

Key West Intermodal Center “Kwic”

Director of Transportation—Rod Delostrinos

Key West Transit –Making Connections

The Idea

Issue	Solution	Idea
City Wide Traffic Congestion	Provide alternatives to bringing vehicles into city	Parking structure at Transit Facility on Stock Island
Limited Parking especially in Old Town	Provide additional parking options	Parking structure at Transit Facility on Stock Island
Limited Greenspace	Use an unconventional space for conventional use	Construct sports field on the uppermost level of parking structure
Limited Commercial Bus Parking	Provide additional bus parking options	Parking structure at Transit Facility on Stock Island with bus parking
Limited bike rack space on buses	Provide bike storage option	Incorporate bike storage with parking structure

Key West Transit –Making Connections

The Concept

The Key West Intermodal Center (KWIC) is but one idea that can help alleviate some of the issues faced by the Key West residents and visitors.

The KWIC would consist of several components: multi-level automobile and bus parking structure; Key West Transit hub offering connections to city routes and the Lower Keys Shuttle; Connections to commercial coach services; ferry boat service to Key West Ferry Terminal; and sports field

If the project is accepted and funded, the KWIC would provide connectivity via various modes of transportation such as public and private motor vehicles, bicycles, and ferry boat to the local area.

Key West Transit –Making Connections

The Way Ahead

Include in City of Key West Capital Improvement Plan

Include in next year's Transit Development Plan (Information from TDP can support the grant requirements)

Develop grant packet for the Federal Transit Agency which includes:

- purpose and need (P & N -- what are you trying to solve)
- locally preferred alternative (evaluated several and selected one based on the P & N)
- site plan and alternatives
- NEPA Class of Action
- capital budget, funding plan – and perhaps a traffic study (and this usually comprises feasibility).

Develop grant packet for Florida Department of Environmental Protection: Florida Recreation Development Assistance Program

Solicit for design

Solicit for construction
