

PROPOSAL - STATEMENT OF WORK

ADDITIONAL SERVICES DURING CONSTRUCTION KEY WEST AQUARIUM BASIN SEAWALL REPLACEMENT

Key West, FL

This proposal has been prepared in accordance with executed General Environmental Engineering Services Agreement between the City of Key West and Tetra Tech, Inc. dated January 13, 2015. The work described herein will be performed on a Time & Expense basis in accordance with the fee schedule established in this agreement. Fees shall be not-to-exceed unless approved in writing by the City of Key West.

Prepared by: TETRA TECH, Inc. July 19, 2019

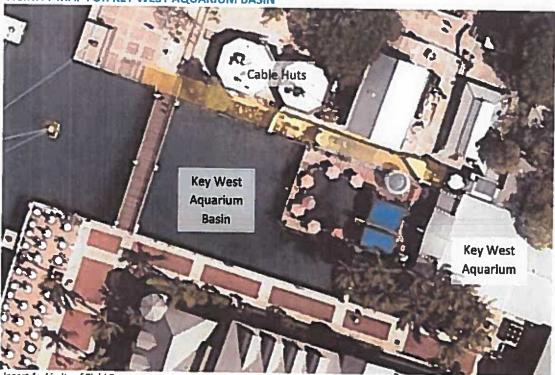

BACKGROUND

As of July 4th, 2019, the project's contractor, PAC Comm Inc., has exceeded the 150-day schedule afforded by the contract documents and entered a period of liquidated damages. PAC has provided a recovery schedule that indicates a new anticipated completion date of August 3rd, 2019.

PROPOSAL / STATEMENT OF WORK

Due to the schedule impacts noted above, Tetra Tech proposes to furnish <u>Additional Services</u> to the City of Key West to continue Engineering During Construction and Construction Inspections for the seawall project located on the north side of the Key West Aquarium Basin in Key West, Florida.

Insert 1: Limits of Field Survey

Task 25.6 - Additional Services

Tetra Tech will conduct up to three (3) additional site inspections to review and document the progress on the remaining contract work. Reviews will center around conformance with the project's requirements as stipulated in the contract documents. Tetra Tech will track the progress of items noted on the punch list of outstanding items for Final Completion.

Tetra Tech will conduct weekly progress meetings with the City of Key West and the Contractor to monitor construction progress and provide information as required to assist with project completion.

One (1) of the three (3) site visits will be a Final Completion walk-through. Tetra Tech will rely upon survey data and measurements provided by the contractor's professional, state-licensed land surveyor to determine if the project can be certified as constructed in accordance with the plans and specifications. Upon completion of construction, Tetra Tech will review as-builts and related close-out documents.

Provided those documents are acceptable, Tetra Tech will furnish a letter of certification for project close-out.

(25.6) Subtotal: \$ 19,278	btotal: \$ 19,278
----------------------------	-------------------

PROPOSAL CONDITIONS

This proposal is based upon the following conditions:

- 1. Construction completion of August 3rd, 2019.
- 2. Three (3) total site visits
- 3. We assume our schedule will extend a few weeks beyond the construction schedule to close out permits and coordinate contractor paperwork for final completion.

Should the contractor's schedule be further delayed, or other site visits/services be required beyond those listed above, a separate authorization may be required.
