- Regarding the requirement on RFP p 12, "20.0 MAINTENANCE OF TRAFFIC- To be qualified, at least one person on the Contractor's staff must be trained and certified for State of Florida MOT design. This person must be on site at all times to assure proper MOT desi&n is being met by the Contractor's crews." Will a third party contractor be permitted to meet this requirement?

Yes

- Hazardous Tree Removal: FEMA 325, Public Assistance Debris Management Guide allows for the eligible removal of Hazardous Trees with a minimum diameter of 6 inches or greater measured at Diameter Breast Height (DBH), 4.5 feet above ground. Would the City consider adding an additional Hazardous Tree size category of 6 inch to 12 inch diameter?

No

- Hazardous Stump Removal: FEMA 325, Public Assistance Debris Management Guide, Appendix G-FEMA Policies and Factsheets, DAP9523.11-Hazardous Stump Extraction and Removal Eligibility indicates that only stumps that have a diameter greater than 24 inches measured 2 feet above ground to be eligible for reimbursement. Is the contractor to assume that stumps 24 inch in diameter or less will be required to be ground a minimal of 8 inches below the surface of

the surrounding ground and that these stumps will be a specialty pay item as indicated in the bid schedule?

Provide pricing for all criteria in Tables A and B.

4. Stump Backfill: Should the contractor assume that the volume of the backfill for stumps is based on backfilling the 8 inches of void left from grinding the stump below ground or from the void created from extraction of the stump?

Yes, backfill to level ground plus 2".

- S. Mobile Kitchen, Laundry, Shower & Restroom, and Satellite Communications Facilities: What operational period should the units cost be based on, per day, week or month?

See Table B, per week.

6. Mobile Fueling Facility:

- a. What operational period should the units cost be based on, per day, week or month?
- b. What type fuels are to be provided and how will compensation for fuel consumed by the City be handled?

See Table B, per week. Gasoline and Diesel fuel, use the Florida Department of Management Services, Terminal #6 Miami pricing plus proposer mark-up. Provide mark-up.

7. Emergency Mobile Power Generators:

- a. What operational period should the units cost be based on, per day, week or month?
- b. What length of power supply cable should be provided as required in the specifications, 2S, 50 or 100 LF?

See Table B, per week, 100LF.

8. Portable Dewater Pumps, 6 inch:

- a. What operational period should the units cost be based on, per day, week or month?
- b. What length of hose should be provided as required in the specifications, 2S, 50 or 100 LF?

See Table B, per week, 100LF.

**Question 1) Section 14.S Basis of Scoring: Pg. 9 – 11**

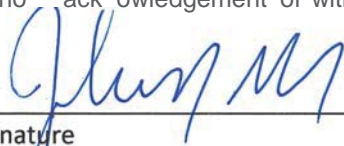

How will the City calculate pricing in order to generate each proposers lump sum? Does the City intend to add up each line item or will the City use the scenario identified in the RFP in which quantities will be assigned to generate an estimation?

See Table A and B, we will calculate using quantities assigned in Tables A and B and pricing from proposers.

Can we obtain copies of the required forms and the pricing schedule in their native formats (word or excel)? This will make it much easier to fill in and make changes if necessary.

All forms are provided in pdf format.

All Proposers shall acknowledge receipt and acceptance of this Addendum No. by acknowledging Addendum in their proposal or by submitting the addendum with the bid package. Bids submitted without acknowledgement or without this Addendum may be considered non-responsive.
