DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The United States Navy Coal Depot and Storehouse is a building which has received minor modifications and is structurally sound. The foundation of the building is bearing limestone with brick above grade. The wall construction is brick masonry laid in common bond, stuccoed and painted in a yellow-brown color. Buttressed piers separate arched window recesses in the north and south elevations. There are two corbelled courses at the spring line of the arches. There are rectangular windows in each window recess. The cornice above consists of four courses of corbelled brick and three header courses corbelled to define the entablature. The east and west elevations are stuccoed and scored to simulate dressed ashlar stone. Irregular joints in the masonry suggest separate stages in the construction process. The building has no porches, stoops or chimneys.

The central doorways are similar in the east and west elevations; that is, they contain large recessed arched openings with masonry infill and two horizontal sliding doors of sheet metal. There is a decorative arch pattern in stucco over the rectangular opening into the first floor central passage. The window openings in the east elevation appear to have been doorways as there are operating metal louvers and out-swinging metal shutters between window sills and floor lines. All openings in the east and west elevations have large metal pintles at the jambs, indicating that out-swinging shutters or doors once served these openings.

The building has a gable roof covered with sheet metal tile in a corrugated texture and painted silver. There is a sheet metal finial at each end of the gable ridge and wood cornice at both gable ends. The roof has wire glass skylights and there is a cupola with a wood frame base and house. Over the cupola frame is covering of textured sheet metal painted a yellow-brown color. There is a stepped pendant decoration in the cupola cornice and above that a wood and pipe handrail.

The Navy Coal Depot is an excellent example of the architecture necessary to maintain the United States Navy during the late nineteenth century. Its architectural character is determined by buttressed brick piers, arched window recesses, gable roof and cupola with lookout.

STATEMENT OF SIGNIFICANCE

On September 13, 1833, the United States Government purchased the irregularly shaped lot known as Square 4, from the four American proprietors of Key West, John W. Simonton, Mrs. John W.C. Fleming, Pardon C. Greene, and William Whitehead. By an Act of Congress approved July 21, 1852, a depot for Naval supplies was established at Key West. The site selected for the building was on the western point of the Island fronting on the harbor. From 1823 until 1826 this area had been used by the United States Navy Antipirate Squadron. In 1861, Key West became headquarters of the East Gulf Blockade Squadron. Upon completion of this building, the construction of which was supervised by Captian J.M. Scarpitt of the U.S. Corps of Engineers, it became known as the "Number One Building" and served as the Naval Administration Building until 1923. On December 15, 1932, The Secretary of the Navy entered into an agreement with the Department of Commerce to exchange Building No. 1 for the old Post Office Building next to it. The 7th Lighthouse District took over the building as its headquarters. In 1939 the Lighthouse Service became part of the United States Coast Guard, which now uses it as the Key West Station Headquarters. This large brick building was the first permanent Naval building and the oldest brick building on the Island.

Commander
Seventh Coast Guard District
Room 1012, Federal Building
51 S.W. 1st Avenue
Miami, Florida 33130

Dear Sir:

It is a pleasure to advise you that the U.S. Coastguard Headquarters - Key West Station has been officially listed on the National Register of Historic Places and to enclose a certificate of formal notification of the recognition given to this historic site.

We have enclosed a pamphlet entitled, "The National Register of Historic Places."

With every good wish and warm regards.

Sincerely,

Robert Williams

ROUGH DRAFT

TALLAHASSEE -- The U. S. Coast Guard Headquarters, *also known as "Building No. 1"* Key West Station, has been added to the prestigious National Register of Historic Places, "further boosting Florida's inventory of historic sites that have received national recognition," Secretary of State Richard (Dick) Stone has announced.

Secretary Stone, by law the state's chief archives and history official, received notification from Washington that the station had been added to the National Register.

The research for all Florida sites nominated for the National Register of Historic Places is conducted by specialists in the Division of Archives, History and Records Management under the Secretary of State *with the assistance of local citizens.*

The station was ~~originally~~ formerly the U. S. Navy Coal Depot and Storehouse. The United States purchased the property upon which it is located in 1833.

Sites added to the National Register are afforded a certain degree of protection and are eligible for federal matching grants for preservation purposes.

The station is located on the northwest corner of Front Street and Whitehead Street.

HISTORIC AMERICAN BUILDINGS SURVEY

UNITED STATES NAVY COAL DEPOT AND STOREHOUSE - UNITED STATES COAST GUARD, KEY WEST
STATION

FLA-190

Front Street at Whitehead Street Key West Monroe County Florida

PART TWO: ARCHITECTURAL DESCRIPTION

- A. General Statement: The United States Navy Coal Depot & Storehouse - United States Coast Guard, Key West Station is an excellent example of the architecture necessary to maintain the United States Navy during the late 19th Century. Its architectural character is determined by buttressed brick piers, arched window recesses, gable roof and cupola with look-out. The building has received minor modifications and is structurally sound.
- B. Technical Description of the Exterior:
1. Over-all foundations: 80'-2" x 183'-6"
 2. Foundations: Bearing limestone, brick above grade on a brick base.
 3. Wall Construction: Brick masonry in common bond, exposed or stuccoed, painted in a tint of yellow-brown. Buttressed piers separate arched window recesses in north and south elevations. Two corbeled courses at spring line of arches; three-light fan, wood board shutter and wood panel alternate with brick infill in arch of window recesses; rectangular windows in each recess; cornice consists of four courses of corbeled brick and three header courses corbeled to define the entablature. East and west elevations stuccoed and scored to simulate dressed ashlar. Irregular joints in masonry suggest separate stages in the construction process.
 4. Structural system: Bearing wall, brick piers, tie beams and trusses. Bearing wall at east and west elevations; piers at north and south elevations and near third-points of short span; tie beams support central span of loft floor; 8 roof wood modified fink trusses @ 19'-10" o.c. bear at exterior and interior piers, vertical sawed timber members, iron tie rods and straps, keyed lap and butt joints, continuous bearing plate at exterior walls; purlins and rafters.
 5. Porches, stoops, bulkheads: None
 6. Chimneys: None
 7. Openings, doorways and doors:
 - a. Central doorways similar in east and west elevations. Large recessed arched opening with masonry infill; segmented arch opening above loft floor line in arch infill, two horizontal sliding doors, sheet metal exterior, diagonal wood plank interior, iron rod guide at threshold; decorative arch pattern in stucco over rectangular opening into central passage first floor, two wood frame and metal mesh doors swing out, two four-panel doors swing in, heavy drip mold at base, bar and bar hardware. Rectangular niche above large recessed arch filled

with a bas relief decoration in a lighthouse motif applied to sheet metal covering of door, east and west elevations, backed with in-swinging four-panel door into loft space. Large metal pintles at both jambs of the large recessed arched opening, east elevation.

- b. Minor doorway in arched opening near the northeast corner, east elevation; two sheet metal shutters close opening.

8. Openings, windows:

- a. Window openings in east elevation appear to have been doorways; operating metal louvers, out-swinging metal shutters between window sills and floor line. All openings in the east and west elevations have large metal pintles at the jambs, indicating that out-swinging shutters or doors once served these openings.
 - b. Window openings in north and south elevations similar; rectangular window opening in each recessed panel, two 2/2 single hung windows per opening, iron or concrete lintels; wood shutter and three-light fan hinged at sill, swing in. Numerous recessed panels in south elevation closed with glass block, air conditioning and ventilating equipment.
9. Roof: Gable roof, sheet metal tile in a corrugated texture painted silver, sheet metal finial at each end of gable ridge; wood cornice at gable ends; galvanized gutters and down spouts; sheet metal roof vents at ridge gravity operated, star finial; wire-glass skylights.
10. Cupola: Wood frame base and house covered with textured sheet metal over diagonal wood sheathing painted white yellow-brown, stepped pendant decoration in sheet iron cornice, wood and pipe hand rails. Louvered openings in house, doorway in east elevation to platform near gable ridge, stairs to roof deck. Pattern on sides of house suggest door trim.

C. Detailed Description of the Interior:

1. Floor plans:

- a. First floor: Central passage defined by brick interior piers and partitions, doorways at each end and into spaces at each side; hatches in floor of loft at each bay, electric lift in second bay from west entrance; offices, quarters, head and laundry; mess, communications, etc., in spaces at each side of central passage; stairway to loft from quarters at northwest corner.
- b. Loft: Lost space defined by truss members, end walls of gable and roof sheathing; ice storage room at northeast corner; stairway to cupola.

2. Stairways:
 - a. Stairway, first floor to loft: Straight stair, wood treads and risers, hand rail and newel.
 - b. Stairway, loft to cupola: Open stairway, wood treads and hand rails, intermediate landing.
3. Flooring: Concrete, composition and ceramic tile; $3\frac{1}{8}$ " wood strips in loft.
4. Wall and ceiling finish:
 - a. Wall: Plaster and variety of modern finish materials including fiber board, acoustic tile, ceramic tile wainscot, etc. Wood chair rail in most rooms. Stepped wood cornice in southeast corner room.
 - b. Ceiling: Wood strips painted white, acoustical tile, plaster.
5. Doorways and doors: Panel doors, 2-6 panels, flush panel modern doors.
6. Decorative features: None
7. Hardware: Strap iron hinges, shutter and door pintles, truss tie rods and hanger straps.
8. Lighting: Modern fluorescent lighting, exposed conduit and panels.
9. Heating: Air conditioner units, some reverse cycle, misc. ventilating equipment.
- D. Site and Surroundings: This structure faces east on Front Street at Clinton Place at Whitehead Street, situated between property of the Key West U.S. Naval Station and the Municipal Aquarium. The old U.S. Customs House and Post Office is located to the south. A rectangular building (poured concrete walls, steel roof trusses, ceramic tile gable roof) used by Navy divers is to the northwest, and wharves to the west and northwest. Concrete sidewalks at east elevation, concrete ramp up to floor level at east doorway; concrete curb with simple iron bar and strap fence painted black; brick, macadam and concrete drive parallels long dimension at south side, wrought iron gate between this building and the Naval Station.

DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The United States Navy Coal Depot and Storehouse is a building which has received minor modifications and is structurally sound. The foundation of the building is bearing limestone with brick above grade. The wall construction is brick masonry laid in common bond, stuccoed and painted in a yellow-brown color. Buttressed piers separate arched window recesses in the north and south elevations. There are two corbelled courses at the spring line of the arches. There are rectangular windows in each window recess. The cornice above consists of four courses of corbelled brick and three header courses corbelled to define the entablature. The east and west elevations are stuccoed and scored to simulate dressed ashlar stone. Irregular joints in the masonry suggest separate stages in the construction process. The building has no porches, stoops or chimneys.

The central doorways are similar in the east and west elevations; that is, they contain large recessed arched openings with masonry infill and two horizontal sliding doors of sheet metal. There is a decorative arch pattern in stucco over the rectangular opening into the first floor central passage. The window openings in the east elevation appear to have been doorways as there are operating metal louvers and out-swinging metal shutters between window sills and floor lines. All openings in the east and west elevations have large metal pintles at the jambs, indicating that out-swinging shutters or doors once served these openings.

The building has a gable roof covered with sheet metal tile in a corrugated texture and painted silver. There is a sheet metal finial at each end of the gable ridge and wood cornice at both gable ends. The roof has wire glass skylights and there is a cupola with a wood frame base and house. Over the cupola frame is covering of textured sheet metal painted a yellow-brown color. There is a stepped pendant decoration in the cupola cornice and above that a wood and pipe handrail.

The Navy Coal Depot is an excellent example of the architecture necessary to maintain the United States Navy during the late nineteenth century. Its architectural character is determined by buttressed brick piers, arched window recesses, gable roof and cupola with lookout.

STATEMENT OF SIGNIFICANCE

On September 13, 1833, the United States Government purchased the irregularly shaped lot known as Square 4, from the four American proprietors of Key West, John W. Simonton, Mrs. John W.C. Fleming, Pardon C. Greene, and William Whitehead. By an Act of Congress approved July 21, 1852, a depot for Naval supplies was established at Key West. The site selected for the building was on the western point of the Island fronting on the harbor. From 1823 until 1826 this area had been used by the United States Navy, Antipirate Squadron. In 1861, Key West became headquarters of the East Gulf Blockade Squadron. Upon completion of this building, the construction of which was supervised by Captian J.M. Scarpitt of the U.S. Corps of Engineers, it became known as the "Number One Building" and served as the Naval Administration Building until 1923. On December 15, 1932, The Secretary of the Navy entered into an agreement with the Department of Commerce to exchange Building No. 1 for the old Post Office Building next to it. The 7th Lighthouse District took over the building as its headquarters. In 1939 the Lighthouse Service became part of the United States Coast Guard, which now uses it as the Key West Station Headquarters. This large brick building was the first permanent Naval building and the oldest brick building on the Island.

The United States Navy Coal Depot and Storehouse is a building which has received minor modifications and is structurally sound. The foundation of the building is bearing limestone with brick above grade. The wall construction is brick masonry laid in common bond, stuccoed and painted in a yellow-brown color. Buttressed piers separate arched window recesses in the north and south elevations. There are two corbelled courses at the spring line of the arches. There are rectangular windows in ~~the~~ each window recess. The cornice above consists of four courses of corbelled brick and three header courses corbelled to define the entablature. The east and west elevations are stuccoed and scored to simulate dressed ashlar stone. Irregular joints in the masonry suggest separate stages in the construction process. The building has no porches, stoops or chimneys.

The central doorways are similar in the east and west elevations; that is, ^{they contain} large recessed arched openings with masonry infill and two horizontal sliding doors of sheet metal. There is a decorative arch pattern in stucco over the rectangular opening into the first floor central passage. The window openings in the east elevation appear to have been doorways as there are operating metal louvers and out-swinging metal shutters between window sills and floor lines. All openings in the east and west elevations have large metal pintles at the jambs, indicating that out-swinging shutters or doors once served these openings.

The building has a gable roof covered with sheet metal tile in a corrugated texture and painted silver. There is a sheet metal finial at each end of the gable ridge and wood cornice at both gable ends. The roof has wire glass skylights and there is a cupola with a wood frame base and house. Over the cupola frame is a covering of textured sheet metal painted a yellow-brown color. There is a stepped pendant decoration in the cupola cornice and above that a wood and pipe handrail.

The Navy Coal Depot is an excellent example of the architecture necessary to maintain the United States Navy during the late nineteenth century. Its architectural character is determined by buttressed brick piers, arched window recesses, gable roof and cupola with lookout.

Dear Sir:

It is a pleasure to advise you that the U.S. Coastguard Headquarters - Key West Station has been officially listed on the National Register of Historic Places and to enclose a certificate of formal notification of the recognition given to this historic site.

We have enclosed a pamphlet entitled, "The National Register of Historic Places."

With every good wish and warm regards.

Sincerely,

Robert Williams

ROUGH DRAFT

TALLAHASSEE -- The U. S. Coast Guard Headquarters, *also known as "Building No. 1"* Key West Station, has been added to the prestigious National Register of Historic Places, "further boosting Florida's inventory of historic sites that have received national recognition," Secretary of State Richard (Dick) Stone has announced.

Secretary Stone, by law the state's chief archives and history official, received notification from Washington that the station had been added to the National Register.

The research for all Florida sites nominated for the National Register of Historic Places is conducted by specialists in the Division of Archives, History and Records Management under the Secretary of State *with the assistance of local citizens.*

The station was ~~originally~~ formerly the U. S. Navy Coal Depot and Storehouse. The United States purchased the property upon which it is located in 1833.

Sites added to the National Register are afforded a certain degree of protection and are eligible for federal matching grants for preservation purposes.

The station is located on the northwest corner of Front Street and Whitehead Street.

Dear Randy -

Hope this is what you need
of Coast Guard Building #1. It's
very difficult to get a clear shot -
If I can do anything else please
let me know -

Say hello to Mary Evans
and to George Fischer if you
see him -

Sincerely,

Shaw. Barron

Dear Bill:

Enclosed please find several nominations to the
National Register of Historic Places as listed on the
attached list. These nominations are worthy of sub-
mission to the Register as approved by the Florida
Review Committee and the Historic Preservation Officer.

Thank you.

Sincerely,

Robert Williams
State Historic Preservation
Officer

Dear Sir:

Thank you for your letter of May 29, 1973 concerning Building No. 1 at Key West. As was indicated to Mrs. Boatright in my telephone conversation of last week, the nomination of this structure is currently being considered by the State Review Committee for the National Register of Historic Places and will be submitted to Washington sometime after June 6.

Upon receipt of your material, we will proceed with the nomination of the St. Augustine Light.

Sincerely,

Mildred L. Fryman (Mrs.)
