest involving provision of a comprehensive provider education and training program along with hands on use of the training supplies needed to deploy this technologically advanced bundle of care. It requires the use of a mechanical suction-cup based CPR device, a circulatory adjunct to decrease intrathoracic pressure, and a device to provide the slow, controlled sequential elevation of the head and thorax.

AdvancedCPR Solutions through its authorized logistics and invoicing partner, Med Alliance Group, Inc. is the sole source for Neuroprotective CPR Workforce Training and the training supplies to implement the training your service receives.

Please let me know if additional information is required.

Best regards,

Melissa M. Bahr, RN, BSN, EMT-P, MHA
