

**Historic Architectural Review Commission
Staff Report for Item 2**

To: Chairman Bryan Green and Historic Architectural Review Commission Members

From: Enid Torregrosa, MSHP
Historic Preservation Planner

Meeting Date: October 23, 2018

Applicant: Glenn Anderson, Owner, and Designer

Application Number: H18-03-0020

Address: #522 Simonton Street

Description of Work:

Demolition of one outer wall on rearmost one-story, demolition of one upstairs wall and partial demolition of roof on second floor rear structure. Demolition of one-story rear portion of the house and partial demolition of rear wall of main house. **Second Reading**

Site Facts:

The main house located in the site is a contributing resource to the historic district. The two-story frame vernacular structure was build circa 1860. The unique and historic main house is comprised of two two-story attached houses and two one-story bump outs at the rear of each house. The main house has been abandoned and neglected for decades. A non-historic rear pergola is located at the rear yard. The rear of the house is visible as it faces Bahama Street; for decades, the lot abutting the rear yard is a parking lot.

Due to the severe state of decay and neglect, staff approved a Certificate of Appropriateness for the following maintenance work:

1. Window and shutters repairs and painting
2. Siding repair and painting
3. Repairs and stabilization to the left side porch. All new materials to match existing in size and profile.
4. Stabilization of right front porch with no reconstruction.
5. Installation of temporary gutter at top of the right side front porch.

In addition, the Commission approved the construction of a new one-story accessory structure at the rear yard during the April 24, 2018. In August 28, the Commission approved the proposed design for additions on the rear of the house and the first reading for demolition of historic portions of the structure. The Commission did not approved the proposed carport as part of the design.

Staff has included as part of this report, an overlay of the current survey provided by the applicant and the 1962 Sanborn map. We are also including aerial photographs of the house for better understanding of the building and roof forms, which are distinctive to the house.

Ordinance Cited on Review:

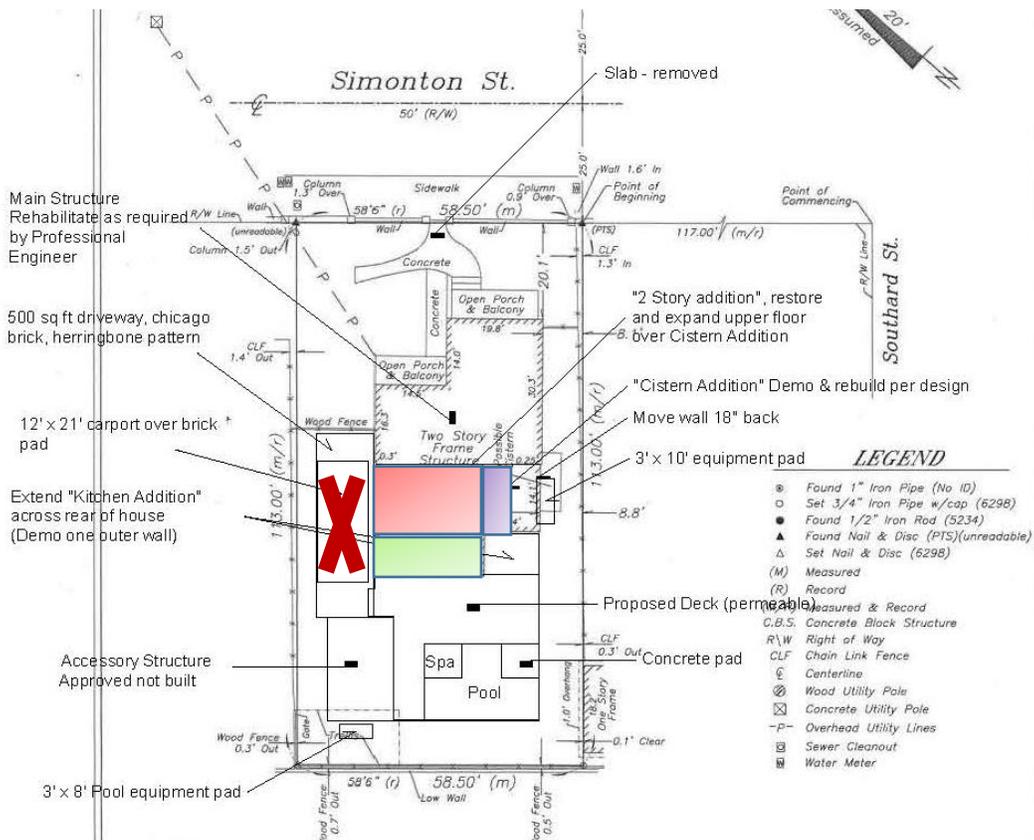

- Section 102-217 (3), demolition for contributing and historic structures of the Land Development Regulations.

Staff Analysis

This report is for the second reading for proposed demolitions. The plan proposes the demolition of an existing rear one-story bump out structure located on the southwest corner of the house. By doing this, the new design includes the reconstruction of the structure, 18” setback from the current south elevation. The one-story structure will have a new second-story addition that will cover approximately 73.5 square feet or 47% of the structure. The revised design also proposes the demolition of a two-story south wall at the rear of the house in order to accommodate an open kitchen and living area on the first floor and the master bedroom on the second floor. According to the plans, the portions of the rear two-story shed roof are proposed to be demolished in order to accommodate a new shed roof.

The following depicts the 1962 Sanborn map and the proposed alterations with a color-coded key:

- 2-story addition- restore and expand upper floor over pre 1962 Sanborn map Cistern Addition- 
- Kitchen addition – increase towards southwest- 
- Cistern addition – move wall 18” back- 

Proposed Plan excluding carport.

Portion not included in the 1962 Sanborn map

The Land Development Regulations defines a historic building as “*any building or structure which, in whole or in any structural part, was built 50 or more years prior to the current date, and which is located in the historic zoning districts of the city or has been designated as a historic building and/or structure.*”

The Land Development Regulations defines demolition as “*the act or process of wrecking, destroying, moving or removing any building or structure, or any exterior or structural part thereof.*”

According to the Sanborn maps and aerial photographs it is evident that the two-story rear bump out and the westernmost one-story structure covered with a shed roof have been standing in the site for 50 years or more. The westernmost rear structure is depicted in the 1962 Sanborn map as an open porch. Also in the 1962 Sanborn map the one-story southernmost rear structure is depicted and is almost half or the width of what is currently on the site. Still, a cistern is shown on the location as the current structure is and it has been scratched-out from the Sanborn map drawing, making it questionable if the shed portion was expanded over the cistern as an enclosed structure. A cistern is still in the same location as the Sanborn map shows it. Aerial photographs depict a roofline on that portion of the site, even though heavy vegetation covered the area.

Based on all the information gathered and reviewed it is staff’s opinion that the two-story rear bump out and the two one-story rear bump outs are historic. The building forms of the two-story and one-story northwest rear bump outs are evident in photographs dated 50 or more years old. The angle of all photographs reviewed makes it hard to see the one-story shed bump out rear structure located in the southern west portion of the house. The 1962 Sanborn maps depicts a one-story structure on the location that is half of the width of what stands today, but is not clear, due to the scratch on, if the structure extends over the cistern and a cistern is still located on the same spot where the maps depicts it. As a conservative measurement staff is reviewing also the rear one-story shed portion of the house located at the southwest corner as historic. According to the Lands Development Regulations, the project proposes partial demolition, complete demolition or complete demolition and reconstruction in several architectural elements of the rear portions of three historic portions of the house.

It is staff’s opinion that the base of the review of the demolition request be on the criteria under Chapter 102 Section 218 of the LDR’s. The criteria state the following:

(a) The historic architectural review commission shall issue a certificate of appropriateness for an application for demolition:

(1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the criteria of section 102-125(1) through (9).

There is evidence that the portions of the walls on the rear of the house are compromised by extreme deterioration. The revised plans proposes reconstruction and or preservation of the three dimensional envelope with the exception of 73.5 square feet of a second story addition at the rear of the house.

The following is the criteria of section 102-125:

- 1 *Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction;*

Staff opines that the structures in question have distinctive characteristics of a type and period, and are significant to the overall historic character of the building. Still the proposed amount of demolition is minimal and the proposed new second floor addition will not have an adverse effect in the historic fabric

- 2 *Is not specifically associated with events that have made a significant contribution to local, state, or national history;*

It is staff understanding that no significant events have ever happened in the structure that may have contributed to local, state, or national history.

- 3 *Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state or nation, and is not associated with the life of a person significant in the past;*

Although the building adds character and value to the site, the request demolition will minimally affect the form of the structure at its rear elevation. The proposed design includes a similar new shed roof that will have the same pitch of the existing one.

- 4 *Is not the site of a historic event with a significant effect upon society;*

Staff has no information to support this.

- 5 *Does not exemplify the cultural, political, economic, social, or historic heritage of the city;*

The structures in question are an example of the historic heritage of the city; this house not experience any exterior changes in decades and it is a great example of its kind.

- 6 *Does not portray the environment in an era of history characterized by a distinctive architectural style;*

The structures in question are an example of a distinctive architectural forms. These structures have acquired historic significance by their own. The proposed demolition and new addition will maintain the overall form of the rear elevation.

- 7 *If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif;*

The structures in question are not part of a park or square in the city.

- 8 *Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood; and*

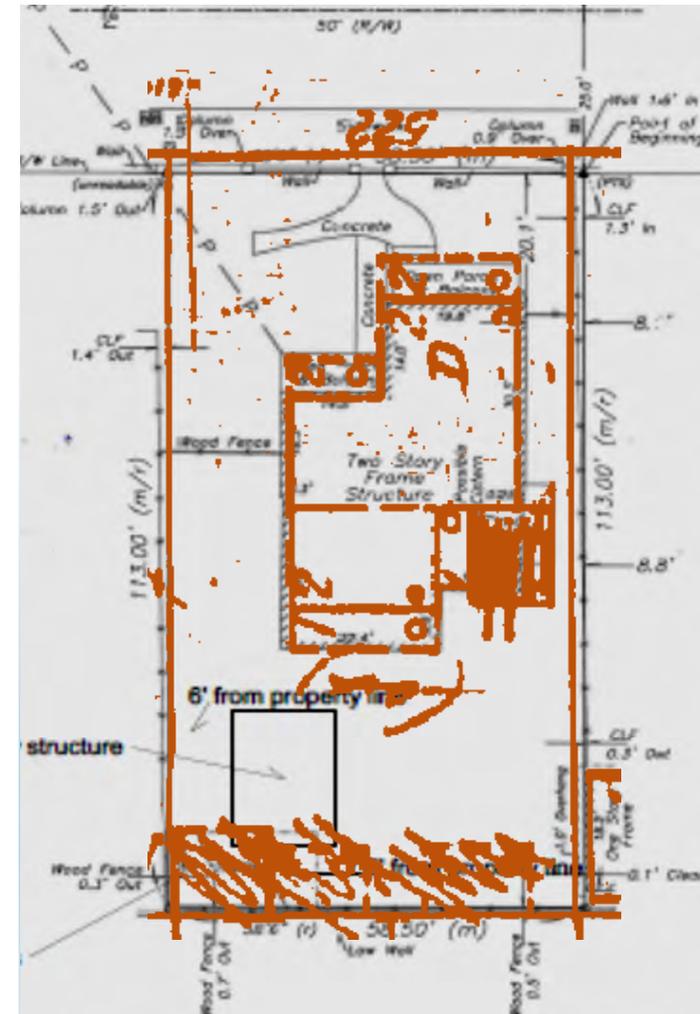

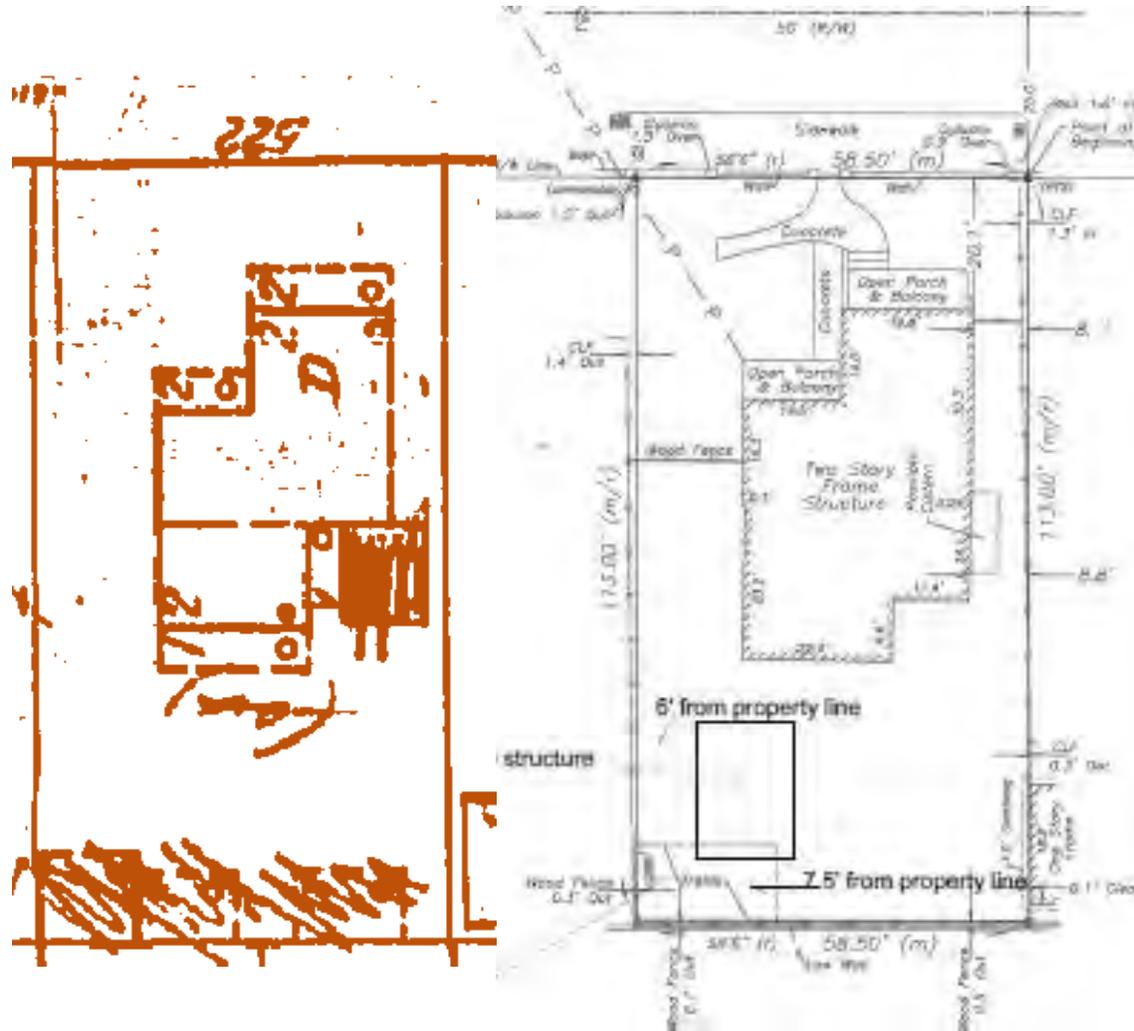

The building has three elevations that are exposed; the front façade, the north elevation, and the rear elevation, which faces Bahama Street. As expressed before, the building and roof forms have not changed in decades.

- 9 *Has not yielded, and is not likely to yield, information important in history.*

The structures in question yield important information in history, as the architectural form of the building and roof lines have not changed. These elements are significant and character defining features to the house.

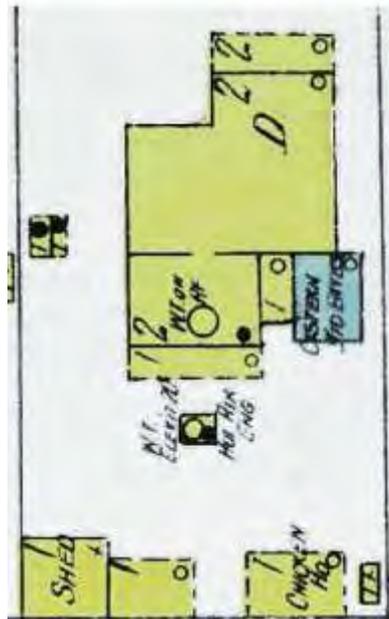

It is staff's opinion that the request meets the cited guidelines and recommends to the Commission the consideration of demolition. If approved, this will be the second of two required meetings.

PROPERTY OWNER'S NAME:	Glenn R Anderson
APPLICANT NAME:	Glenn R Anderson

I hereby certify I am the owner of record and that the work shall conform to all applicable laws of this jurisdiction. By receiving a Certificate of Appropriateness, I realize that this project will require a Building Permit approval **PRIOR to proceeding with the work outlined above** and that a final inspection is required under this application. I also understand that **any changes to an approved Certificate of Appropriateness must be submitted for review.**

	6/7/2018 Glenn R Anderson
PROPERTY OWNER'S SIGNATURE	DATE AND PRINT NAME

DETAILED PROJECT DESCRIPTION OF DEMOLITION
Demo of 1-story non-historic "Cistern Addition" (two outer walls, floor & roof) at rear of home.
Demo of three outer walls of 1-story non-historic "Kitchen Addition" at rear of home.
Demo of one upper, side facing, wall of historic "2-story" addition at rear of home.

CRITERIA FOR DEMOLITION OF CONTRIBUTING OR HISTORIC STRUCTURES:
Before any Certificate of Appropriateness may be issued for a demolition request, the Historic Architectural Review Commission must find that the following requirements are met (please review and comment on each criterion that applies);
(1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the following criteria:
(a) The existing condition of the building or structure is irrevocably compromised by extreme deterioration.
The 2-story addition (as are the other two) is irrevocably compromised by extreme deterioration. We will need to rebuild the 2-story addition, as is typical of structures in this condition, and are asking to remove the one upstairs side-facing wall.
(2) Or explain how the building or structure meets the criteria below:
(a) Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction.
The 2 story addition is a shed style structure (as are the other two) of substandard construction. This style is not one of the styles mentioned in the guidelines. Nor are there any distinguishable characteristics on the addition that add the slightest distinction to the house. The siding on the 2 story addition as been changed since 1965 and, in general, the poor quality of construction of these shed style additions detract from the house.

Nothing in this application is intended to alter the authority of the Building Official to condemn for demolition dangerous buildings, as provided in Section 102-218 of the Land Development Regulations and Chapter 14 of the Code of Ordinances.

(b) Is not specifically associated with events that have made a significant contribution to local, state, or national history.

None what so ever.

(c) Has no significant character, interest, or value as part fo the development, heritage, or cultural characteristics of the city, state or nation, and is not associated with the life of a person significant in the past.

None what so ever.

(d) Is not the site of a historic event with significant effect upon society.

None what so ever.

(e) Does not exemplify the cultural, political, economic, social, or historic heritage of the city.

None what so ever.

(f) Does not portray the environment in an era of history characterized by a distinctive architectural style.

None what so ever.

(g) If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif.

N/A. (No.)

(h) Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood.

No. The side facing wall is in poor condition even though it was re-sided after 1965 (and thus possesses no exterior historic attributes.)

(i) Has not yielded, and is not likely to yield, information important in history.

No.

CRITERIA FOR DEMOLITION OF NON-CONTRIBUTING OR NON-HISTORIC STRUCTURES:

The following criteria will also be reviewed by the Historic Architectural Review Commission for proposed demolitions. The Commission shall not issue a Certificate of Appropriateness that would result in the following conditions (please review and comment on each criterion that applies);

(1) Removing buildings or structures that are important in defining the overall historic character of a district or neighborhood so that the character is diminished.

The one historic wall is an upstairs side facing wall. The neighborhood will not be diminished or destroyed with the removal of this wall.

(2) Removing historic buildings or structures and thus destroying the historic relationship between buildings or structures and open space.

Mass, scale, open space nor relationships are not changing with the demo of the one upstairs side facing wall.

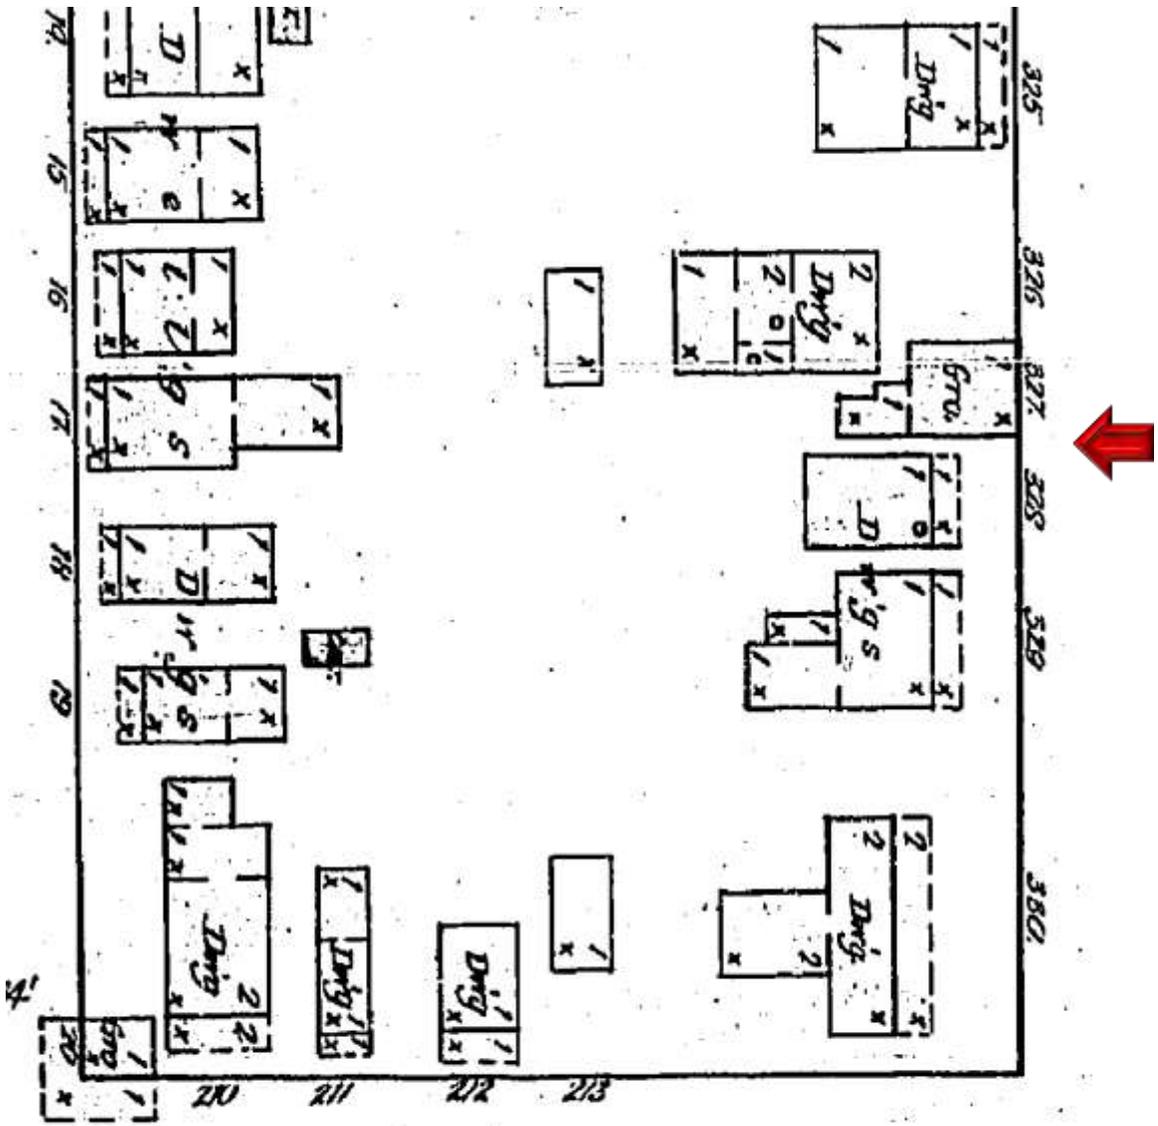

(3) Removing an historic building or structure in a complex; or removing a building facade; or removing a significant later addition that is important in defining the historic character of a site or the surrounding district or neighborhood.

Not applicable. We are requesting to demo a side facing wall at the rear of the house not a building or facade.

(4) Removing buildings or structures that would otherwise qualify as contributing.

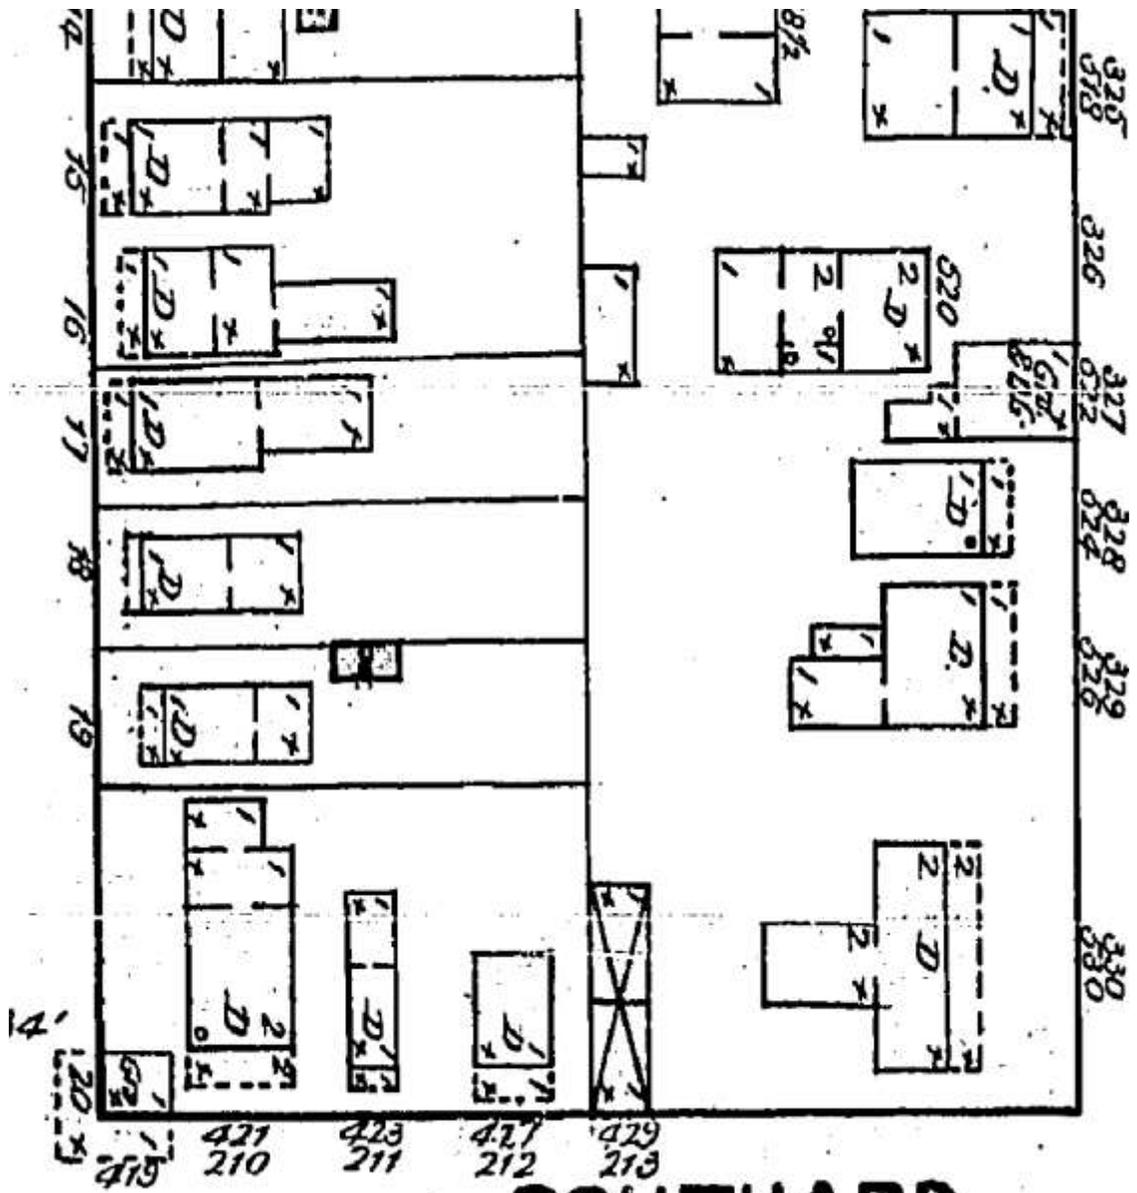

Only removing a wall not a building or structure.

Project Information:

Address: 522 Simonton St. Key West Fl 33040
 Owner: Glenn R Anderson 305-922-2480
 General Contractor/Builder: Kevin McChesney 305-304-6786
 Parcel ID: 00009320-000000
 Legal address:

KW PT LOT 1 SQR 50 G26-267 COUNTY JUDGES SERIES 3-M9 COUNTY JUDGES DOCKET
 1-73-242 OR2097-797/798L/E OR2756-501LET/ADM

Flood Zone: X, Lowest adjacent grade elevation 12.4', Top of bottom floor 14.8'
 All Elevations Based on NGVD1929 Datum

Zoning: Historic Neighborhood Commercial (HNC-1)
 HARC: Yes

Project Description: Rehabilitation of main and attached rear structures including: general rehabilitation of structures, Extension of 1 story addition across rear of house, expansion of 2 story addition across rear of house. Addition of deck, carport, pool and equipment pads.

Coverage calculations:

Lot: 6610 s/f, Coverage limits Structure: 50% (3310 s/f) & Impervious: 60% (3966 s/f)
 Existing & Approved Structure (house & accessory structure): 31.8% (2104 s/f) & Impervious: (+front walk) - 33.3% (2204 s/f)

Planned addition coverage change Structure (addition & carport): +372 sq ft. Impervious (+Pool, pads, carport pad -less carport): +750 s/f

New coverage calculations: Structure: 37.4% (2476 s/f) & Impervious: 48.8% (3226 s/f)

Rear yard (lot width x setback): 58.5' x 15' = 877.5 sq ft
 Maximum permitted coverage of rear yard =30% (263.3 sq ft) (includes structures, equipment pad but not pool or permeable decks)

Proposed rear yard coverage = Current: 120 sq ft. (13.7%), new: 144 sq ft (16.4%)

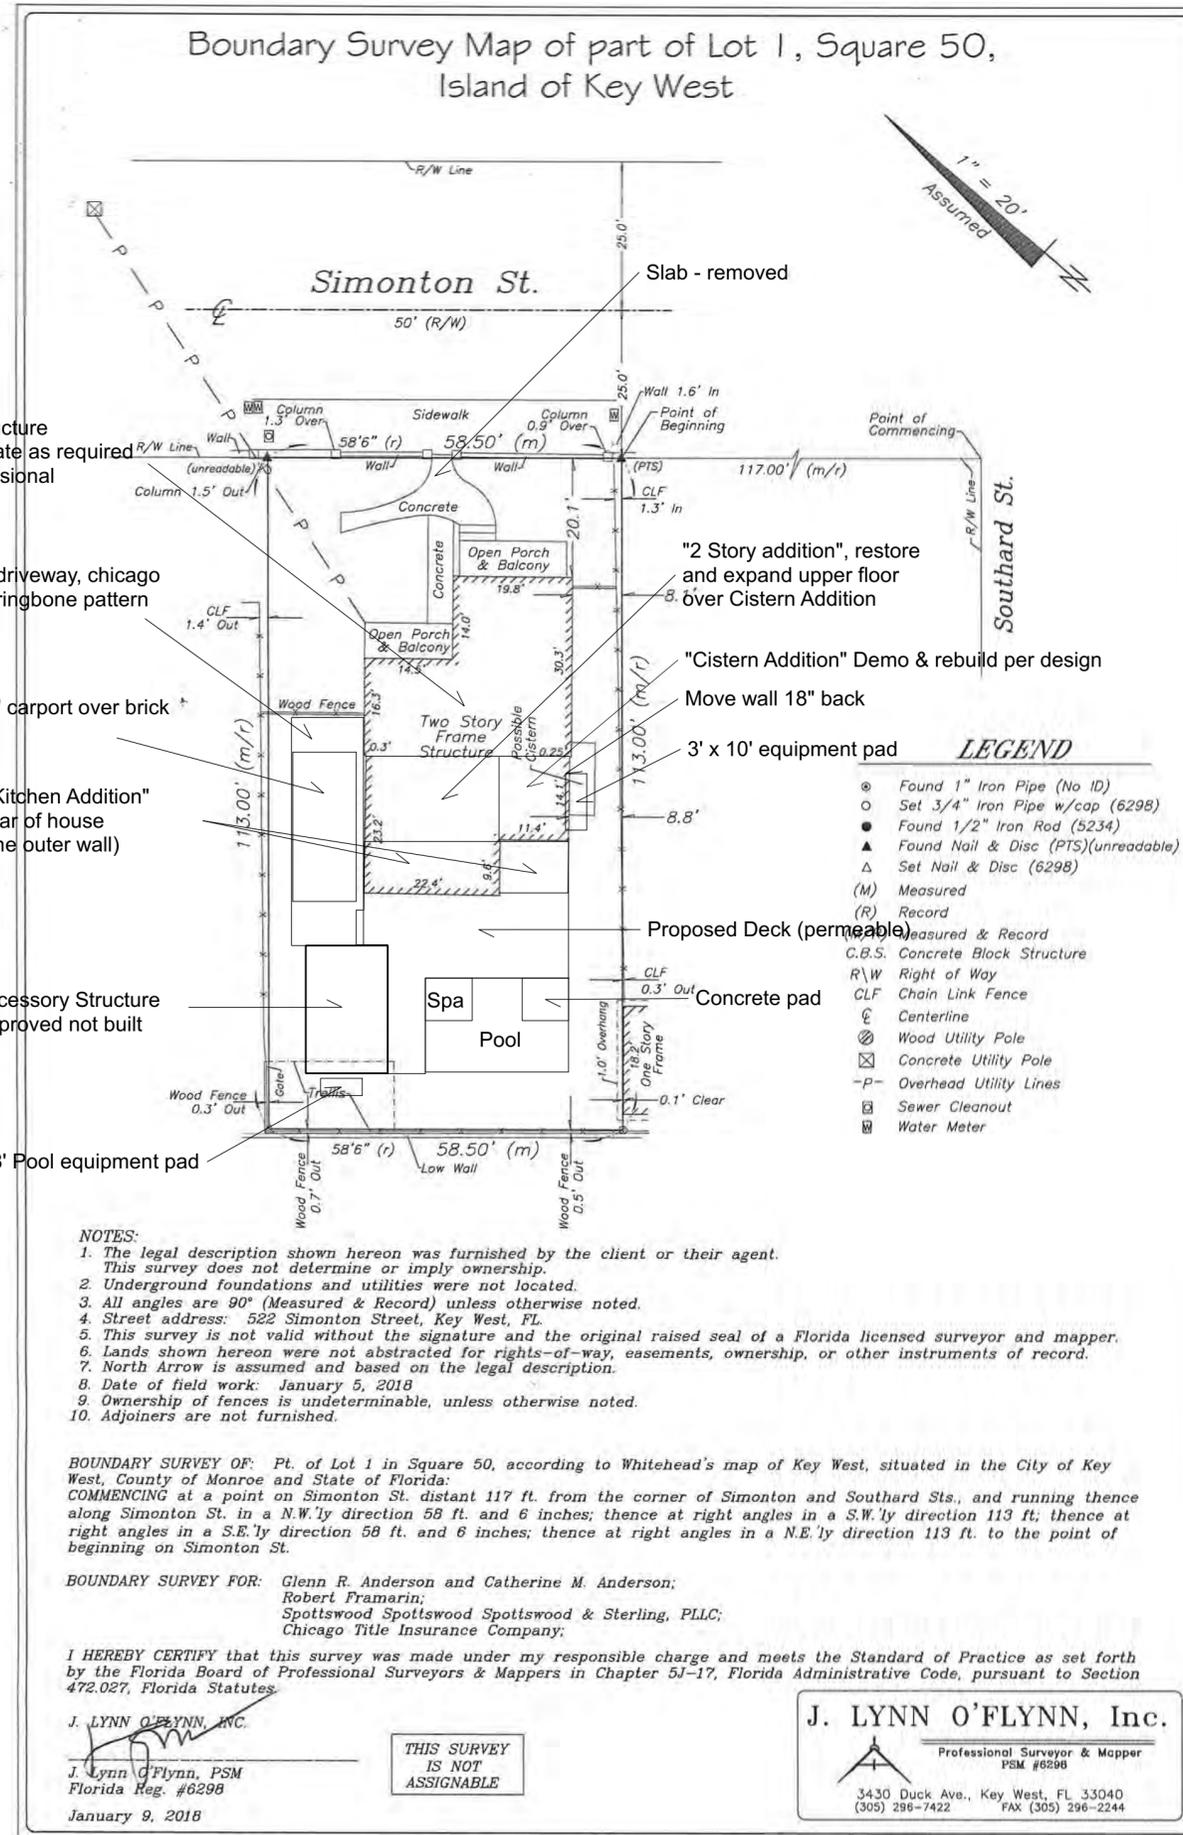

Minimum Required Open Space = 35% (2313.5 sq ft)

Proposed open space (Lot - impervious - deck) = 44% (2914 sq ft)

Setbacks: Front yard - 5', Side 5', Rear - 5', Rear (attached structures) - 15'

General Engineering Notes:

- All work shall comply with applicable codes.
- This design is based on the 6th Edition (2017) Florida Building Code.
- The Builder shall follow the manufacture specifications and recommendations when selecting the correct connector for the environment and wood type.
- The Builder using these plans shall be responsible for the means, methods, techniques, sequences, procedures and all safety aspects of construction.
- The Builder shall check and verify all dimensions and elevations.
- Existing underground utilities are not shown and Builder shall contact all utility companies prior to any excavation. Builder shall protect all utilities and shall be responsible for any damages at his expense.
- All lumber for structural members shall be pressure treated Southern Pine.
- Exterior wall windows and doors must be certified and/or listed by an independent laboratory to be structurally capable of resisting a 180 mph wind load as determined by ASCE Standard 7-10 Minimum Design Loads for Building and Other Structures.
- Connections: all connections and connectors for this project have been specified in this design and cannot be changed or substituted without written permission from the engineer of record. Connectors shall be installed as recommended and specified by the manufacturer.
- Concrete shall be a mix designed by a recognized testing lab to achieve a strength of 4000 psi at 28 days with a plastic and workable mix. Concrete to be mixed, placed and cured according to ACI standards and specifications.
- Reinforcing steel shall be ASTM A 615 Grade 60 deformed bars of new billet steel free from oil, scale and loose rust and placed in accordance with ACI standards and specifications.
- Soil supporting concrete slabs on grade shall be compacted to a density of not less than 95 percent of the maximum density as determined by the Standard Proctor Method.

NOTES:
 1. The legal description shown hereon was furnished by the client or their agent. This survey does not determine or imply ownership.
 2. Underground foundations and utilities were not located.
 3. All angles are 90° (Measured & Record) unless otherwise noted.
 4. Street address: 522 Simonton Street, Key West, FL.
 5. This survey is not valid without the signature and the original raised seal of a Florida licensed surveyor and mapper.
 6. Lands shown hereon were not abstracted for rights-of-way, easements, ownership, or other instruments of record.
 7. North Arrow is assumed and based on the legal description.
 8. Date of field work: January 5, 2018
 9. Ownership of fences is undeterminable, unless otherwise noted.
 10. Adjoiners are not furnished.

BOUNDARY SURVEY OF: Pt. of Lot 1 in Square 50, according to Whitehead's map of Key West, situated in the City of Key West, County of Monroe and State of Florida;
COMMENCING at a point on Simonton St. distant 117 ft. from the corner of Simonton and Southard Sts., and running thence along Simonton St. in a N.W.'ly direction 58 ft. and 6 inches; thence at right angles in a S.W.'ly direction 113 ft.; thence at right angles in a S.E.'ly direction 58 ft. and 6 inches; thence at right angles in a N.E.'ly direction 113 ft. to the point of beginning on Simonton St.

BOUNDARY SURVEY FOR: Glenn R. Anderson and Catherine M. Anderson;
 Robert Framarin;
 Spottswood Spottswood Spottswood & Sterling, PLLC;
 Chicago Title Insurance Company;

I HEREBY CERTIFY that this survey was made under my responsible charge and meets the Standard of Practice as set forth by the Florida Board of Professional Surveyors & Mappers in Chapter 5J-17, Florida Administrative Code, pursuant to Section 472.027, Florida Statutes.
